Environmental status report for the Canadian petroleum refining industry, 1983-1984

by M.-L. Geadah. Ottawa : Environment Canada, Conservation and Protection, 1987 xxiv, 151 p. Bibliogr. (Report : EPS 1/PN/1) *French ed. (Rapport environmental sur...) 88-01052/2.* ISBN 0-662-15561-0
MICROLOG 88-01051 2 fiche

An overview of the Canadian petroleum refining industry with respect to gaseous, liquid, and solid waste releases; pollution control methods; and waste disposal practices. Federal and provincial air quality, effluent and solid waste requirements are presented as well as an assessment of the state of compliance of the industry with the federal Petroleum Refinery Effluent Regulations and Guidelines for the years 1983 and 1984. Other recent environmental studies pertaining to the industry are discussed including studies on: trace contaminants in effluents; analytical methodology for the effluents; groundwater contamination; and decommissioning.

Environnement et développement : politique de l'Agence canadienne de développement international

Agence canadienne de développement international. Hull, Québec : l'Agence, 1987. 19, 18 p. : ill. *Bilingue*
ISBN 0-662-55211-3
MICROLOG 88-00082 1 fiche

Les pays les plus pauvres sont en butte à une crise environnementale sans précédent. La majorité des ressources en péril actuellement sont essentielles à la croissance économique de ces pays à long terme. Au niveau international on assiste à l'adoption de nouvelles priorités en matière d'environnement. La nouvelle politique de l'ACDI accordera une plus grande attention aux activités environnementales. Cette politique comporte deux objectifs: veiller à ce que les projets de l'Agence n'endommagent pas l'environnement par inadvertance et à ce que l'ACDI finance plus de projets environnementalement bénéfiques.

Epidemiology of pelvic inflammatory disease in Alberta : 1974-1982

by A. Adebayo. Edmonton : University of Alberta, Dept. of Sociology, 1988. 15 p. Bibliogr. (Research discussion paper ; no. 52) *CSI 99241.205.* ISSN 0317-2473
MICROLOG 88-05319 1 fiche

This paper presents the trends in hospitalization for pelvic inflammatory disease (PID) in Alberta between 1974 and 1982. In 1974 and 1982, respectively, there were about 1,900 and 2,620 cases in the province of hospital separations for PID of women aged 15 to 44 years. During this period, the PID rate increased by 16% among women aged 15 to 19. This group posted an average annual rate of about 60% above the Canadian rate for the same period. Women aged 20 to 24 years evidenced the greatest rates for PID in Alberta throughout 1974 to 1982. Contains charts showing hospital separation rates for PID in Canada and Alberta, 1974-1982, and age-specific separation rates for PID in Alberta, 1974-1982.

Equilibrium assignment on congested transit networks

by J. DeCea and E. Fernandez. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 27 p. Bibliogr. (Publication ; no. 584)
MICROLOG 88-05755 1 fiche

This paper proposes a new formulation for the assignment problem over congested transit networks. The congestion effects due to insufficient capacity of system elements (transit lines) are considered to be concentrated at transit stops. Waiting times on access links are therefore dependent on passenger flows. A special formulation of the transit network is used in order to model correctly the congestion effects. Finally, algorithms for solution are analyzed.

An Ergonomic evaluation of a modified full sized Ford van and a modified Chrysler minivan for disabled drivers

by J.M. Holden...et al. Ottawa : Transportation Development Centre, 1987. xvi, 67 p. : ill Bibliogr. *TP 8452E.*
MICROLOG 88-00342 1 fiche

A Chrysler minivan and full sized Ford van were modified for use by a disabled driver seated in a wheelchair. The Chrysler minivan had a ten inch lowered floor, an automatic sliding door and a fold out ramp. The front bucket seats were removable and a wheelchair securement system was installed in the driver's station. The Ford van was fitted with an automatic door opener and platform lift. The driver's station had an automatic lowering floor with a built in wheelchair securement system. The ergonomics of these two vehicles were evaluated by a team of specialist observers with the assistance of ten disabled drivers selected to represent a broad range of functional ability levels. Tests of ingress/egress, use of controls safety features, selected maintenance features and driving functions were conducted in cold, snowy conditions.

An Ergonomic evaluation of STAR-VUE and NAV-ICE

prepared for Transportation Development Centre ; by Intera Technologies Ltd. Ottawa : INTERA Technologies Ltd., 1986. xvi, 207 p. : ill. Bibliogr. *TP 8221E.*
MICROLOG 88-00290 3 fiche

Summarizes an assessment of several human factor aspects of NAV-ICE, a computer-based system which utilizes airborne radar (STAR-VUE), marine radar and other image data for ice navigation. The study focuses on the design of the user interface and a subsequent phase of the project explored the accuracy with which experienced ice observers could classify ice using digital SAR imagery. Two prototype display configurations were examined for use as training simulators. This work identified desirable changes and additions to the NAV-ICE system. It also pointed out the need for further research in the area of ice classification and training using SAR imagery.

Error analysis for a laminar flow fluid viscometer

by W.F. Hayes and H.G. Tucker. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1986. v, 29 p. : ill. Bibliogr. (Technical report ; TR-SYS-012)
MICROLOG 88-04432 1 fiche (Available on fiche only)

A continuous reading fluid viscometer based on two-dimensional laminar flow was patented and the associated prototype sensor hardware tested. Commercially available continuous reading viscometers, which rely upon the detection of a viscosity-dependent pressure drop along a fluid flow passage, typically require either a constant or an accurately known fluid flow rate. This viscometer differs from such commercial viscometers in that the fluid viscosity may be derived directly from wall static pressure measurements in suitably shaped laminar flow passages, provided that the fluid density is either known or separately measured. Practical guidelines are suggested for the design of the laminar flow passages of the viscometer such that accurate theoretical prediction of viscometer performance is possible. This paper assesses the effects of errors in pressure measurement and density estimation upon the precision to which the fluid viscosity may be predicted.

Estimates of the government of Nova Scotia for the fiscal year, 1988-89

submitted by Greg Kerr. Halifax : The Ministry, 1988. xv, 425 p. : ill. *CSI 51105.003.*
MICROLOG 88-03778 5 fiche

The approved estimate consists of the priority services and activities for each Department or agency. Priority services and activities are summarized by Budget subject in the Estimates. The detail presentation indicates previous year "Actual," present year "Forecast" and new year "Estimate," by Budget subject. A Budget subject is a service or activity selected by management as a focus for evaluation, planning, determining alternatives and presenting cost-justified funding recommendations.

Estimating downed-dead roundwood fuel volumes in Central Alberta

by T. Singh. Edmonton : Canadian Forestry Service, Northern Forestry Centre, 1987. viii, 23 p. : ill. Bibliogr. (Information report ; NOR-X-289) ISSN 0704-7673
MICROLOG 88-02015 1 fiche

A total of 46 pine- and spruce-dominated stands at five locations in central Alberta were sampled using the line intersect method to determine downed-dead fuel volumes. The stands were classified into five subgroups on the basis of species composition and basal area. The components of downed-dead materials were classified into sound, partly decomposed, and punky fuel condition classes. Prediction equations were derived to estimate roundwood fuel volumes from basal area, stem density, crown density, height, and age.

Estimating origin-destination matrices from traffic counts : a simple linear intercity model for Quebec

by M.J.I. Gaudry and L. Lamarre. Montreal : Université de Montréal, Centre de recherche sur les transports, 1978. 14 p. Bibliogr. (Publication ; no. 105) (Cahier ; no 7809)
MICROLOG 88-06376 1 fiche

The idea of obviating the need to conduct origin-destination (O-D) surveys by estimating O-D matrices from counts made on the links of a network of transit lines, streets or roads is relatively recent. Studies based on demand models have all estimated the parameters of the gravity multiplicative model. This paper presents results based on a simple linear model which takes into account heteroskedasticity of the residuals, with the "best" results summarily compared to those obtained with an unconstrained-generation-distribution gravity model which does not take heteroskedasticity of the residuals into account. The data to be explained consist of two-way traffic counts on 37 links of a network of 23 nodes for Quebec in 1972.

Estimating the O-D matrix from observed link volumes -- Rev.

by P. Robillard. Montreal : Université de Montréal, Centre de recherche sur les transports, 1974. 21 p. : ill. Bibliogr. (Publication ; no. 1) (Publication ; no 152)
MICROLOG 88-06292 1 fiche

Until now, traffic flow data were used almost exclusively for the study of circulation control and road construction. This paper presents a methodology for using the data for transportation planning where traditionally the data needed came from an origin-destination (O-D) survey. Estimates of the O-D matrix were obtained using observed link volumes for the proportional assignment methods, without taking into account either explicitly or implicitly any constraints of capacities. Estimatability of parameters is discussed and related with the sample of traffic volume needed.

Estimation of 'invisible' R&D : an exploratory model

by R. Allard. Ottawa : Statistics Canada, Science, Technology and Capital Stock Division, 1987. 24 p. *CSI 01100.212.*
MICROLOG 88-01989 1 fiche

This paper attempts to estimate the putative value of cross-border flow of technological information between United States companies and their Canadian subsidiaries. The model attempts to estimate the value of R&D transferred from foreign parent companies to Canadian subsidiaries which is not otherwise recorded in statistical survey, using the basic hypotheses that all technologies used by Canadian subsidiaries are similar to those used by parent companies manufacturing similar products; that all subsidiaries, require a level of R&D, measured as a percentage of sales (or added value), similar to that of their parent company; and that where the subsidiary's level of R&D is inferior to that of the parent company, it is assumed that technology is being transferred from the parent company to the subsidiary in order to maintain the latter's competitiveness.

Estimation of the effect of intensive logging on ungulates *cervids* in the White River drainage

by G. Schuerholz, P. McNamee and M.R.C. Massie. Victoria : Pacific Forestry Centre, 1988. 35 p. : ill. Bibliogr. (Information report : BC-X-303) *CSI 21144.201.* ISSN 0830-0453 ISBN 0-662-16372-9
MICROLOG 88-06026 1 fiche

A generalized ungulate population model was developed to estimate sustainable populations of elk, moose, and deer before and after salvage logging of beetle-damaged Lodgepole pine in the White River area of the East Kootenays. The ecosystem classification schemes of Krajina (1969) and Utzig et. al. (1983) were used to describe the biogeoclimatic zones and subzones for the study area as a basis for the discussion of habitat requirements by corresponding cervid species. Information on current forest cover and the data were analyzed and related to snow classes and range-specific productivity values. Biological and ecological baseline information on cervid species were taken from the literature and incorporated into the ungulate population model. Sustainable populations were calculated by species for different snow classes. Based on the results, habitat use patterns, calf-female ratios, and population densities in response to changing forest cover and environment are discussed. A brief history of ungulate management in the East Kootenays in relation to forest management is also presented.

Estimation of the supply of forest biomass for energy conversion in British Columbia

by T.L. McDaniels and G.H. Manning. Victoria : Pacific Forestry Centre, 1987. 32 p. (Information report ; BC-X-294) ISSN 0830-0453 ISBN 0-662-15718-4
MICROLOG 88-01070 1 fiche

Using data from the national biomass inventory and other reports, this estimate derives economic supply curves for forest biomass fuels for British Columbia, allowing the analysis of the potential for use of bioenergy in the province. The study updates and expands the British Columbia portion of the work in light of new information available since 1981. Fuel type quantities include mill residues, sortyard residues, forest residues, merchantable surplus, salvage, stand conversion and plantations, with softwoods from merchantable surplus excluded. The study covers 1985-95, with production for 1990 selected to represent the average level of potential output over the decade. Estimates in 1985 dollars were developed for the cost of supplying increasing volumes of forest biomass in each region. Only direct production and transportation costs are considered and no stumpage and opportunity costs are included.

Etude des marchés de la tourbe horticole : résumé administratif

Fredericton Ministère des ressources naturelles et de l'énergie, Division des ressources minières, 1987. i, 27 p. (Dossier public : 87-19) *Bilingue (Peat moss market...).* ISSN 0712-4562
MICROLOG 88-04787 1 fiche

Cette étude avait pour but de déterminer comment le marché de la tourbe est présentement structuré en Amérique du Nord et d'identifier les occasions de développement du marché pour les producteurs du Nouveau-Brunswick, et d'évaluer le potentiel de développement de certains marchés étrangers pour l'industrie de la tourbe. Ce document résume la méthode adoptée pour atteindre les objectifs de l'étude et fournit les principaux résultats et conclusions.

Etude du fonctionnement de la municipalité régionale, deuxième étape : fonctions et finances : document de travail

Etude du fonctionnement de la municipalité régionale (Ottawa-Carleton, Ont.). Ottawa : l'Etude, 1988. 20, 20 p. *Bilingue (Ottawa-Carleton Regional...).*
MICROLOG 88-04405 1 fiche

La deuxième étape de l'étude sur le fonctionnement de la municipalité régionale porte sur les fonctions et les finances: qui fait quoi et d'où vient l'argent. Ce document expose certaines des questions qui commencent à faire surface au cours de cette étape. On y propose une position quant à la question fondamentale: que doit-on attendre de la Municipalité régionale d'Ottawa-Carleton et pourquoi. Puis, on suggère des critères pour la répartition des fonctions entre les divers paliers. On décrit ensuite le programme de recherche et on soulève un certain nombre de questions concernant des fonctions particulières et des problèmes de financement. Finalement, le document présente les différentes étapes de l'étude.

Etude préliminaire des effets éventuels d'une hausse d'un mètre du niveau de la mer à Charlottetown, dans l'Ile-du-Prince-Edouard : résumé d'un rapport

P. Lane and Associates Limited. Ottawa : Environnement Canada, 1988. 8, 7 p. (Sommaire du changement climatique ; SCC 88-02) *Bilingue (Preliminary study of the...).* ISSN 0835-3980 ISBN 0-662-55649-6
MICROLOG 88-03745 1 fiche

Le Centre climatologique canadien (CCC) a financé plusieurs études touchant les effets éventuels, sur divers secteurs de l'économie canadienne, du réchauffement du climat prévu du fait de la concentration croissante des gaz de serre dans l'atmosphère. Un des résultats directs de ce réchauffement serait une hausse de 20 à 140 cm du niveau de la mer d'ici le milieu du prochain siècle, ce qui aurait d'importantes implications pour les zones côtières. Cette publication renferme le résumé des résultats d'une étude sur les implications de telles hausses pour Charlottetown (IPE).

Etude sectorielle et professionnelle du secteur des produits métalliques au Québec effectuée dans le cadre du système de projections des professions au Canada

par S. Bélisle. Ottawa : Commission de l'emploi et de l'immigration du Canada, Region du Québec Direction des services économiques, 1987. vii, 58 p. *CSI 22138.220.* ISBN 0-662-93935-2
MICROLOG 88-02053 1 fiche

Le système de projections des professions au Canada est une base de données qui vise à identifier les déséquilibres qui pourraient se manifester entre les besoins des employeurs et les disponibilités de travailleurs sur un horizon de 5 à 7 ans. Ce document examine plus particulièrement le secteur des produits métalliques au Québec. L'analyse est modelée autour de 2 séries de facteurs qui sont déterminants dans l'évolution des besoins professionnels: les facteurs conjoncturels et les facteurs structurels (changements technologiques, techniques et organisationnels). Les perspectives d'emploi sont données pour chacun des groupes professionnels suivants: direction supérieure, soutien technique, soutien administratif, personnel de la vente, travailleurs à la transformation et usineurs.

Evaluating environmental impact assessment : an action prospectus

Hull, Que. : Canadian Environmental Assessment Research Council, 1988. 10, 10 p. Bibliogr. *Bilingual (Etude de l'évaluation...).* ISBN 0-662-55892-8
MICROLOG 88-04974 1 fiche

The Council (CEARC) was established on January 30, 1984, by the federal Minister of the Environment to advise government, industry and universities on ways to improve the scientific, technical and procedural basis for environmental impact assessment (EIA). CEARC is undertaking research in several areas related to improving the practice of environmental assessment. Council has chosen post-audit and evaluation as an important focus of research. This prospectus draws on the results of commissioned research and the conference 'Audit and Evalution in Environmental Assessment and Management : Canadian and International Experience' (Banff 1985), and sets out the directions for further work that Council may pursue directly or promote in consultation with other organizations

Evaluating the free trade deal : a guided tour through the Canada-U.S. Agreement

by R.G. Lipsey and R.C. York. Toronto : C.D. Howe Institute, 1988. 139 p. (Policy study ; no. 6) *Summary (12 p.) laid in.* ISSN 0832-7912 ISBN 0-88806-228-1
MICROLOG 88-05135 2 fiche

This study places the US-Canada Free Trade Agreement in its historical perspective and then provides a brief overview of its contents to show what it provides by way of access to the US market. The paper analyzes the Agreement chapter by chapter, the significance, and questions and responses relating to relevant concerns. Discusses rules of origin for goods, border measures, national treatment, technical barriers, agriculture, wine and distilled spirits, energy, automotive products, emergency action, exceptions for trade in goods, government procurement, services, temporary entry for business persons, investment, financial services, institutional provisions, bi-national dispute settlement in antidumping and countervailing duty cases, indirect restraints on sovereignty, and other provisions.

Evaluation and definition of the extent of superstructure icing as it may relate to ships safety and operations for the east coast of Canada

for Transportation Development Centre ; by Melville Shipping Ltd. Ottawa : Melville Shipping Ltd, 1986. xi, 106 p. : ill. Bibliogr. *TP 8232E.*
MICROLOG 88-00321 2 fiche

Ice accretion on ships which operate in hostile waters and experience extreme cold has been a serious problem for many years, primarily because of the adverse affect on ship stability. There is concern that ice accretion may seriously affect the safety and operations of vessels which are planned for year round operations associated with development and production of oil and gas off the East Coast of Canada, particularly in the region of Hibernia. The limited data available was used to calculate the effect of ice accretion on offshore/logistics/supply ships, which are most likely to be affected. Investigations into methods of anti-icing and de-icing indicate that while a great deal of laboratory work was carried out, little field testing was done of promising methods. The report recommends a scientific testing program.

Evaluation and testing of Westar Mining Ltd.'s coal to determine its suitability for coal water mixture combustion : final report

by D.M. Parkes. Vancouver, B.C. : Westar Engineering Ltd., 1985. 80 p. *CANMET contract: ISQ84-00014.*
MICROLOG 88-01189 1 fiche

Westar Mining Ltd. has been examining alternative markets for its coal and as part of the investigation, it identified the possible substitution of oil in furnaces designed to burn oil only by a coal-water-mixture. Tests were carried out on coals from the Greenhils mine and Coal Creek exploration area, by English China Clays, and by AB Carbogel in Sweden. A preliminary economic assessment of the Carbogel system is also included.

Evaluation de certaines populations de touladi en Mauricie

par M. Lapointe. Québec : Gouvernement du Québec, Ministère du loisir, de la chasse et de la pêche, Direction de la faune aquatique, 1986. xii, 125 p. : ill. Bibliogr.
CSI 66126.203. ISBN 2-550-17966-8
MICROLOG 88-03365 2 fiche

Le touladi est l'un des poissons les plus recherchés par les pêcheurs sportifs, mais cette espèce est rare avec un taux de croissance très faible. L'objectif de ce projet d'étude est d'analyser les habitats et les communautés associées au touladi dans quelques lacs de la Mauricie et d'identifier les paramètres dynamiques des populations étudiées. Le compte rendu des résultats comprend d'abord une description des aires d'études, un portrait de l'environnement des lacs et une étude des modes de gestion des plans d'eau. Ensuite, les méthodes utilisées pour l'obtention des données sur la morphométrie et la physicochimie sont décrites. Inclut une discussion des résultats.

Evaluation de l'éducation à la maternelle dans les écoles franco-manitobaines 1985 : rapport sommaire

Manitoba. Manitoba Education. Winnipeg : Education Manitoba, xi, 66 p. : ill. ISBN 0-7711-0653-X
MICROLOG 88-01025 1 fiche

Ce rapport sommaire présente une brève description de l'enseignement à la maternelle dans les écoles franco-manitobaines ainsi que les recommandations du comité consultatif technique. Les équipes d'observations-interviews ont visité les écoles pour observer pendant une demi-journée les élèves de chaque classe visitée. Une des membres de l'équipe a conduit une entrevue avec l'enseignant. L'équipe devait s'efforcer de recueillir des données pertinentes sur l'environnement matériel, les travaux et les activités, le programme utilisé, la diversité culturelle, les critères d'évaluation, les services et les ressources connexes, le recours aux activités parascolaires et le rôle des enseignants.

Evaluation des normes de stabilité pour barges : rapport sommaire

par R.L. Fidelman. Ottawa : Transports Canada, Développement, 1984. vi, 20, 3 p. Bibliogr. *TP 7490F. L'éd. anglaise (Appraisal of barge...) sur la même fiche.*
MICROLOG 88-00324 1 fiche

Après une recherche documentaire sur la question de la stabilité des embarcations en général et des barges en particulier, ce rapport se penche sur les statistiques concernant les naufrages de barges et analyse ceux liés à une perte de stabilité de ces bateaux. Il établit une comparaison des normes afférentes en vigueur aux Etats-Unis, en Grande-Bretagne et au Canada et analyse les critères sur lesquels elles sont fondées. Il montre aussi qu'un nombre important de barges ne satisfont pas à la norme canadienne provisoire de 1977. Le rapport conclut que le facteur sécurité en matière de stabilité n'est pas encore justiciable de traitement mathématique exact. Néamoins, il présente un certain nombre de solutions approchées et met en évidence divers facteurs.

Evaluation of blast furnace slag for possible use as an additive to mine backfill : final report

Sault Ste. Marie, Ont. : Watts Cement Limited, 1988. 80 p. : ill. *CANMET contract: 69156-01-SQ.*
MICROLOG 88-03149 2 fiche

The mining industry is potentially the largest market in Northern Ontario for cement manufactured using granulated slag from Algoma Steel Corporation Ltd. in Sault Ste. Marie. A testing program was conducted in 1986 to evaluate ground granulated blast furnace slag (GGBFS) from Algoma Steel Corporation for possible use as an additive to mine backfill. The evaluation was based on compressive strength tests conducted at the laboratories of INCO Ltd., Falconbridge Ltd., Noranda Inc. - Geco Division, and Kidd Creek Mines Ltd., as well as at an independent laboratory. The objective was to evaluate GGBFS from the Reiss Lime Company of Canada for possible use as an additive to mine backfill.

Evaluation of brucellosis and tuberculosis in bison in northern Canada

Bison Disease Task Force (Canada). Ottawa The Task Force, 1988. xix, 236 p. Bibliogr.
MICROLOG 88-06351 3 fiche

South of the Mackenzie River and generally in and near Wood Buffalo National Park, there is a free-roaming population of bison, the cross-bred descendants of the original wood bison and plains bison. The present hybrid herd is infected with bovine tuberculosis and brucellosis, believed to have been brought to the area by the plains bison. This report gives a history of this threatened species and their management within the park. It describes the diseases and their treatments, and gives options for disease control. Nine options are examined: relevant observations and recommendations are given.

Evaluation of CANMET'S fossil fuel heating program : final report

submitted to Office of Technology Transfer, Canada Centre for Mineral and Energy Technology ; submitted by Marbek Resource Consultants Ltd., in association with James F. Hickling Ltd.. Ottawa : Marbek Resource Consultants Ltd., 1987. x, 131 p. : ill. *CANMET contract: 69136-01-SQ*
MICROLOG 88-02038 2 fiche

This study documents CANMET's research and technology transfer activities in residential heating systems and evaluates the impact of these activities on Canadian consumer and residential heating equipment manufacturers as well as on the numerous government agencies, industry associations and consumer organizations which have a stake in new and improved residential heating technologies. This evaluation study, based primarily on 50 detailed interviews with the Program's major client groups, documents and evaluates the effectiveness of the research and technology transfer activities, undertaken or funded by CANMET, on residential heating from 1971 to the present.

Evaluation of cement-based backfill materials

by R. Dayal and R. Klein. Toronto : Ontario Hydro, Research Division, 1987. ii, 45 p. : ill. Bibliogr. (Report ; no. 87-223-K)
MICROLOG 88-01722 1 fiche

Work has been in progress to develop and evaluate potential backfill materials for use in a reactor waste repository. A carbonation and gas permeability test cell was set up to evaluate gaseous CO2/grout interactions and their effect on material properties. This report presents a preliminary geochemical evaluation of one grout mix developed at Ontario Hydro, with particular reference to the carbonation and gas permeability tests, carbonation-induced changes in material properties, and the effects of carbonation on radionuclide transport and water ingress properties.

Evaluation of compressed natural gas conversion systems

by T. Topaloglu. Toronto : Ministry of Transportation, Transportation Technology and Energy Branch, 1988. v, 54 p. : ill. Bibliogr.
MICROLOG 88-05859 1 fiche

In this report, the performance of commercial compressed natural gas (CNG) automotive conversion equipment is evaluated on the bases of fuel consumption, exhaust emissions, and acceleration performance results obtained in the Ministry of Transportation chassis dynamometer laboratory. The conversion systems were supplied by the Diversified Fuel Components and CNG Fuel Systems companies of Ontario and were installed on a 5-L spark-ignition engine in a Ford F-150 pickup truck, which was operated as a CNG/gasoline dual-fuel vehicle. Fuel consumption and exhaust emissions of carbon monoxide, hydro-carbons, and nitrogen oxides were measured on gasoline, before and after conversion, and on natural gas over urban and highway driving cycles, strictly according to Transport Canada guidelines and US Environmental Protection Agency regulations.

An Evaluation of crude oil supply in Saskatchewan

by J.N. Tanner. Calgary, Alta. : Canadian Energy Research Institute, 1987. xviii, 161 p. : ill. Bibliogr. (Study ; no. 25) ISBN 0-920522-44-0
MICROLOG 88-02039 1 fiche

The recent volatility of crude oil prices has raised concerns over the volume of oil which can be expected to be discovered in the various supply regions in Canada. This study focuses on the likely implication of crude oil volatility on future oil supply from Saskatchewan. The study constructed a model to help analyze the effects of price changes on established reserves, and also reserve additions from both new discoveries and extensions of older pools. The model uses the provincial well data base and research on the royalty rates, taxes, and operation costs in Saskatchewan to analyze the effects of price changes on established reserves, defined as short-run supply, over a 19-year period. The long-run analysis includes both current established reserves and reserves which are likely to be discovered in the future.

Evaluation of Drager tubes for moisture determination

by V.P. Singh. Toronto : Ontario Hydro, Research Division, 1987. i, 33 p. (Report ; no. 86-338-K)
MICROLOG 88-00133 1 fiche

The electrical power generators of Ontario Hydro use hydrogen gas which aids in their cooling. Specifications call for generator shutdown if the dew point (d.p.) exceeds a given value, typically -10 degrees Celsius. Present methods of dew point measurement suffer the disadvantages of requiring calibration and maintenance and these problems may be avoided with the use of Drager tubes. The objective of the present work was to test the Drager tubes for accuracy. The work commenced with a high range tube and was repeated when a low range tube became available. Gas of known water content was generated by mixing measured quantities of dry nitrogen and nitrogen saturated by passing through a bubbler. The generated dew point was checked with an optical chilled mirror hygrometer.

Evaluation of pull-out testing of epoxy coated dowels in concrete using grouts and epoxies

by H. Sedlak, K. Carter and L. Richards. Toronto : Engineering Materials Office, 1988. 13 p. : ill. (Materials information report ; MI-120) ISBN 0-7729-4236-6
MICROLOG 88-04707 1 fiche

Each year the Ministry of Transportation repairs a number of existing bridges with thin slab decks. The parapet walls and curbs on these structures are often replaced by barrier walls, anchored to the existing bridge decks with 15 M epoxy coated reinforcing bars spaced at 220 mm. Holes are drilled into the existing bridge decks and a suitable grout or epoxy is used to bond the epoxy coated rebars to the existing concrete. The minimum bridge deck thickness likely to be encountered when installing the new barrier walls is 150 mm. In order to maintain an adequate thickness of concrete beneath the bar, the smallest embedment length is estimated to be 125 mm. A minimum pull-out strength of 40 kN is specified. A list of bonding agents was requested that would meet this requirement. Six non-shrink proprietary grouts and five proprietary epoxies were tested for pull-out strength at various embedment lengths. The pull-out test was used to determine the minimum embedment length that would produce a minimum pull-out strength of at least 40 kN.

Evaluation of SMAW consumables for repair of weld-zone corrosion

by R.J. Brigham and V. Mitrovic-Scepanovic. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. i, 14 p. : ill. Bibliogr. (Report ; MTL 88-17(TR))
MICROLOG 88-02664 1 fiche

The Fleet System Branch of Canadian Coast Guard, Transport Canada, owns and maintains a large variety of ships which operate in Gulf and Arctic ice conditions. The ice transiting fleet has been experiencing preferential corrosion of weld metal and, with the introduction of higher strength E and EH grade steels, can anticipate accelerated heated-affected zone attack. This accelerated corrosion over a period of time requires recurring repairs throughout the operational life of an icebreaking ship. A project was initiated to identify the optimum welding consumables and welding parameters to repair corroded welds. The study included electrochemical and metallographic evaluation of three shipbuilding steels containing original submerged-arc weldments which were "repaired" with five different SMAW consumables at two heat input levels. The results of the complementary evaluation of the corrosion characteristics of the same welds are presented in this report.

An Evaluation of the feasibility of acoustic radar detection of icebergs in pack ice

prepared for Transportation Development Centre, Transport Canada ; by J.R. Marko. Sidney, B.C. : Arctic Sciences Ltd., 1987. xviii, 135 p. Bibliogr. *TP 8461E.*
MICROLOG 88-00309 2 fiche

Addresses the feasibility of using sound transmitted and reflected in the atmosphere to detect the presence of icebergs in the vicinity of a marine vessel or offshore platform, in the presence of sea ice or high sea-state conditions. Detection with conventional marine radar is highly uncertain because of the relatively higher per unit area radar cross-sections of the sea ice and sea surface relative to the icebergs of freshwater origin. Detection through atmospheric sound reflection would circumvent this "clutter" problem by offering return signals more or less directly proportional to the projection of the area of the reflecting object onto a plane normal to the insonifying beam. This approach was tested and transmission, reflection and noise data gathered during a series of temperate latitude field experiments.

Evaluation of the production of potassium phosphate fertilizer in eastern Canada

S.l. : Kilborn Ltd., 1988. 69 p. *CANMET contract: 7-9049'01-SQ.*
MICROLOG 88-05990 1 fiche

Examines a number of technologies to determine their potential for the production of potassium phosphate fertilizers in Atlantic Canada from New Brunswick potash, imported phosphate rock and a local source of sulphur. The processes were evaluated on the basis of their ability to meet the study objectives, commercial readiness or stage of development, commitment of the participating parties to the continued development and commercialization of their technology and the availability of sufficient technical and cost data to permit a valid evaluation to be made. Processes selected for further evaluation included the PCS/PECO High Temperature Melt Process; the PCS/PECO Ion Exchange Process; and the Pennsoil Process (two versions). Overall material balances, capital cost, operating cost and product revenue estimates were prepared for a facility with a capacity of 100 000 tonnes per year of monopotassium phosphate fertilizer and associated quantities of co-produced fertilizers, feed grade dicalcium phosphate and by-product hydrochloric acid.

Evaluation of trees and shrubs for oil sands reclamation : field trial results

Edmonton : Alberta Forestry, Lands and Wildlife, Forest Service, 1987. ix, 42 p. Bibliogr.
ISBN 0-86499-462-1
MICROLOG 88-03956 1 fiche

The Alberta Oil Sands Environmental Research Program Subproject VE 7.1 was initiated to select suitable tree and shrub species for use in revegetating spoils and tailings resulting from oil sand mining operations in northeastern Alberta. As part of this program three field trials were established in 1980 and 1981 to test one or more provenances (seed sources) of promising native and exotic woody species. The trial site was prepared to simulate oil sands reclamation situation and the resulting reconstructed soil was alkaline (pH 7.5), non-saline, and low in available nitrogen, phosphorus and potassium. No fertilizers were added. All species were outplanted as one- or two-year-old container stock. All seed used to rear the native species was collected from local populations in the oil sands region. In August 1986 the trials were assessed.

Evaluation of wheelchair loaders for personal vehicles

by J.M. Holden. Ottawa : Transportation Development Centre, 1987. xiv, 45 p. : ill. Bibliogr. *TP 8451.*
MICROLOG 88-00337 1 fiche

Disabled and elderly persons use wheelchairs and scooters to increase their mobility, but when they want to travel further than the short distances allowed by these methods, they often need to transport their mobility aid in an automobile but are unable or have difficulty loading it. This paper reports the results of a study to evaluate 5 loading devices: a back seat extension loader, a cartop carrier, a rear pumper chair carrier, a manual trunk loader and a truck crane lifter for an electric scooter. Eight consumers were recruited to represent a wide range of disabled persons and their family helpers. Body dimensions, strength and characteristics of disability were measured to describe these volunteers. Subjects tested each of the loading devices that they were able to operate while researcher-observers rated their performance. Measurements included the forces required to operate the devices and the space needed for parking. Loss of cargo

Evaluation of Wright and Wright Oil Film Monitor for detection of offshore chronic oil discharges

by F.W. Guptill. Ottawa : Environment Canada, Environmental Protection Directorate, 1988. iii, 71 p. : ill. Bibliogr. (Report ; EE-98)
MICROLOG 88-03003 1 fiche

A Wright and Wright model DX250 Oil Film Monitor was procured, modified and installed aboard a semi-submersible drilling rig. The modifications included, in part, the connection of a micro-computer to the Oil Film Monitor for the purpose of processing and recording signals internal to the instrument during the experiment. The instrument was evaluated for its suitability as a sensor of chronic or low level oil discharges from an offshore rig. Recommendations are given for further development.

Evaluation study of the Inland Waters Directorate data base for total cyanide measurements in western Canada, 1974-83, and the analytical methodology used to derive this data base

by A.W. Maynard, P.M. Chapman and S.F. Cross. Regina : Environment Canada, 1986. v, 134 p. : ill. Bibliogr. *CSI 21111.214.*
MICROLOG 88-04745 2 fiche

Cyanide-containing compounds occur throughout the environment and may be attributed to both natural and man-made sources. Measurements of 'total cyanide' values in surface waters in Manitoba, Saskatchewan, Alberta and the Northwest Territories from 1974 to 1983 were made. The present study reviewed these data to determine patterns and trends, to evaluate the analytical methodology used to produce these data, to determine the ecotoxicological significance of these data, and to provide recommendations related to future methods of analysis and geograpic areas of potential concern.

Une Evaluation sur microprocesseur du traitement des eaux usées révèle les avantages de l'automatisation

Burlington, Ont. : Environnement Canada, Centre technique des eaux usées, 1988. 3, 3 p. (Techniques environmentales : notes) *Bilingue (Process audits reveal...).*
MICROLOG 88-04801 1 fiche

L'aération, ou approvisionnement en oxygène, fait généralement partie du traitement biologique des eaux usées industrielles et urbaines. Le Centre technique des eaux usées a mis au point un projet visant à démontrer que l'instrumentation reliée en direct et les ordinateurs peuvent être intégrés en vue de commander le procédé d'aération par automatisation. Le projet avait comme objectifs d'illustrer les économies d'énergie en comparant la commande automatisée et la commande manuelle du système d'aération, de faire la preuve d'un meilleur fonctionnement et de déterminer l'entretien requis de l'instrumentation reliée en direct à l'ordinateur et l'instrumentation de commande. Ce document fournit un résumé des résultats de la recherche.

An Evaluation under the Environmental Assessment Act of selected construction projects in northwestern Ontario, 1986

by J.W. Parks. Toronto : Ontario Ministry of the Environment, Northwestern Region, Special Projects Section, 1987. 31 p. : ill., maps.
ISBN 0-7729-2504-6
MICROLOG 88-01141 1 fiche

As a continuation of a program initiated in 1985, a number of projects in northwestern Ontario that were being conducted under the auspices of the Environmental Assessment Act were selected for site inspections in 1986. These inspections, or audits, were designed to evaluate the degree to which the projects complied with the requirements of the Environmental Assessment Act. Inspections in 1986 were intensified to confirm, extend and where possible clarify the findings of the 1985 study. Construction activities selected for inspection were chosen on the basis of the potential to adversely affect the natural environment. These projects included dam repairs, road construction, bridge construction, bridge painting, and building erection. Most activities received more than one inspection, and in some cases of on-going construction, multiple visits were undertaken. Contact with the proponent was made prior to inspection in most cases. Photographs of the various projects are included.

The Evolution of poverty in Canada, 1970-1985

by P. Perron and F. Vaillancourt. Ottawa : Economic Council of Canada, 1988. ix, 71 p. Bibliogr. (Discussion paper ; no. 343) *CSI 22215.204.* ISSN 0225-8013
MICROLOG 88-02330 1 fiche (Available on fiche only)

During the period 1971-1981 Canada experienced a decline in levels of poverty, an increase during 1981-1984 and then another decline in 1985. This paper presents explanations of this pattern by analyzing the data used and discussing the issue of poverty to understand where levels are set to determine poverty lines. Discusses the evolution of poverty in Canada in reference to the American statistical modeling technique (Gottshalk and Danzinger-1985), in order to examine the relationship between changes in the distribution of income and poverty. Analyses the separate changes in poverty in a given period due to changes in mean market income, mean transfer income and inequality. Also models the determinants of poverty over the 1971-1981 period, across Canada's five regions.

Evolution of the Iron Mask batholith and its associated copper mineralization

by Y.T.J. Kwong. Victoria : Province of British Columbia, Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1987. v, 55 p. : ill., maps. Bibliogr. (Bulletin ; 77) *Fold maps not filmed.* ISBN 0-7718-8603-9
MICROLOG 88-02171 1 fiche

The Iron Mask batholith is one of several large alkaline intrusions in the Intermontane Belt that contain porphyry copper deposits. At this time, Afton mine is the only major copper-gold producer located within the batholith. This bulletin is a synthesis of studies completed to date on the Iron Mask batholith and the Afton deposit. Emphasis is placed on geochemical and mineralogical aspects of the batholith and the copper-gold deposit, that shed light on their derivation and evolution. Through theoretical modelling with pertinent thermodynamic data, the unique superene alteration features of the Afton orebody are explained. Applications of the major findings of this study are briefly discussed with respect to other copper-gold occurrences in the batholith.

An Exact algorithm for minimizing delivery and operating costs in depot location

Montreal : Université de Montréal, Centre de recherche sur les transports, 1979. 20 p. : ill. Bibliogr. (Publication ; no. 146)
MICROLOG 88-06422 1 fiche

The problem of locating a single depot among n points is considered. The objective is to minimize the sum of depot operating cost and delivery cost. The best depot location is found by means of an exact algorithm that determines simultaneously both the best depot location and the associated optimal delivery routes. A global integer programming formulation of the problem is given; the model is solved by relaxing most of its constraints and by introducing them only when they are violated. Two versions of the algorithm have been applied successfully to random problems ranging from 20 to 50 points.

Commission canadienne des droits de la personne. Ottawa : la Commission, 1985. 45, 44 p. *Bilingue (Bona fide occupational...)*.
MICROLOG 88-05188 2 fiche

Les modifications apportées à la Loi canadienne sur les droits de la personne, proclamées le 1er juillet 1983, étendent la portée de la protection contre la discrimination à toutes les personnes atteintes d'une déficience. La Commission reconnaît l'importance d'établir des énoncés de principe sur les exigences professionnels justifiées et sur les motifs justifiables étant donné qu'ils assurent un mécanisme permettant d'établir l'équilibre entre les droits des individus et le droit de l'employeur d'avoir des employés efficaces. Ce document traite de l'élaboration d'une politique, des conditions nécessaires pour établir l'existence d'une exigence professionnelles justifiées, des pratiques qui ne sont pas fondées sur une exigence professionnelle justifiée, ainsi que des énoncés de principes sur les motifs justifiables.

Expected completion time in PERT networks

by P. Robillard and M. Trahan. Montreal : Université de Montréal, Centre de recherche sur les transports, 1974. 16 p. Bibliogr. (Publication ; no. 3) (Publication ; no 167)
MICROLOG 88-06294 1 fiche

During the past several years, new techniques based on network models have been developed to aid management in planning and controlling projects. The PERT technique has received widespread interest, but the evaluation of the expected completion time of a project still sets problems when the activity durations are random variables. This note describes a general approach to obtain lower bounds to the expected completion time. The approach shows that the CPM's and the Fulkerson's bounds, among others, can be derived directly from this approach. It is assumed that the activity durations, discrete or continuous, have a finite positive range and that the set of activity durations directed into a node is independent from the set of activity durations directed into another node. The basic PERT technique is outlined with its graphical representation, relevent notation and definitions.

The Experience of the rape victim with the criminal justice system prior to Bill C-127

by M.G. Stanley. Ottawa : Dept. of Justice, Communications and Public Affairs, 1987. xxi, 150 p. Bibliogr. *At head of title: Sexual assault legislation in Canada : an evaluation.*
MICROLOG 88-03970 2 fiche

This paper documents and analyses the experience of rape victims within the Canadian criminal justice system prior to the enactment on January 3, 1983, of Bill C-127, a bill to amend the Criminal Code. Presents a brief historical overview of the rape laws in ancient societies, and their present development. Explores the police processing of rape complaints and the filtering of rape complaints as either founded or unfounded cases. Discusses the special rules and conventions developed by the law in dealing with cases of rape. The issues of convictions and sentencing are discussed, along with a presentation of data showing conviction rates for rape, and a brief overview of the rapist in the penitentiary, and his likelihood of rehabilitation.

An Experiment in fibreglassing a wooden inshore fishing vessel

by J.S. Dominic. St. John's : Canada, Dept. of Fisheries and Oceans, Newfoundland Region, Fisheries and Habitat Management, 1987. v, 34 p. : ill. Bibliogr.
MICROLOG 88-03566 1 fiche

If the effective working life of a fishing vessel can be safely and economically extended by fibreglassing, the value of this low cost alternative to vessel replacement could be immense. The vessel to be fibreglassed was built in 1957 and used primarily for crab fishing. The only work done on it has been annual maintenance. This report gives details of the fibreglassing operation, application of the fibreglass skin, testing of samples, inspection of the vessel after the procedure, and an inclining experiment.

Experimental flying squid fishing off British Columbia, 1985 and 1986

by G.S. Jamieson and G.D. Heritage Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. iii, 103 p. Bibliogr. (Canadian industry report of fisheries and aquatic sciences ; no. 179) ISSN 0704-3694
MICROLOG 88-00687 2 fiche

In 1985 and 1986 experimental fishing for flying squid was conducted from Japanese and Canadian vessels in eastern Pacific Ocean waters off the coast of British Columbia. In each year, the objectives were to determine the harvest rates over the course of the fishing season, the effect of squid migration on the location of the fishery, the consistency of the bycatch species mix over time, and the biological characteristics of the major species caught. This report describes daily fishing results and presents a general analysis of the data. It does not include detailed biological information on the species caught nor an interpretive analysis of fishing in relation to observed oceanographic parameters.

Experimental use of female sperm in the production of monosex female stocks of chinook salmon *Oncorhynchus tshawytscha* at commercial fish farms

by I.I. Solar, I.J. Baker and E.M. Donaldson. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, West Vancouver Laboratory, 1987. iv, 14 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1552) ISSN 0706-6457
MICROLOG 88-02183 1 fiche

The control of sex differentiation in salmonids, with the purpose of producing sterile all-female stocks, is one of the major goals in the commercial mariculture of Pacific salmon. Experimental batches of milt, containing only female spermatozoa obtained by hormonal masculinization of genotypic chinook salmon females, have been made available to the mariculture industry in British Columbia since 1983. Twenty-one phenotypic males, having a female genotype, were used in the experiment in the fall of 1985. The sperm, collected by repeated manual stripping over a period of 25 days, was used to fertilize normal ova from sea-run and captive chinook brookstock at 7 salmon farms and at the Capilano River Hatchery. Quantitative and statistical analysis of sperm production included frequency of milt collection, volume of milt produced, periodic determination of speratocrit and subjective evaluation of sperm mobility. The fertility of the sperm was determined by survival of eggs to the eyed stage.

L'Exploitation d'émissions de télévision et la problématique des droits de reprise : le cas du Québec

par G.-C. Saint-Gelais. Québec : Ministère des communication, Direction des communication. 1987. 102 p. ISBN 2-550-17472-0
MICROLOG 88-01294 2 fiche

Cette étude présente une analyse de l'industrie de la production d'émissions de télévision de langue francaise au Québec. La principale problématique étudiée est celle des droits de reprise: constituent-ils un obstacle à l'exportation des émissions? La première partie de l'étude se penche sur les conditions de base et la structure de l'industrie. La seconde partie se penche spécifiquement sur la problématique des droits de reprise. La seconde partie de cette étude expose d'abord le point de vue de chacune des parties concernées: les producteurs, les diffuseurs et les distributeurs d'une part; les associations représentant les ayant droit d'autre part. De plus, les mécanismes régissant le calcul des droits de suite sonts présentés en détail. L'étude se termine par un exercice de simulation de ventes à l'étranger qui apporte un éclairage objectif sur la question.

Exploring the circle : a journey into Native children's mental health

by M. Armstrong. Edmonton : Dept. of Social Services and Community Health, 1986. vi, 47 p. : ill. Bibliogr.
MICROLOG 88-02766 1 fiche

This document explores the Sacred Circle and the essence of Native tradition as it relates to Native children who struggle with their experiences. The Circle refers to the spiritual, emotional, mental and physical sphere of development that guides a Native child. This report, in its recommendations for a Native-directed program for mental health services, emphasizes the necessity of correlating services to this model of the Circle. Draws upon the earlier document Expanding the Circle: A Community Approach to Children's Mental Health (published in August 1986) and examines guidelines from the issues of Native development raised in the earlier document. Includes an analysis of mental health services currently available in Alberta.

The Explosibility of dusts from three sulphide ore concentrates

by K.J. Mintz. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iv, 26 p. Bibliogr. (Report ; MRL 88-54(TR))
MICROLOG 88-05525 1 fiche

During the past year, Noranda Research and CANMET have been carrying out a joint study of the explosibility of sulphide ore dusts, because of the increased awareness of their hazards in underground mines. Noranda Research extended this work to cover the dust explosibility of chalcopyrite concentrates in order to evaluate the hazards of drying and air conveying. Two sets of samples for three Canadian mines were sent by Noranda Research. This report provides the results of testing for the maximum explosion pressure/maximum rate of pressure rise, the minimum explosible concentration, and the minimum ignition temperature.

An Explosion suppression system for rail tank cars and other containers holding pressurized liquids : mechanical design study

prepared for Transportation Development Centre ; prepared by Davis Engineering Limited. Ottawa : Davis Engineering, 1986. 74 p. : ill.
MICROLOG 88-00483 2 fiche

Study for the feasibility of an internal thermal protection device for a rail tank car in three parts, covering structural design analysis, operations and fabrication. The structural analysis was undertaken using a finite element stress analysis computer code with a variety of loads applied to the model. The sloshing analysis was performed with the aid of a two dimensional finite difference computer code for the motion of fluids with free surfaces, then the code was used to calculate fluid pressures exerted on the walls of the internal shell and external tank for several fill conditions. The maintenance and operations section reviewed existing procedures regarding tank loading and unloading, in-transit operations, changing commodities, cleaning, inspection and repairs. The impacts on these procedures caused by the internal protection device were examined, and possible changes to accommodate the internal shell were proposed.

Exporter cooperation in the world grain trade

by R.J. MacGregor. Ottawa : Agriculture Canada, Policy Branch, 1988. viii, 58 p. : ill. Bibliogr. (Working paper : 3/88)
MICROLOG 88-04134 1 fiche

The fundamental cause of low world grain prices is the domestic sector support provided by most major grain importers and exporters. An analysis was carried out to see if a combined effort by Canada, the US, the EC, Australia and Argentina could reduce the surplus stocks in an effective manner. In each country 10 percent of grain land is assumed to be taken out of production and US export subsidies eliminated. Over a five year period surplus stocks are released and land is returned to production so as to achieve a long run equilibrium US farm price for wheat of $4.00/bu and of corn $2.80/bu (in Canadian dollars), roughly in line with prices received in the 1984-85 period. All other policies in all countries are left in place. The world and US impacts are determined with the FAPRI model and Canadian impacts are determined using three quantitative models at Agriculture Canada, with the current medium term forecast used as the comparative baseline. An important objective is to assess the ability of the Canadian models to address a single trade policy issue in an integrated fashion.

Extraction of logical relations and duality gap

by B. Jaumard and F. Soumis. Montréal : Université de Montréal, Centre de recherche sur les transports, 1988. 22 p. Bibliogr. (Publication ; no 458-A)
MICROLOG 88-02271 1 fiche

Studies the determination of the permanent of a system of 0-1 linear constraints, i.e. the set of variables with a fixed value in every feasible solution. In the case of variables with a fixed value, the efficiency of the method depends on the value of the duality gap of an optimization problem deduced from the system of constraints. Illustrates the results obtained on a voting confidentiality problem, formulated either as an extension of a generalised assignment problem, or as a partitioning problem. Shows that the number of variables of the permanent changes and that the differences can be explained in terms of a duality gap.

Fabrication and evaluation of welded joint structures in marine environments, phase I : final report

by M.J. Pates...et al. S.l. : AMCA International Research and Technology Center, 1988. ii, 210 p. Bibliogr. *CANMET contract: OSQ83-00282.*
MICROLOG 88-05983 3 fiche

Potential drop techniques were used to detect the early stages of crack development and to size fatigue cracks in plate-to-plate welded T-joints. The data was used to assess the influence that stress amplitude, plate thickness and environment have on fatigue crack initiation and propagation. Statistical techniques were used to interpret the data. A pipe-to-plate specimen was developed to model the fatigue behaviour of welded T-tubular joints and potential drop techniques were used to monitor crack development in pipe-plate specimens, then compared with similar data for T-tubular and T-plate joints. Crack growth rates were used to derive empirical stress intensity factors for comparison with like data published for various tubular configurations.

Fabrication and testing of reduced-scale superconducting magnets

by A.A. Fife. Port Coquitlam, B.C. : CTF Systems Inc., 1986. xv, 46, 17 p. : ill. Bibliogr. *TP 7949E.*
MICROLOG 88-00306 1 fiche

Research on the Canadian Maglev program has been ongoing during the past decade. The technology most suited to Canadian winters is the electrodynamic or EDS mode, using cryocooled superconducting magnets both to levitate and propel the vehicles at velocities up to 450 km/h. This report presents the results of research into procedures for impregnation of tightly wound coils of both solenoidal and racetrack geometries with suitable cryogenic grade epoxies; fabrication of superconducting coils using the established impregnation procedures; establishment of a facility for testing the fabricated superconducting coils, including a suitable cryogenic test dewar and insert, a high current power supply and suitable magnetic field measuring equipment; evaluation of the near-term spin-off benefits of the superconducting magnet and cryocooler technologies; and the outline of a long range plan for development of the cryogenic components.

Fabrication of shielded metal arc weldments : final report

by M.J. Pates and G. Proulx. Kanata, Ont. : AMCA International, 1986. 120 p. : ill. *CANMET contract: OSQ83-00281.*
MICROLOG 88-03130 2 fiche

As part of the federal government's program on materials for offshore structures, evaluations of currently available welding consumables suitable for the welding of carbon-manganese steels designed for used in the offshore and the Arctic environments were done. This report presents the results of a series of full fusion butt joints welded using steel meeting the CSA G40.21 -350 WT specification in the vertical-up position with a number of different welding electrodes using the shielded metal arc welding process in thicknesses of 20mm and 40mm. In addition, a total of 32 tee butt joints were fabricated in both CSA G40.21 -350 WT and Lloyds Grade 60 in thicknesses ranging from 15mm through 100mm for use in corrosion fatigue evaluation program. These joints were welded in the vertical-up position, employing techniques similar to those used in equivalent European test programs.

Falcon Beach School closure review

Winnipeg : Manitoba Education, Planning and Research Branch, 1987. ii, 50 p. (Research : a report of the Planning and Research Branch, Manitoba Education : 87-01)
ISBN 0-7711-0656-4
MICROLOG 88-00673 1 fiche

Falcon Beach is a small school that, while experiencing a steady decline in enrolment since 1960 has also experienced an increase in operational costs. This report studies the economic and social impact of the recommendation to close the school. Issues considered are the decreasing number of small schools in operation; the Department's support of small schools; includes parents' concerns about bussing, the business community's outmigration and resale values; relocating of qualified personnel; the effect on the vitality of the community and the teacher's employment concerns, and the effect on the children.

Fall migration and staging of phalaropes and other waterbirds in the vicinity of Nunaluk Spit, Yukon Territory, 1987

by D.M. Ealey, S.A. Alexander and B. Croft. Ottawa : Canadian Wildlife Service, Western and Northern Region, 1988. ix, 69 p. : maps. Bibliogr. (Technical report series ; no. 41)
ISSN 0831-6481 ISBN 0-662-16204-8
MICROLOG 88-04788 1 fiche

Pre-migratory and migratory activities of birds in the vicinity of Nunaluk Spit, were monitored from 27 July to 2 September, 1987, as part of a broader investigation of key areas for birds in coastal regions of the Canadian Beaufort Sea. Passage rates were determined for birds flying past an observation post located on the spit. Ground surveys were regularly conducted along 10 km of the spit, and aerial surveys were conducted along the Yukon Territory coastline. Habitat use and distribution of waterbirds and shorebirds, particularly phalaropes, were documented from those surveys. Changes in the passage rate and staging were analyzed in relation to wind and habitat conditions, primarily for phalaropes. Past records for phalaropes in the Nunaluk Spit area are compared with 1987 results. Phalarope staging ecology is discussed in relation to other studies made along the Beaufort Sea coast.

The Family in Canada : a support system for the elderly

by V. Krishnan. Edmonton : University of Alberta, Dept. of Sociology, 1987. 28 p. Bibliogr. (Research discussion paper ; no. 47) ISSN 0317-2473
MICROLOG 88-02175 1 fiche

Throughout Western society, the socio-economic changes have accelerated in recent decades resulting in a dramatic increase in the average span of life. These changes which have accompanied industrialization and urbanization have affected the relationships among family members, irrespective of their culture. This paper explores the widespread notion of the family's historical decline as an important supportive institution in the environment of older people. This is intended to provide additional insights on the extent to which the family can serve as an effective channel for the social and economic support of aged Canadians. The data are from a 1984 national probability survey of 5315 women.

Farm workers and worktime provisions of Ontario's Employment Standards Act

by J. Kinley. Toronto : Ontario Task Force on Hours of Work and Overtime, 1987. 76 p. Bibliogr. *At head of title: Research report. CSI 56232.203.*
MICROLOG 88-06105 1 fiche

Ontario's Employment Standards Act is intended to protect workers who have little bargaining power from having to accept excessively low wages, long hours and other unsatisfactory conditions of employment. Hired farm workers are generally excluded from the protection of the standards. This report deals with employment standards (maximum daily and weekly hours of work, premium pay for overtime hours, observance and payment of public holidays, paid vacations) that directly influence time worked and identifies and evaluates the rationale for denying farm employees coverage under worktime standards. Issues are identified and assessed in discussions of the agricultural activities influencing time worked, the farm work force, hours and other worktime practices, and the scope of the exemptions from the standards. Worker protection legislation in other jurisdictions and its application to agriculture is compared to the Ontario position and findings are derived about the need for worktime

Fatigue crack growth prediction methods for variable amplitude loading : a review

by F.G. Hamel and J. Masounave. Boucherville, Quebec : National Research Council Canada, Industrial Materials Research Institute, 1988. 32 p. : ill. Bibliogr.
MICROLOG 88-04481 1 fiche (Available on fiche only)

Considerable data on fatigue properties of materials under constant amplitude loading is available in the literature under the forms representative of the different aspects of the fatigue phenomenon. To employ these data, the design engineer must adapt it to the particular service conditions that he is concerned with. The stress vs. life or S-N curve is largely related to the fatigue initiation behaviour of materials and defines the endurance limit which is used for design. The strain-life curve is of more recent origin and relates the elastic and plastic strain amplitudes to the initiation life. Fatigue propagation data are presented on a crack growth rate vs. stress intensity factor range diagram.

Fatigue performance of repaired tubular joints

by P.J. Tubby. Cambridge, UK : Welding Institute, 1987. 155 p. : ill. Bibliogr. *CANMET contract: UKL84-1059-01.*
MICROLOG 88-03143 2 fiche

The vast majority of fixed and mobile offshore structures are fabricated from tubular steel members which possess a high strength to weight ratio and provide a minimum restriction to the flow of water around the member. However, fatigue cracking can occur at the joints under the arduous conditions which can exist offshore. This report describes a series of fatigue tests on welded tubular T joints in steel in which fatigue cracks were repaired by a number of alternative methods. A ranking for the repair methods in terms of residual fatigue performance was established, as well as the necessity to repair the entire joint, or only the cracked region. The joints were tested in out-of-plane bending.

Feasibility of an accessible longer intercity bus

prepared for Transportation Development Centre, by Pierre Asselin and Ed Sloot. Montreal : Beauchemin-Beaton-Lapointe Inc. in association with TES Limited, 1986. ix, 41 p. : ill. *TP 8233E. French ed. (Faisabilité d'un autobus...)on the same fiche.*
MICROLOG 88-00346 2 fiche

Evaluates the feasibility of developing a longer intercity bus, based on current Canadian designs, with improved accessibility for disabled travellers. The design should provide accommodation for two passengers in wheelchairs, while maintaining the seating and baggage capacity of a standard bus. Technical feasibility, provincial regulatory constraints, operational considerations and economics are investigated. Technical evaluation covers overall dimensions, weight increase and distribution, structural feasbility and the incorporation of a suitable access device. Impacts on a carrier's operation and on road construction and maintenance costs are assessed, and costs are estimated for development and construction of a prototype and for production.

Feasibility of energy recovery from waste for Alberta

by N.M. Cochran. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1987. vii, 61, 13 p. Bibliogr. ISBN 0-88654-174-3
MICROLOG 88-00218 1 fiche

Study examing the economic ramifications of waste incineration with and without energy recovery in facilities of up to 100 tons per day, in a context relevant to Alberta. A financial model was created to analyze key economic factors such as interest rates, the size of the waste stream, the type of energy to be generated, and prices of equivalent energy. The report also presents the results of a literature search on waste incineration and energy recovery; environmental aspects; a survey of current waste-to-energy systems operating in North America, conducted via a questionnaire sent to known operating North American waste incineration facilities; and costs, revenues, and other factors in the economy which have an impact on the future of waste incineration and energy recovery.

Feasibility study : artificial recharge in the Prairie provinces : volume I

by V. Wasiuta. Saskatoon, Sask. Environment Canada, Ground Water Division, National Hydrology Research Institute, 1988. ii, 77 p. : maps. Bibliogr. (NHRI contribution ; no. 87007) ISSN 0838-1992
MICROLOG 88-06272 1 fiche

Assessment of the feasibility of using stream water to artificially recharge aquifers in the Prairie provinces by examining the percentage of stream flow that occurs as flood flow, the location of major aquifers, the quality of stream water, and the quality of aquifer water. Stream discharge records of major rivers were examined and study site locations were chosen to give good geographical coverage of the populated regions of Alberta, Saskatchewan, and Manitoba. Continuous records from 12 gauging stations on 7 major rivers were examined, as well as the flow records of 2 minor tributaries. For each gauging station, 4 years were chosen (extremely high total discharge, extremely low total discharge, and 2 years with intermediate total discharge). For 2 stations, records from 11 and 12-year periods were also examined. The percentage of flood flow was calculated for every station for each of the years, with the base flow component distinguished from the flood flow using a graphic method.

1467) ISSN 0706-6570
MICROLOG 88-03991 1 fiche

La fécondité du maquereau bleu a été estimée à partir des ovaires de 214 poissons recueillis dans le golfe du Saint-Laurent au cours des années 1982-1985. La fécondité varie entre 87 750 et 1 610 000 oeufs par femelle. Les relations entre la fécondité et le poids des ovaires, la longueur, l'âge et le poids du poisson sont décrites dans ce document. L'équation de la relation entre la fécondité et les poids des ovaires de maquereaux sur le point de pondre est retenue comme le meilleur outil de prédiction de la fécondité. Les résultats des 4 années d'échantillonnage mettent en évidence des variations temporelles de la fécondité entre les années ainsi qu'au cours d'une même saison de fraie.

Federal and provincial support to post-secondary education in Canada : a report to Parliament, 1986-87

Ottawa : Dept. of the Secretary of State of Canada, 1988. ii, 132, ii, 144 p. : ill. *Bilingual (Aide fédérale et provinciale...). CSI 21120.005.* ISBN 0-662-55862-6
MICROLOG 88-04674 4 fiche

This annual report describes post-secondary education financing, federal programs of support to, or involvement in post-secondary education, the relationship between such federal contributions, transfers and programs and Canada's educational and economic goals. It describes the results of consultations by or on behalf of the Secretary of State of Canada with the Council of Ministers of Education relating to the definition of national purposes and the means by which those purposes will be achieved. The report also identifies areas in which the views of provincial/territorial governments are significantly different from those represented by federal legislation.

The Federal goverment's role in education, especially the post-secondary sector

by M. Leman. Ottawa : Library of Parliament, 1986. 37 p. Bibliogr. (Background paper for Parliament ; BP-140E) *French ed. (Le rôle du gouvernement...) on the same fiche.* ISBN 0-660-12433-5
MICROLOG 88-00709 1 fiche

Control for education is usually thought to rest in the hands of provincial governments yet the federal government is increasingly involved in educational matters due to its responsibility for educating special interest groups such as Indians, military personnel and inmates. Also, with the growth of the concept of education to include activities other than the typical classroom setting, such as radio, educational television, libraries, museums, the federal government's role in education has also increased, especially in its role of supporting culture. This report studies the nature of federal activities in education and initiatives at the post-secondary level, with attention also on official language programs support. Also discusses limits of federal jurisdiction over education.

Field assessment of inverted humus mounds produced by three site preparation implements in north central British Columbia

by I.B. Hedin. S.l. : Forest Research Development Agreement, 1987. vi, 38 p. : ill. Bibliogr. (FRDA report ; 008) (FERIC special report ; no. SR-44) *On cover: Canada-British Columbia Economic and Regional Development Agreement.* ISSN 0835-0752 ISBN 0-7718-8596-2
MICROLOG 88-03807 1 fiche

A series of site-preparation trials was established, located in 4 areas, consisting of mechanical, herbicide, and fertilizer treatments. Field assessments of inverted humus mounds produced by the Sinkkila HMF scarifier, MOFL mounder, and Bracke mounders were used on the locations in northern British Columbia. Results for each machine and location were measured in September 1986 for mineral capping, height, length and width.

A Field evaluation of polypropylene fibers in latex modified shotcrete

by R.M. Rollings. Toronto : Engineering Materials Office, 1988. 5 p. (Materials information report ; MI-122) ISBN 0-7729-4450-4
MICROLOG 88-06010 1 fiche

Latex modified shotcrete is commonly used to repair bridge substructures that have scaled, spalled and/or delaminated areas. Generally, the performance of the shotcrete is adequate, however, shrinkage cracking often occurs. Fibrillated polypropylene fibres addition to shotcrete will significantly reduce shrinkage cracking and permeability with no adverse effects on other properties. To determine the validity of these claims and examine the potential benefits of polypropylene fibres, a limited field trial was carried out. A small section (approximately 10 m3 in area) on a bridge pier was repaired using latex modified shotcrete with fibre added and the adjacent area was done without fibres.

Field exposure and biological effects of grain farmers during carbofuran application for grasshopper control

by K. Yoshida, D. Johnston. Effects of roadside application of carbofuran on nesting Brewer's blackbirds by L.P. Horstman and T.E. Cole. Effects of Carbofuran on unconfined small mammal populations in southern Alberta by L.M. Brusnyk and D.A. Westworth. Edmonton : Alberta Agriculture, Crop Protection Branch, 1987. vi, 165 p. Bibliogr.
MICROLOG 88-01915 2 fiche

This document records the experiments conducted measuring the biological effects of carbofuran used in grasshopper control, on farmers, blackbirds and small mammal populations in Alberta. During the June-July period of 1986 in southern Alberta, eight farmers were selected as exposure subjects and were monitored for occupational exposure to carbofuran (Furadan 480F) and subsequent intoxification while they were engaged in the routine operation of mixing, loading and spraying of insecticide to control the stage of grasshopper infestation. Blackbirds were examined for the effects on nesting success and nestling growth after exposure to Furadan 480 Flowable applied by ground spray vehicle. Small mammals were trapped and the effects of the spraying program on survival and reproductive characteristics were studied. These papers present the results of the findings of these tests.

Field stresses at the Kidd Creek mine, Timmins

by B. Arjang. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. iii, 13 p. : ill. Bibliogr. (Report ; MRL 87-142(TR))
MICROLOG 88-03388 1 fiche

The Kidd Creek Mine is situated 27 km north of Timmins within the Abitibi Greenstone Belt. In 1972, a cooperative rock mechanics research project was initiated to evaluate ground stability and to contribute to the mining design, conducted by extensive geotechnical and analytical studies on the open pit and around the underground stopes. These studies were continued as the mining progressed in depth. As a continuation of the stress determination program, stress measurements were recently carried out on the 2400 (732 m) and 4600 (1382 m) levels. This report provides the results and incorporates the previous stress data obtained at the mine.

Field testing various seedling container types in New Brunswick

Fredericton : Dept. of Forests, Mines and Energy, Timber Management Branch, 1986. 9 p. (Technique ; 86:16)
MICROLOG 88-01904 1 fiche

Over the past decade the original system of reforestation utilizing bare root stock has, in large part, given way to containerized systems in the Crown land planting program. This trial was conducted to determine the relative success of various container types on a variety of scarified sites which includes full tree logging sites. The Dept. supplied the seed for the tests and the seed and seedlings originate from the same seed lots. Species being tested are black spruce, white spruce and jack pine. Survival and heights were recorded in fall 1984 for plantations planted prior to summer 1984.

(WFPP) for Saskatchewan (Coronach) lignite and heavy residues from a bitumen-coal mixture. Some pyrolysis tests were also carried out with the fluid bed sand normally used replaced by a catalyst. A second program was carried out in the bench scale continuous fluid bed unit to evaluate the flash pyrolysis behaviour of heavy residues, specifically those produced from the CANMET coprocessing pilot plant, which is designed to liquefy bitumen-coal mixtures. The principal objectives of pyrolysis tests with lignite were to establish the optimum processing condition for maximum liquid yields, to assess the quality of the liquid product from raw coal or acid-washed coal, and to determine if the liquid quality could be affected favorably by use of a catalyst in the fluid bed. The major objective of pyrolysis tests on coprocesing residues was to assess whether a reasonable yield of a fluid oil was obtainable, together with a dry coke of acceptable properties.

Final report : harvesting non-merchantable stands for energy conversion

Shannon, N.B. : Canada-New Brunswick Conservation and Alternative Energy Agreement, 1987. 39 p. : ill.
MICROLOG 88-04694 1 fiche

The project was designed to identify the costs of production and the methodology for harvesting non-merchantable stands on small freehold forests. The area chosen is representative of hundreds of hectares of budworm-damaged forest particularly in southern New Brunswick. The project site is part of the land owned by McCrea Farms Ltd. at Shannon, Queen County and has a well-developed road system as an essential of a resource management plan. The report determined the costs of harvesting, processing and delivering chipped non-merchantable wood for conversion into energy; established the efficient combination of manual and mechanical elements for economic production; and determined the resultant economic benefits respecting reforestation of the harvest area.

An investigation of the indoor air quality, air tightness and air infiltration rates of a random sample of 78 houses in Winnipeg was conducted in the summer and fall of 1987. The sample consisted entirely of single detached dwellings. In addition to the above measurements, the physical characteristics of each house were recorded, along with information on occupant behaviour and attitude towards indoor air quality. Indoor air quality was determined by measuring carbon dioxide, carbon monoxide, formaldehyde, radon, ozone and respirable suspended particulates at 3 locations in the home. Air tightness was measured by the fan depressurization method. Intentional openings, which include chimneys, flues, intake and exhaust ports, floor drains and sumps, were left open.

Final report, 1986-1988 : development of a method for upgrading particulate coal

by B.Y.H. Wong...et al. Devon, Alta. : Gulf Canada Resources Limited, Coal Research Program, 1988. 86 p. : ill. *CANMET contract: 69048-01-SQ.*
MICROLOG 88-06069 1 fiche

Report describing work performed during 1986-88 on an upgrading method under development by Gulf, consisting of drying low rank coals to below their equilibrium moisture, and treating the dried coals with petroleum residua in a controlled manner. A fixed amount of residuum is injected onto coal particles while they are being dried in a drum dryer, and has been demonstrated at the Obed Mountain Coal Company at feed rates up to 150 tonnes/hour, using a conventional BETA-400 Dryer Mixer Plant. In addition the stability of upgraded product was also investigated. Residua were applied in both the neat form and in the form of an emulsion and products were compared with those from the immersion method. A conceptual design and capital estimate, and a process cost review is also given.

Les Finances des municipalités de l'Ontario, 1985

Toronto : Ministère des affaires municipales de l'Ontario, 1987. xvii, 172 p. ISSN 0704-2906
MICROLOG 88-01244 2 fiche

Cette publication s'appuie sur les rapports d'information financière envoyés chaque année par toutes les municipalités de l'Ontario au ministère des Affaires municipales. Les données sont présentées par fonds, puisque les municipalités doivent déclarer leur situation financière selon ce mode de comptabilisation. Les chiffres consolidés sont établis en additionnant les opérations des fonds d'administration générale et de capital et en soustrayant les transferts interfonds au sein d'une municipalité. Les tableaux présentent les résultats globaux des administrations locales; l'analyse des mouvements du fonds d'administration générale des municipalités et du fonds de capital; les réserves et fonds de reserves; les impôts fonciers; les dettes à long terme; et la situation en fin d'exercice.

A Finite element study of residual stresses in a welded T-joint specimen : final report

by D.H.B. Mok and R.J. Pick. Waterloo, Ont. : University of Waterloo, Dept. of Mechanical Engineering, 1988. 2 v. : ill. *CANMET contract: 69168-01-ST.*
MICROLOG 88-06401 5 fiche

As part of a study of the fatigue of offshore steel structures in Canada, a series of T-joint specimens were used to study crack shape development and thickness effects under fatigue loading. These fatigue tests were undertaken on the T-joint specimens in the as-welded condition and a question then arose regarding the role of the high weld residual stresses on the results of the fatigue testing. The study investigated the effect of allotropic phase transformations on the weld residual stresses in the T-joint specimen; calculated the residual stresses induced by welding during manufacture of a 26 mm T-joint fatigue specimen and determined the effect of the mechanical loading of the fatigue test on the residual stress field; and determined the agreement between experimental measurements made and the finite element predictions. A model based on Leung's single weld pass model was developed to determine the effect of allotropic phase transformations and the accompanying volumetric strains on welding residual stress.

FIRFOR : a simple forest management model

by R.M. Newnham. Chalk River, Ont. : Canadian Forestry Service, Petawawa National Forestry Institute, 1987. 94 p. : ill. Bibliogr. (Information report ; PI-X-72) ISSN 0706-1854
MICROLOG 88-02380 2 fiche

FIRFOR is a forest management simulation model seen as part of a comprehensive decision support system to aid forest managers. FIRFOR can provide insight into the long-term effects on yield of forest fire under a number of different management strategies: the area burnt each year may be constant or can be drawn at random from a known Weibull Distribution whose parameters are set by the user; forest management options are confined to the method of selecting stands for harvesting, including stand age, stand volume, or rate of growth; the annual harvest may be controlled by area (with a volume check) or by volume (with an area check); a proportion of wood that is burnt in any year may be salvaged during the subsequent 1-4 years; and the forest may consist of only one forest type (with 1-3 site classes).

Minnow traps were used to capture juvenile salmonids from five locations in each of 21 Barkley Sound streams. At each location the environmental features were noted, the length and weight of all captured juvenile coho were recorded and scales were obtained for salmonid age determination. Juvenile coho catch effort, mean length of one year old coho, and percent two year olds were calculated for each stream surveyed. The mean catch at each location was correlated to dominant biogeoclimatic variant, gradient, stream order, stream orientation and stream location, vegetation type, vegetation age, percentage in-stream cover, cover type, and substrate type.

Fish transport techniques in common use at salmonid enhancement facilities in British Columbia

by B.G. Shepherd and G.F. Bérézay. Vancouver, B.C. : Dept. of Fisheries and Oceans, Resource Enhancement Branch, 1987. v, 35 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1946) ISSN 0706-6473
MICROLOG 88-01022 1 fiche

Review of the equipment and procedures used at British Columbia's enhancement facilities to transport juvenile and adult salmonids. Details are given on the main techniques used (truck tanks, plastic bags, and aircraft transport) as well as equipment and procedures. Procedures are separated into those relating to trip planning as well as loading, transport and release of fish.

Fishery development in barren, winterkill lakes

by K. Tsumura and V.E. Blann. Victoria : Ministry of Environment and Parks, 1988. i, 8 p. : ill. Bibliogr. (Fisheries technical circular ; no. 80) ISSN 0229-1150 ISBN 0-7726-0810-5
MICROLOG 88-03811 1 fiche

Fish are routinely graded in hatcheries to reduce size variability in order to provide optimum growth conditions until release, with a tendance for the large size class of graded fish to contain more males than the smaller size classes. It has been suggested that large graded rainbow trout stocked in the spring in a winterkill lake could be used to develop a trout fishery. This report presents the results of a study repeating a previous study by Tsumura, Hume and Chan (1987) but utilizing a more definite graded size grouping in the fish and a barren winterkill lake.

Fishing at Grande-Grave in the early 1900's

by R. Samson. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1980. 128 p. : ill. Bibliogr. (History and archaeology ; 41) ISBN 0-660-10657-4
MICROLOG 88-04059 2 fiche

Throughout the French regime, the Gaspé fishery was characterized by the seasonal migration of fishermen from France. The fishery became increasingly sedentary after 1760, as Jersey interests moved in and imposed their organizational structure on the industry. Jersey firms set up operations at Grand-Grave in this period, and features typical of the Jersey system were still visible there in the early 1900s. There is evidence that fishermen worked under differing conditions. All the fishing techniques were characteristic of coastal fishing, and the catching and processing methods belong to tradition that originated with the first Europeans who fished in Gaspé waters. Herring, sand lance and squid were the main bait species; the principal types of gear were the herring net, the sand lance seine, the jigger and the hand line; and the Gaspé boat, a type of sailing barge, was the main fishing vessel. The processing was done by company establishment and independent fishermen alike at the same time of the year, and traditional methods were used in both cases.

Flin Flon : a review of environmental and health data

by J. Manfreda and I. Sabesky. Winnipeg Manitoba Environment and Workplace Safety and Health, 1987. 276 p. : ill., maps Bibliogr.
MICROLOG 88-00248 3 fiche

Flin Flon is a community of approximately 8,000 people who live beside the Hudson's Bay Mining and Smelting Company, the 4th largest mining and metallurgical complex in the country. This report was commissioned in 1985 as the result of health concerns by the union and management of the company as well as the residents of the town. All available documents relating to the general environment of Flin Flon, the occupational environment at the complex and the health status of the town's residents were reviewed. As well, residents were interviewed for their perceptions of health problems, mortality for 1958-83 was compared with that in Manitoba as a whole and other communities over the same time period, prevalence of pneumoconioses and chronic airflow obstruction was monitored, and cancer incidence as indicated by the provincial Cancer Registry was gathered.

Flocculants : final report

by Raylo Chemicals Limited. Edmonton : Raylo, 1983. 40 p. : ill. Bibliogr.
CANMET contract: OSQ82-00229.
MICROLOG 88-03126 1 fiche

The production of high quality coal by coal washery techniques yields large volumes of particulate-laden water. With synthetic organic polymeric flocculants widely used as clarifying agents, large numbers of competing flocculants are available making determination of the proper flocculant difficult. Part I of this contract detailed the development of techniques for the chemical characterization of various types of commercial polymeric flocculants. This second part details their physical characterizations, including determination of the molecular weight and molecular weight distribution; the measurement of polymer molecular size in solution; and determination of structure-activity relationships.

Fluctuations of trace contaminants in sewage treatment plants

prepared by H.D. Monteith ; edited by Henryk Melcer. Burlington, Ont. : Canadian Association on Water Pollution Research and Control, 1987. viii, 173 p. Bibliogr. (Monograph series on advances in water pollution research and technology ; no. 1)
CSI 22314.200. ISBN 0-9693150-0-7
MICROLOG 88-04638 2 fiche

Report consisting of a technical review of the literature concerning trace contaminants in wastewater treatment plants and collection systems. In addition to the technical review, this project investigates the response of full-scale and laboratory-scale activated sludge systems to dynamic fluctuations of trace contaminants in raw wastewater. Trace contaminant concentrations in raw wastewater, final effluents, sludges and internal recycle streams were compiled and analyzed for concentrations, frequency of occurrence and variability, where possible. Particular attention was paid to data identifying the dynamic fluctuations or variability of trace contaminants in wastewater treatment systems. Contaminant removals were summarized, and the mechanisms responsible for trace contaminant removal were identified. Mathematical models describing the removal mechanisms and used for predicting contaminant reductions were assessed. Concentrations of trace contaminants in wastewater collection systems were reviewed; models predicting contaminant levels in sewer systems were also discussed.

Fluid catalytic cracking of non-conventional gas oils by an octane-enhancing catalyst and a metals tolerant-catalyst

Sheridan Technical Associates Inc., Mississauga, Ont. : Sheridan Technical Associates, 1987. 161 p. : ill. Bibliogr.
CANMET contract: 6-9106-01SQ
MICROLOG 88-01567 2 fiche

Report of an evaluation of the cracking characteristics of a range of non-conventional gas oils, over both metals tolerant and the newer octane enhancing catalyst, to establish the suitability of the various gas oils as FCCU feedstocks. The gas oil samples included a reference gas oil from conventional Western Canadian crude and gas oils from two heavy oils (Coleville and Lloydminster), a synthetic tar sands crude oil (Suncor), and shale oil and a CANMET primary upgraded product. Samples of Davison DA-440 and Nova De equilibrium catalyst were chosen as typical metals tolerant and octane enhancing catalyst. For each catalyst/feedstock combination, 9 microactivity tests were completed operating at 470C, 490C and 510C and at c/o ratios of 2, 4 and 6. The results from the experimental program were used to assess the influence of feedstock composition and catalyst type on conversion and product selectivity. A kinetic model which determines rate constants for cracking and catalyst decay, was further used interpreting the data.

Fluidized bed combustion of Devco Prince test rejects

by E.J. Anthony, F.D. Freidrich and D.L. Desai. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iv, 14 p. : ill. Bibliogr. (Report ; ERL 87-71(TR))
MICROLOG 88-01549 1 fiche

At present, 6-7 million tons of washery rejects are generated in Canada annually and work is continuing on methods of utilizing this material, one such method being atmospheric fluidized bed combustion. The coal tested was deep mined at Cape Breton Development Corporation's Prince Mine located at Point Aconi, Nova Scotia, ranked as high volatile A bituminous with an average sulphur content of 5%. Test rejects were prepared from a batch of raw coal sent to EPRI's coal cleaning test facility near Homer City, Pennsylvania and 11 tests were carried out, all but 2 with limestone addition. The tests were run at a nominal bed temperature of 850C, two fluidizing velocities (1.2, 2.4 m/s), and an excess oxygen level of 3.6%. Tests were performed both with and without fly ash recycle.

Fly ash/cement packing for Lingan mine : final appraisal and trial proposal

by P. Cain, A. Harvey and T.R.C. Aston. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1987. vi, 37 p. : ill. Bibliogr. (Report ; CRL 87-134(TR))
MICROLOG 88-03886 1 fiche

Monolithic pumped packing was introduced at Lingan Mine, Nova Scotia in March 1985 to reduce air leakage across the longwall waste in the 9 East district. The pumped packing system currently used is the Astrapack system, the pack material supplied by Pozzament Ltd. from its works in the U.K. Recent research in Nova Scotia has concentrated on the development of a packing system using fly ash and ordinary Portland cement. Both materials are conveniently and inexpensively available, and lend themselves very well to mechanised packing methods. This report briefly reviews the Parsonage Flashpack system and describes recent research in Nova Scotia into the application of fly ash/cement packing systems before outlining requirements for a successful packing system at Lingan Mine. This is followed by a proposal including surface and underground trials and details of associated costs and benefits.

Forage fish monitoring program, 1984 and 1985

by D.J. Munro. Regina : Environment Canada, Water Quality Branch, Western and Northern Region, 1987. iv, 18 p. Bibliogr.
MICROLOG 88-05436 1 fiche

A forage fish monitoring program was initiated on a trial basis in the Western and Northern Region in 1984 and 1985 to evaluate forage fish as a biological monitoring tool for assesing the bioaccumulation of pollutants, and to begin compilation of a data base related to these fish. Nineteen samples were collected at 14 sites and analyzed for metals and organochlorine compounds. The data and a preliminary discussion of the results are presented in this report.

Forest insect and disease conditions : British Columbia and Yukon, 1987

by C.S. Wood, G.A. VanSickle and L.M. Humble. Victoria : Canadian Forestry Service, Pacific Forestry Centre, 1987. 40 p. ; ill. (Information report ; BC-X-296) *CSI 22189.011.* ISSN 0830-0453 ISBN 0-662-15846-6
MICROLOG 88-02012 1 fiche

This summary of forest pest conditions in British Columbia and the Yukon Territory in 1987 highlights pests that are or may become major forest management problems. It was compiled from records and field reports of 11 Forest Insect and Disease Survey rangers with contributions from forest agencies, researchers, and industry. More than 40 forest pests are discussed and some predictions are made for 1988.

Forest regeneration on burned, planted, and seeded clear-cuts in central Saskatchewan

by Z. Chrosciewicz. Edmonton : Canadian Forestry Service, Northern Forestry Centre, 1988. vi, 16 p. : ill. Bibliogr. (Information report ; NOR-X-293) ISSN 0704-7673 ISBN 0-662-16054-1
MICROLOG 88-04591 1 fiche

Fall and spring planting and seeding of jack pine and fall seeding of white spruce were operationally tested on four burned, clear-cut areas in central Saskatchewan. Hand planting of conventional nursery stock at 1.8 m spacing and uniform broadcast seeding of 0.56 kg of seeds (viability 65%) per hectare were the standard postburn treatments. Tree regeneration that followed the various postburn operation treatments was surveyed in late August and early September 1979. Heights of dominant jack pines were measured again in October 1985 to obtain a rough assessment of their growth performance. The 1979 regeneration was assessed by species and groups of species for stocking, density, and height.

Forme fonctionnelle et effets structurants des réseaux de transport

par A. Mouls. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. xviii, 44 p. : ill. Bibliogr.
MICROLOG 88-03997 1 fiche

Cette étude analyse des facteurs qui déterminent la performance économique régionale en Allemagne de l'Ouest, en portant une attention particulière au rôle de l'infrastructure de transport. L'auteur a estimé des fonctions de production, qui à la fois, rendent compte de l'importance des variables, de la forme fonctionnelle, et qui incluent un terme aléatoire. L'analyse comprend des variables de taxation interprétées comme systèmes de prix régionaux, des facteurs de performance économique et des facteurs de localisation et de centralité. Les variables de l'infrastructure de transport expliquent un pourcentage de la production régionale qui correspond à la proportion des coûts de transport dans la fabrication. La forme fonctionnelle estimée est de type Cobb-Douglas. On a appliqué un méthode de mesure des goulots d'étranglement associés à l'infrastructure de transport dans 2 comtés allemands.

Fort Selkirk bibliography : a listing of sources for Fort Selkirk and the Yukon Field Force found in Yukon Archives and elsewhere

compiled by Helen Dobrowolsky. Whitehorse : Yukon Tourism, Heritage Branch, 1988. ii, 31 p.
MICROLOG 88-05203 1 fiche

For the past six years, the Heritage Branch of the Yukon Government and Selkirk Indian Band of Pelly Crossing have been engaged in preserving the abandoned settlement of Fort Selkirk, located at the confluence of the Yukon and Pelly Rivers. Approximately forty buildings dating from as early as 1892 are still standing at the historic townsite. To date government and band efforts have been directed at preventing further deterioration of the structures and preserving the site for the enjoyment and education of Yukoners and visitors. This bibliography contains a listing of most of the sources the compiler referred to in her research on the settlement over the past four years and is presented as reference for future researchers.

The Foundry industry in Ontario and outlook for industrial minerals

by Gallagher and Associates ; in association with Robert Shnay Associates and Stevenson Kellogg Ernst & Whinney. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, Mineral Development and Lands Branch, 1988. vii, 44 p. : ill. Bibliogr. (Industrial mineral background paper ; 7) *CSI 55136.201.* ISSN 0228-7811 ISBN 0-7729-4129-7
MICROLOG 88-05413 1 fiche

The foundry industry is an important consumer of industrial minerals, most of which are currently supplied by imports from the United States. This study identifies and evaluates needs, issues and trends in the industry and identifies and assesses opportunities for the development and marketing of competitive, expanded or new uses of provincial mineral resources and products. The basic sources of research were the foundries and their mineral suppliers through questionnaires and interviews, both personal and by telephone.

The Fraser River chinook salmon test fishery : data summary, 1980-87

by N.D. Schubert, P.G. Paterson and C.M. McNair. New Westminster, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1988. xi, 193 p. (Canadian data report of fisheries and aquatic sciences ; no. 709) ISSN 0706-6465
MICROLOG 88-06357 3 fiche

A gill net test fishery for chinook salmon was conducted in the lower Fraser River between 1980 and 1987. Test fishery procedures, fishing location, gear and time were standardized to provide a relative index of in-river chinook abundance and run timing. Daily fishing effort, catch by species and catch per unit effort by species are reported by set for 1980-87. Also reported are age of the daily catch, by sex and flesh colour, mean daily length and weight, the incidence of hook and predator marks, and the incidence of adipose clips and coded wire tags.

Free trade and Canadian women : an opportunity for a better future

by K. Macmillan. Ottawa : Canadian Advisory Council on the Status of Women, 1987. iii, 37 p. Bibliogr. (Background paper) *French ed. (Le libre-échange et les canadiennes...) on the same fiche. CSI 22306.202.*
MICROLOG 88-02696 1 fiche

Discusses the view that women have the most to gain under a free trade agreement due to the fact that any Canadian job loss would be in industries with the poorest working conditions, and that women fare better than men in finding new jobs. Comments on how women will have the most to gain from anticipated lower prices for consumer goods, since they earn lower wages and therefore spend a higher proportion of their income on necessities. Also identifies world trends that will affect women's position in the labour market, including exchange rate fluctuations, technological change, competitive pressures from the developing world and depressed world commodity prices.

Free trade in services : an issue of concern to women

by M.G. Cohen. Ottawa : Canadian Advisory Council on the Status of Women, 1987. iii, 47 p. Bibliogr. (Background paper) *French ed. (Le Libre-échange dans...) on the same fiche. CSI 22306.201*
MICROLOG 88-02695 2 fiche

The service sector makes up two-thirds of Canada's national incomes and it employs over 80% of women in the labour force. This document discusses the job losses in industries that replace domestic services with imported ones, including data processing, financial services, telecommunications, transportation and culture. Also discusses the possibility that Canada could lose control over economic and social development, including the tax system, because of pressures from American trading partners, and increased privitization resulting from increased contracting out of part-time work, and other cost-cutting measures that would reduce the working conditions in the jobs held by women.

Frequency estimation of radar signals using an acousto-optic spectrum analyzer as an RESM receiver

by G. Farley. Ottawa : Defence Research Establishment Ottawa, 1988. ix, 32 p. : ill. Bibliogr. (Technical note ; 88-19)
MICROLOG 88-06358 1 fiche

It is expected that the Radar Electronic Support Measures (RESM) systems of the future will be exposed to extremely dense electromagnetic environments. Conventional receivers tend to make erroneous measurements and miss signals when there is a simultaneous arrival of different radar pulses, prompting interest in channeled receivers which are able to measure the frequency of different radar signals simultaneously present at the front end of the receiver. The acousto-optic spectrum analyzer (AOSA) is a channelized receiver for use in future RESM environments and its frequency measurement performance is investigated in this report. The report presents a statistical model for the signals of an AOSA. Using this model, the Cramer-Rao bound is calculated for the estimation of the carrier frequency of radar signals and the performance of the peak detector estimator, as well as an algorithm for sidelobe rejection.

Frost susceptibility study of granular 'A'

by G. Shibuya. Toronto : Ministry of Transportation and Communications, Engineering Materials Office, Soils and Aggregates Section, 1988. 19 p. : ill. Bibliogr. (Materials information report ; MI-105)
MICROLOG 88-03025 1 fiche

Recently, the B.C. Ministry of Transportation and Highways reduced the maximum allowable pass 75 um content from 9% to 5% for their granular base and subbase materials. One of their research findings suggested that granular materials with a high percentage of fines are frost susceptible. The formation of ice lenses within the base, subbase and subgrade will cause a vertical deflection of the upper pavement layers. Further problems occur during the spring thaw. In view of the impending consequences that can arise from frost action, it is important to ensure that granular materials are of a non-frost susceptible nature. Presently, the MTC allows up to 8% fines content for granular materials (10% for quarried material or slag), although this limit has not been evaluated with regard to frost heaving characteristics. A limited laboratory test program was conducted to evaluate this limit with respect to frost heaving.

The Future of social welfare systems in Canada and the United Kingdom : proceedings of a Canada/UK Colloquium, October 17-18, 1986, Ottawa/Meech Lake

edited by Shirley B. Seward. Halifax : Institute for Research on Public Policy, 1987. xxii, 313 p. Bibliogr. ISBN 0-88645-059-4
MICROLOG 88-02386 4 fiche

Informed observers and policy makers are well aware that in recent years social welfare systems on both sides of the Atlantic have been subject to growing scrutiny, debate and controversy, especially due to high unemployment rates and extreme interest rates experienced during the last recession as well as important demographic changes such as the increase of women into the labour market and the aging population. The papers included in the colloquium discuss the situation of social welfare policy in three stages: historical developments and forces for change; the influence of the political process on social security developments; and, the nature of policy responses to demographic change.

The Future of the parliamentary process in New Brunswick after the 1987 election

by A. Faust. Edmonton Legislature Library, 1988. 13 p. Bibliogr.
MICROLOG 88-05747 1 fiche

The New Brunswick Liberal Party won all of the 58 seats of the Legislative Assembly in the 1988 election. This position paper projects what the impact will be on the parliamentary process in the province. It suggests that measures might realistically be taken by the new government to preserve the integrity of parliament adequately and thus serve the interests of the people of New Brunswick.

Future water quality issues in the Prairies

by W.D. Gummer. Ottawa : Environment Canada, Inland Waters Directorate, Western and Northern Region, Water Quality Branch, 1986. 36 p. Bibliogr.
MICROLOG 88-04718 1 fiche

Water quality has gone from a topic of passive awareness to one receiving concentrated attention throughout Canada. A water quality issue essentially arises when a use of water is at risk or has been limited because of its quality. This presentation focuses on the primary water uses which need protecting or enhancing and the water quality concerns associated with each of these.

Gasification of Canadian anthracite

by A.P. Watkinson, G. Cheng and R. Quan. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iv, 38 p. : ill. Bibliogr. *CANMET contract: OST85-00217.*
MICROLOG 88-04579 1 fiche

In gasification of coal it is generally found that low rank coals, particularly those which are high in moisture and volatiles, are most readily gasified. Anthracite, being of high rank, and thus low in volatiles tends to be relatively unreactive, as it does not yield a highly porous char, on which the gasification reactions may proceed. Thus it requires higher temperatures and more severe conditions to gasify. In this project a B.C. anthracite from Mt. Klappan was evaluated in a 0.305 - m. dia. atmospheric pressure gasifier to study its gasification in order to provide an option for utilization of high ash content Canadian anthracite via the gasification process, and to complement CANMET in-house research on the correlation of gasification reactivity with coal rank.

Gasification of western Canadian coals

Edmonton : Alberta Energy, Scientific and Engineering Services, Alberta Office of Coal Research and Technology, 1988. 14 p. *A project supported in part by the Alberta/Canada Energy Resources Research Fund.* ISBN 0-86499-555-5
MICROLOG 88-04737 1 fiche

During 1985/86, the Alberta Office of Coal Research and Technology spearheaded the development of a joint industry/government research program on coal combustion. An Alberta coal gasification research program began to take shape, evaluating the various technologies and the suitability of using Alberta coals in a range of gasification systems. A review was made of current coal gasification technologies, including a determination of the properties of coals required by these systems and an investigation of opportunities to use the various technologies in Canada. The review also examined the potential of selling coal for use in these processes in Canada and other countries.

Generation of delayed replicas of a maximal-length sequence using hardware logic

by C. Belisle and P. Maltais. Ottawa : Defence Research Establishment Ottawa, 1987. v, 24 p. : ill. Bibliogr. (Technical note 88-08)
MICROLOG 88-04002 1 fiche

Pseudonoise (PN) sequences of maximal length (m-sequences) are widely used in a number of applications in communications systems. Very often a need arises to rapidly access any position within the sequence. Moreover, it is important to be able to predict the time required to execute the transition from one state of the sequence to any other. A method is presented that will give access to any one of the 2N-1 positions of an m-sequence within N clock pulses, N being the number of stages in the shift register used to produce the sequence. The method is easily implemented on hardware logic circuitry and requires no software operation.

Geology of the Cottonbelt lead-zinc-magnetite layer, carbonatites and alkalic rocks in the Mount Grace area, Frenchman cap dome, southeastern British Columbia

by T. Hoy. Victoria : Ministry of Energy, Mines and Petroleum Resources, Mineral Resources Division, Geological Survey Branch, 1987. 97 p. : ill. Bibliogr. (Bulletin ; 80) *Fold. map not filmed.* ISSN 0226-7497 ISBN 0-7718-8618-7
MICROLOG 88-02605 2 fiche

The Mount Grace area is within the Monashee Mountains in southeastern British Columbia, between the Columbia River on the east and the Seymour River on the west, approximately 60 kilometres northwest of Revelstoke. Exploration and development of the area date back to the early 1900s, with the recent work beginning in the early 1970s because of interest in niobium and rare earth elements. This bulletin presents details of the structure, stratigraphy, metamorphism and mineralization of the northwestern margin of the dome. The area was mapped in 4 weeks in the summers of 1978 and 1979, with brief subsequent visits in 1985 and 1986 concentrated on detailed mapping and sampling of the Mount Grace carbonatite and carbonatites in the Perry River area.

Geology of the late Precambrian Fury and Hecla group, northwest Baffin Island, District of Franklin

by F.W. Chandler. Ottawa : Energy, Mines and Resources Canada, 1988. 30 p. : ill., maps. Bibliogr. (Bulletin ; 370) *Fold. maps not filmed.* ISBN 0-660-12652-4
MICROLOG 88-04075 1 fiche

Description of the geology of the Fury and Hecla Group on Baffin Island north of Fury and Hecla Strait. The study was undertaken to investigate a virtually unknown major sequence of late Precambrian supracrustal rocks, about 6 km thick, that is similar in lithology and geological setting, including the presence of anomalous radioactivity, to the Athabasca Group in Saskatchewan. The discovery of numerous high grade, unconformity-related uranium deposits in the Athabasca Group prompted the present investigation in 1979. In summer 1979 a multidisciplinary field party studied the igneous geology of the radioactive granites and adjacent gneisses, the radioactivity of the basement and cover rocks, the 6 km thick overlying mainly quartz arsenite sequence, and a paleomagnetic study of the sedimentary rocks and mafic igneous rocks within them.

Geology of the Lingman Lake area : District of Kenora (Patricia Portion)

by B.C. Wilson. Toronto : Ministry of Northern Development and Mines, 1987. ix, 43 p. : ill., map. Bibliogr. (Ontario Geological Survey report ; 244) ISSN 0704-2582 ISBN 0-7729-1038-3
MICROLOG 88-02289 1 fiche

The Lingman Lake greenstone belt, an irregularly shaped complex of Archean metavolcanics, metasediments, and intrusive rocks, is centred about 325 km north of Red Lake. Geological mapping was carried out a scale of 1:31,680 (1" to 1/2 mile). Traverses by pace-and-compass were run to visit bedrock outcrops located by examination of air photographs. The study concentrated on the supercrustal rocks of the maps area and did not involve detailed examinations of the surrounding granitic rocks or the unconsolidated Pleistocene and Recent sediments.

Glacial dispersal of trace elements in Wisconsinan till in the Dot Lake-MacLellan mine area, Manitoba

by E. Nielsen and M.A.F. Fedikow. Winnipeg : Manitoba Energy and Mines, Geological Services, 1987. v, 73 p. Bibliogr. (Open file report ; OF87-2)
MICROLOG 88-01893 1 fiche

Study undertaken to define dispersal trends of trace elements for a single till sheet in an area of thin till, shallow overburden and low relief to provide an understanding of the origin of the till, the distance of glacial transport, and the rate of dilution of the till components, the effect of the topography on glacial erosion and dispersal, and the best sample medium and analytical methods. The initial study was conducted in 1982 and 1983 and expanded in 1984 and 1985 to include the Dot Lake area. Detailed till sampling was also undertaken along the Agassiz Metallotect, east of the MacLellan Mine, to test the conceptual model of glacial dispersal established at the mine and to map till geochemical anomalies. Till sampling was carried out in hand-dug holes over a distance of about 50 km between Dot Lake and Nickel Lake.

Glossary on dams

by M. Grandchamp-Tupula. Ottawa : Dept. of the Secretary of State of Canada, Translation Bureau, Terminology and Linguistic Services Branch, 1988. ix, 83 p. Bibliogr. (Terminology bulletin ; 178) *Bilingual (Lexique des barrages)*. ISBN 0-660-53886-5
MICROLOG 88-04078 1 fiche

Glossary providing equivalent French and English terms related to all types of dams, whether built to produce electricity or for other purposes such as irrigation, inland navigation, flood control, municipal water supply, diversion and recreations. The glossary covers most types of dams in existence, their purpose, configuration, and constituent materials. It contains a basic vocabulary for hydro-electric facilities, for the component parts of fixed and collapsable dams and related structures. Also included are some of the terms used in hydraulics that are most relevant to the subject matter at hand. Terms relating to electrical equipment, recording instruments, power generating equipment, gates, and gate operation are excluded.

Gold content and geochemistry of iron-formation in Canada

by G.A. Gross. Ottawa : Geological Survey of Canada, 1988. 54 p. : ill. Bibliogr. (Paper ; 86-19) *Bilingual (Teneur en or...)*. ISSN 0068-7650 ISBN 0-660-54121-1
MICROLOG 88-04420 1 fiche

Data on gold content in iron-formation rocks that formed in different depositional environments are required to answer fundamental questions regarding the genesis of gold deposits. This report presents the background and range in gold content in 90 samples selected from the IFCHEM (iron-formation chemistry) file, representing a broad spectrum of different lithological types of iron-formation from various sedimentary environments, and analyzed for gold. Data for the mean element content for 27 elements or constituents in these selected samples were compared to corresponding data for more than 1500 specimens of iron-formation in the IFCHEM file as part of the study of their chemical characteristics. Preliminary statistical studies were carried out in an attempt to identify distinctive elemental associations that might characterize facies of iron-formation that contain a significant content of gold. The general geological environment and types of rock associated with the various iron-formations are listed.

Gold deposits of Manitoba

by D.J. Richardson and G. Ostry. Winnipeg : Manitoba Energy and Mines, Minerals Division, 1987. vi, 91 p. : ill., maps. Bibliogr. *Fold. maps not filmed.*
MICROLOG 88-01895 2 fiche

Report on the primary gold deposits, written in response to the resurgence of gold exploration in recent years to assist prospectors and mining companies in exploration and promotion. Data was compiled from Manitoba Energy and Mines publications and files, Geological Survey of Canada publications, company annual reports, press clippings and personal communications with prospectors and geologists. Both former and present producing mines are listed, as well as localities where gold has been reported. An overview of exploration and production from 1890-1986 is given, with the deposits listed in more detail by district and including information on regional geology, structure, mineralization, past producers, and deposits where relevant. An index to deposits is included.

Government of Alberta submission to the House of Commons Standing Committee on Transport : the National Transportation Act, Bill C-18, the Motor Vehicle Transportation Act, Bill C-19

Alberta. Alberta Economic Development and Trade. Edmonton : Province of Alberta, 1987. 2 v.
MICROLOG 88-05397 3 fiche

The strength of Alberta's economy is critically dependent on the ability to sell goods and services in distant markets. The small, widely dispersed population in western Canada necessitates that many Alberta businesses focus on markets which are often thousands of miles away. To access these areas competitively, efficient low-cost transportation service is essential. This document examines rail and air means of transportation along with extra-provincial trucking, northern marine resupply services issues, and commodity pipelines issues. Includes a summary of Alberta recommendations.

Government restraint : an issue of the eighties -- Reviewed

by J. Stilborn. Ottawa : Library of Parliament, Research Branch, 1987. 17 p. Bibliogr. (Current issue review : 86-12E) *French ed. (La restriction de l'appareil...) on the same fiche.* ISBN 0-660-12560-9
MICROLOG 88-00805 1 fiche

The 1980s have seen growing concerns in Canada about negative impacts, both economic and social, of the massive state of bureaucracy which developed in response to economic depression, world war and the rising expectations of the post-war era. Since the mid seventies, concerns about the scope and expense of government programs and, in particular, about the size and cost of the modern public service, have spawned a series of initiatives directed to the enhancement of political control and achievement of financial restraint. After examining salient characteristics of the issue of big government, the report views efforts of the current government to achieve reductions in the size and cost of the bureaucracy. Particular attention is given to the most ambitious and innovative of these attempts: the Nielsen Task Force.

Grasses of Ontario

by W.G. Dore and J. McNeill. Ottawa : Canada Dept. of Agriculture, Research Branch, 1980. 566 p. : ill., maps. Bibliogr. (Monograph ; no. 26) ISBN 0-660-10452-0
MICROLOG 88-04424 6 fiche

The grass family (Gramineae or Poaceae) is one of the largest families of flowering plants and one that is well represented in Ontario. This guide provides an account of the genera, species, and infraspecific taxa of native or introduced plants. Identification keys are provided to the genera, to the species within each genus, and to the main infraspecific taxa. Generic descriptions are provided, reflecting the characteristics common to the species occuring in Ontario and not necessarily applying to the genera as a whole. Formal descriptions of the species are not included, but outstanding diagnostic characteristics, particularly those noticeable in the field, are given. Photographs of individual florets or grains are provided for almost all the species.

Gregg River CBR test results

by R. Whipple and R.J. Kolada. Ottawa Canada Centre for Mineral and Energy Technology, 1987. v. 31 p. (Report ; CRL 87-109(TR)).
MICROLOG 88-02140 1 fiche

The California Bearing Ratio Test was originally developed as an aid in the design of asphalt surfaces for highways, and was adapted by the mining industry to assist in the design of mine haul roads, particularly the detemination of subbase requirements for highways. A plunger is pushed into the ground surface at a constant rate. At certain depths, the deflection of a steel alloy proving ring is recorded. These dial gauge readings are plotted against penetration depths. The two force readings at 2 specific depths are transformed to pressures, and ratios computed.

Groundfish stock assessments for the west coast of Canada in 1987 and recommended yield options for 1988

J. Fargo, M.W. Saunders and A.V. Tyler, editors. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. v, 304 p. ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1617) ISSN 0706-6457
MICROLOG 88-04864 4 fiche

Stock assessments and yield options are developed for the Pacific coast of Canada for lingcod, Pacific cod, petrale sole, Dover sole, rock sole, English sole, arrowtooth flounder, sablefish, Pacific hake, spiny dogfish, walleye pollock, Pacific ocean perch, yellowmouth rockfish, rougheye rockfish, redstripe rockfish, silvergray rockfish, yellowtail rockfish, canary rockfish, quillback rockfish, copper rockfish, and yelloweye rockfish. The yield options are recommendations to the fishery managers of the Field Services Division on catch limitations and other fishery management procedures. Biological considerations only, rather than economic factors, are addressed. The yield options are quantitative and are based on a series of appropriate mathematical methods, e.g. virtual population analysis, dynamic pool analysis, and Fournier stock reconstruction procedures. Alternative options address the possibility of the fishery managers considering high risk and low risk yields in relation to a stock's future potential to produce.

Growth and quality of red oak planted in a jack pine plantation

by G. Stroempl. Maple, Ont. : Ontario Tree Improvement and Forest Biomass Institute, 1987. 4 p. Bibliogr. (Forest research note ; no. 44)
MICROLOG 88-04325 1 fiche

In the northern mixedwood and hardwood cover types of Ontario, red oak is one of the major species. However, the relatively large supplies of high quality timber have disappeared through overcutting during the last century, and Ontario is now importing veneer logs of red oak from the USA, along with other heavy hardwoods. Good growth, high quality and high market value make red oak a very desirable species for a great variety of products. There are a few successful red oak plantations in southern Ontario forests, but only one is known to have been documented. This note illustrates one of several examples underway in Forest Districts of Algonquin and Central Regions, Ontario, where red oak is underplanted or interplanted in stands conventionally rated as "exclusive" pine sites.
FO ON PR SC

Growth and quality of red oak planted in red pine plantation openings

by G. Stroempl. Maple, Ont. : Ministry of Natural Resources, Ontario Tree Improvement and Forest Biomass Institute, 1987. i, 6 p. : ill. Bibliogr. (Forest research report ; no. 117) ISSN 0301-3924 ISBN 0-7729-3228-X
MICROLOG 88-04612 1 fiche

Northern red oak is one of the major species in the northern mixedwood and hardwood cover types of Ontario. Its high market value and domestic demand make the regeneration and management of red oak an economically attractive investment. These trials test the survival and potential growth of red oak nursery stock that has been planted under a variety of stand conditions. This note documents the results of planting of red oak nursery stock in openings of a mature red pine plantation which is part of the Hendrie Forest in the Huronia Forest District, Vespra Township.

Growth and yield 35 years after commercially thinning 50-year-old Douglas-fir

by S.A.Y. Omule. S.l. : Forest Research Development Agreement, 1988. vi, 15 p. : ill. Bibliogr. (FRDA report ; 021)
CSI 37107.203. ISSN 0835-0752 ISBN 0-7718-8616-0
MICROLOG 88-05960 1 fiche

Commercial thinning can increase value and net revenue by making some wood available early, by producing larger trees at rotation, increasing employment, and overcoming wood supply problems. Although rarely practised in the past in the province, it has recently become of great interest, particularly in the 1940s plantations of coastal Douglas-fir. This report documents growth and yield following a moderate, double-entry commercial thinning in a 50-year-old coastal Douglas-fir stand on a good site on Vancouver Island. It is based on 35-year remeasurements and observations.

A Guide to the hierarchical watershed coding system for British Columbia

Victoria : Ministry of Environment and Parks, 1988. vii, 33 p. : ill. ISBN 0-7726-0469-X
MICROLOG 88-05576 1 fiche

The Ministry has developed a watershed coding system for hierarchical numbering and cataloguing of stream channels and watersheds within the province. The computerized generation of watershed code numbers has preserved the natural organization, direction and hierarchy of stream channels and tributaries. The numbering system reflects the location of tributary confluences relative to the proportional distance between the mouth and headwaters of the parent stream. This guide presents information on the methods of generating the codes, precautions in using it, and the use of the dictionary in which are catalogued the code numbers. Sample stream report from the dictionary are included.

A Guide to the unknown missing data in sample surveys

by D. Odynak. Edmonton : University of Alberta, Dept. of Sociology, 1987. 27 p. Bibliogr. (Research discussion paper ; no. 50) ISSN 0317-2473
MICROLOG 88-02178 1 fiche

The problems of missing data in sample surveys are examined in view of potential sources of missing data, detection, and the strategies available to handle missing data at various stages of the survey process. The discussion is limited to missing data on selected items in a survey excluding the issue of data missing as a result of nonresponse to the entire survey.

A Guide to the use of mechanical site preparation equipment in north central British Columbia -- 2d ed.

by D. Coates and S. Haeussler ; revised by A. MacKinnon, L. Bedford, and J. Maxwell. S.l. : Forest Resource Development Agreement, 1987. iii, 63 p. : ill. (FRDA report ; 002, 2d. ed.) ISSN 0835-0752 ISBN 0-7718-8617-9
MICROLOG 88-06011 1 fiche

Field guide to techniques of mechanical site preparation only, not including prescribed burning or chemical treatments, detailed discussion of the biological principles and objectives of scarification, or of operational techniques used in mechanical site preparation. Northern British Columbia includes the sub-boreal spruce, interior cedar-hemlock, Engelmann spruce-subalpine fir, and boreal white and black spruce biogeoclimatic zones in the Prince Rupert, Prince George, and Cariboo Forest Regions. The guide describes 25 types of equipment currently in use or with potential for use; information on 1987 prices, productivity rates and treatment costs, and availability; descriptions of various site preparation objectives and the machines suited to each, a reference table for determining the ability of each type of equipment to perform under different site conditions, and mechanical site preparation interpretations for treatment units in the various zones; and a listing of other publications and research bodies which serve as sources of additional information.

Guidelines for confined entry work

Winnipeg : Manitoba Environment and Workplace Safety and Health, 1988. 33 p. : ill.
MICROLOG 88-05813 1 fiche

Every year people die in confined spaces, often more than one person at a time. There is a need to: identify confined spaces; train workers in hazards and control measures; and implement measures for control of hazards. The code presented in this document assists in the recognition of confined spaces; assists in the development of procedures for entry into these confined spaces, supplements a regular training program for workers required to enter and work in confined spaces. Assists members of Workplace Safety and Health Committees in identifying and making recommendations for hazard evaluation and control.

Guidelines for forest biomass inventory

by A.H. Aldred and I.S. Alemdag. Chalk River, Ont. : Canadian Forestry Service, Petawawa National Forestry Institute, 1988. x, 134 p. Bibliogr. (Information report ; PI-X-77) ISSN 0706-1854 ISBN 0-662-15933-0
MICROLOG 88-03564 2 fiche

A forest inventory, including the appraisal of forest biomass reserves, provides the forest manager and others studying or concerned with the forest with a clear summary of the quantities of biomass present, and the quality and distribution of the resources over an area of interest, with a general picture in the form of maps, tables and statistics. This is supported by detailed tree data concerning species, size classes, age, productive potential, current growth and yield, stocking, and condition of the resource, as well as the relationship of the forest to the physiography, soils, water, and other plant and animal communities. These guidelines take stock of many accomplishments under ENFOR, compare the results with related North American experience, and draw together a uniform set of definitions, standards, and procedures for conducting forest biomass inventories.

H.E.L.P. : Help End Landfill Pollution : data tracking and management control system

Edmonton : Alberta Environment, 1988. 52 p.
MICROLOG 88-04687 1 fiche

The H.E.L.P. Data Tracking and Management Control System was created to provide tracking and management capabilities of industrial landfills in Alberta for the Department of Environment. Information gathered on industrial landfills during the H.E.L.P. program was summarized in order to provide a quick reference to the large amount of information which is on file. The system breaks down the landfill inventory on a site by site basis and gives the pertinent physical data for each site. In addition, each site has been given a status code to designate its present disposition. A management summary is provided which characterizes the overall status of the inventory. Data is listed alphabetically by company name and includes status, location, dates of operation, overall comments, waste types, and design and operation.

A Handbook on the Saskatchewan Personal Property Security Act

by R.C.C. Cuming and R.J. Wood. Regina : Law Reform Commission of Saskatchewan, 1987. xxx, 386 p. Bibliogr. *Funded by the Law Foundation of Saskatchewan.* ISBN 0-921923-00-7
MICROLOG 88-02217 5 fiche

The Law Reform Commission of Saskatchewan in July, 1977 issued Proposals for a Saskatchewan Personal Property Security Act which formed the basis for the Act currently in force in the Province. This handbook provides a basic explanation of the provisions of the Act, and takes into account the relevant case law. Contains authors' comments on ambiguities and weaknesses in the legislation and comments on the soundness of the reasoning and analysis used by the courts when interpreting the Act.

Harbour seals in the Lacs des Loups Marins and eastern Hudson Bay drainage

by T.G. Smith and G. Horonowitsch. Ste-Anne-de-Bellevue, Que. : Dept. of Fisheries and Oceans, Arctic Biological Station, 1987. iv, 15 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1536) ISSN 0706-6457
MICROLOG 88-04126 1 fiche

In response to a need for further information on the harbour seals inhabiting the Seal Lakes of the Ungava peninsula, a winter aerial survey and ground observations were conducted from 18 February to 6 March 1986. The main shoreline and tributaries of Lower Seal Lake (Lac des Loups Marins) were surveyed from altitudes of 100-220 m A.G.L. All open water areas were noted and subjectively evaluated for their potential as seal habitats and tracks in the snow were examined.

Harvesting and renewal costs of stripcutting relative to those of clearcutting on shallow-soil upland black spruce sites in north central Ontario

by J.D. Johnson and J.H. Smyth. Sault Ste. Marie, Ont. : Government of Canada, Canadian Forestry Service, Great Lakes Forestry Centre, 1987. 15 p. : ill. Bibliogr. (Information report ; no. 380) ISSN 0832-7122 ISBN 0-662-15338-3
MICROLOG 88-00633 1 fiche

Costs and savings associated with strip-cut harvesting are analyzed for 12 renewal prescriptions and two strip lengths over leave periods of 3, 5 and 10 years. Harvesting costs are compared for stripcutting and clearcutting. Stripcutting is compared with clearcutting followed by aerial or spot seeding. A doubling of the strip length is investigated at a cost reducing measure.

Has the ABM Treaty a future?

by R.G. Purver. Ottawa : Canadian Institute for International Peace and Security, 1988. 7 p. Bibliogr. (Background paper ; no. 18) ISBN 0-662-16021-5
MICROLOG 88-02708 1 fiche

Despite the progressive attitude between the two superpowers that initiated the signing in 1972 of the "Treaty between the USA and the USSR on the Limitation of Anti-Ballistic Missile Systems" (ABM), the Treaty itself has come under a number of challenges which threaten its current existence, especially in light of the fact each side accuses each other of blatant violations of the Treaty. This paper reviews efforts at ballistic missile defence from the 1960s and onwards, and evaluates and reviews provisions of the Treaty, noting compliance concerns and the reinterpretation dispute caused by President Ronald Reagan's Strategic Defence Initiative (SDI). The paper concludes with comments on the future of the Treaty.

A Heavy metal study of three river basins in Atlantic Canada influenced by mining activities

by H.S. Bailey. Moncton, N.B. : Inland Waters Directorate, Atlantic Region, Water Quality Branch, 1988. viii, 89 p. : ill. Bibliogr.
MICROLOG 88-05285 2 fiche

In 1984-85, a series of surveys were undertaken to evaluate the environmental quality of streams whose basins were subjected to base metal mining activities. The basins selected were the Tomogonops/northwest Miramichi River in New Brunswick, the Exploits River in Newfoundland, and the Salmon/Mira River in Nova Scotia. Most of the previous studies were centered on water analyses and the present surveys update that work and determines whether there has been long-term degradation or improvement in major ion and metal levels. Metal data are also compared to water quality guidelines for the protection of aquatic life. In addition to water, bottom sediments and fish from each basin were analyzed.

Hecate Strait juvenile salmon surveys : July 6-12 and July 30-August 3, 1986

by J.F.T. Morris and M.C. Healey. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. iii, 65 p. : maps. (Canadian data report of fisheries and aquatic sciences ; no. 636) ISSN 0706-6465
MICROLOG 88-01288 1 fiche

The Pacific Biological Station chartered a drum seiner for two cruises to Hecate Strait that took place from July 6-12 and July 30 - August 3, 1986. The primary purpose of the cruises was to gather data on species composition, size composition, and diet of the juvenile salmon population of Hecate Strait. This information will be used to validate predictions of juvenile salmon occurrence in Hecate Strait by a model which is responsive to different assumptions about coastal migratory behaviour. The additional objectives were to gather information on the associated non-salmonid catch and on the temperature structure of Hecate Strait in the summer. This report presents the sampling and catch information collected, as well as the vertical temperature profiles of the sampled waters.

Herring stock estimates from diving surveys of spawn for Georgia and Johnstone Straits in 1985

by J.F. Schweigert and C.W. Haegele. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. v, 63 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1972)
ISSN 0706-6473
MICROLOG 88-04793 1 fiche

The abundance of herring spawning in Georgia and Johnstone straits declined over several years to a recent low in 1984. Herring spawns in portions of Georgia Strait were surveyed by divers in 1976 and 1983, but never has there been an attempt by divers to survey all the spawns. Concern about the low levels of herring spawning stocks in Georgia and Johnstone straits in recent years and the potential effects of even moderate herring roe fisheries in these areas on the recovery of these stocks prompted the Department to conduct an intensive diving survey of this area in 1985. The results are summarized in this report.

Herring stock estimates from diving surveys of spawn for the lower east coast of the Queen Charlotte Islands in 1987

by C.W. Haegele and J.F. Schweigert. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. iv, 41 p. : maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1956) ISSN 0706-6473
MICROLOG 88-04124 1 fiche

Herring stocks in the Queen Charlotte Islands have been declining slowly since 1981 apparently due to the aging of the very strong 1977 year class. There has been considerable uncertainty in escapement estimates for this region because a significant portion of the spawn is deposited on the giant kelp, which is difficult to survey and assess. Estimates of egg deposition were obtained from diving surveys, except in Huston Inlet and in Beattie Anchorage, where estimates were derived from traditional surface surveys. In the surface survey, visual observations were made from a boat, frequently a viewing box was used to increase the visibility of the bottom. Grapples were used to determine the presence of and obtain samples of spawn. From these observations, the length and width of spawn and the layers of eggs were estimated. The observed length and an adjusted width was used to calculate area. Egg density was estimated from egg layer observations.

Herring stocks in the North Coast district supported substantial reduction fisheries from the 1930s to the collapse of stocks in 1967, with the area closed to all types of fishing by 1982, remaining closed for 1983. Herring spawn was again surveyed by divers in 1986 to determine whether stocks had recovered from 1982 levels, especially since the fishery had been reopened in 1984. Available resources and weather did not permit a complete diving survey, but spawns not surveyed by divers were surveyed from the surface. The 1986 diving survey and the complementary results of the surface survey are reported here.

High resolution alpha-spectrometry for radium analysis : the effects of sample thickness and filter pore size

by T.P. Lim, N.K. Dave and N.R. Cloutier. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1986. ii, 28 p. : ill. Bibliogr. (Report ; MRL 87-12(TR))
MICROLOG 88-03889 1 fiche

Radium isotopes are frequently monitored in environmental samples associated with uranium mining, milling, fuel processing and power plant operations. For alpha-emitting radionuclides such as Ra-226, Ra-224 and Ra-223, the alpha-spectrometric technique using a silicon surface barrier detector provides a rapid method for the simultaneous measurement of their component fractions. This study investigates the effects of the deposited sample thickness in terms of barium carried additions on the overall resolution of the system; the analytical recovery factor; and the final equilibrium between Ra and its daughter products, as well as the effect that the pore size of the membrane filter had on the deposition characteristics of the final precipitate and resolution.

High school dropouts, labour market success and criminal behaviour

by T.F. Hartnagel and H. Krahn. Edmonton : University of Alberta, Centre for Criminological Research, 1988. 28 p. Bibliogr. (Discussion paper ; 15)
MICROLOG 88-05324 1 fiche

Interview and questionnaire data from a sample of high school dropouts are used to explore the relationship betwen post-school experiences and criminal behaviour. Various aspects of work experience are examined along with sex, family status, and length of time since leaving school to determine their independent and/or joint relationships with types of crime and drug use. Interview data provide a look at dropouts' own views about the relationship between labour market success and criminal behaviour.

Historical resource investigations within the Forty Mile Coulee reservoir

by J.H. Brumley and B.J. Dau. Edmonton : Alberta Environment ; Alberta Culture and Multiculturalism, 1988. xv, 370 p. : ill. Bibliogr. (Manuscript series ; no. 13)
MICROLOG 88-04308 5 fiche

The Forty Mile Coulee project involves the construction of a water storage reservoir which is located within a section of Forty Mile Coulee in south central Alberta. The reservoir will be created by the construction of two earth filled dams which are approximately 9.4 km apart and are located along with the coulee channel. Construction of the reservoir has resulted in considerable disturbance and modification of the land within the project area, and consequently, the total destruction of any historical resources present. This report presents a summary and final statement of work conducted in the area and the results of the research which recorded 108 historic resource sites containing 471 identified features.

Hog fuel availability in the south coastal region of British Columbia, 1985

by P.W. Appleby. Victoria : Pacific Forestry Centre, 1988. 42 p. (Information report ; BC-X-297) ISSN 0830-0453 ISBN 0-662-16119-X
MICROLOG 88-04705 1 fiche

A great many studies of the renewable energy industry have identified hog fuel produced by the forest industry as the least expensive source of biomass energy. This study updates work funded by the British Columbia Wood Waste Energy Coordinating Committee in 1977 which investigated hog fuel availability in the south coastal region of British Columbia. A comprehensive forest products mill listing was prepared containing all pulpmills, veneer and plywood mills, hardboard and particleboard plants, all sawmills producing over 3000 Mfbm per year, all shake and shingle mills producing over 20,000 squares per year, and the major remanufacturing or wood specialty plants in the region. Questionnaires were sent to most of the 180 manufacturing operations of the 119 forest products companies. A detailed tabulation of 1985 hog fuel production, purchases, on-site utilization, on-site surplus, disposition of surplus, and net available surplus by individual mills within each sub-region was made.

Home occupations

Toronto : Ministry of Municipal Affairs, Research and Special Projects Branch, 1987. 39 p. : ill. Bibliogr. ISBN 0-7729-2387-6
MICROLOG 88-02713 1 fiche

Prior to the industrial revolution home and workplace were one and the same, with families living and working together as economic production units. People now live, work and exchange goods and services in different locations, but there is an inclination in urban planning toward mixed-use developments which seems to reflect the proliferation of home occupations. This paper identifies and details the three general trends which have influenced this change: technological innovations (particularly computer technology), economic considerations (the correlation of unemployment to people taking the initiative to create their own jobs), and social trends that have seen families juggle family responsibilities with careers. Discusses impacts such as residential land use, and nuisances to neighbours and benefits such as job creation, small business health and service-rich neighbourhoods. Contains results of a survey of the Ontario experience, looks at home occupations in the rural setting, and outlines regulatory options and guidelines for home occupations in general.

Homeownership : its impact on fertility

by V. Krishnan. Edmonton : University of Alberta, Dept. of Sociology, 1988. 28 p. Bibliogr. (Research discussion paper ; no. 51) ISSN 0317-2473
MICROLOG 88-05327 1 fiche

In this discussion paper, the fertility of Canadian women is investigated using data from the 1984 Canadian Fertility Survey. Attention is focussed on several social and cultural-demographic factors (age, education, religion, religiosity, homeownership, nativity, income, value of home, and number of siblings) that are associated with fertility of couples. The study examines whether couples choose to make family adjustments such as family limitation in order to buy a home.

Hot gas cleanup of gasification products

by A.P. Watkinson, G. Cheng and R. Quan. Vancouver, B.C. : University of British Columbia, Dept. of Chemical Engineering, 1987. ii, 70 p. Bibliogr. *CANMET contract: OST85-00033.*
MICROLOG 88-01562 1 fiche

Combined cycle power generation based on coal gasification requires that gases be cleaned of particulates before combustion to minimize gas turbine erosion problems. Hot gas cleanup usually involves primary collection of particulates by one or two stages of cyclones, followed by a secondary cleanup device. This report presents the results of a study of particle cleanup from gases produced in an atmospheric pressure 0.305-m dia. coal gasifier using a conventional cyclone, a vortex pocket cyclone of the Cardiff design and a granular bed filter of coarse particles operated in upflow.

Hot mix joint compaction in 1987

by R.C. Evers and D.F. Lynch. Toronto : Engineering Materials Office, Bituminous Section, 1988. 7 p. : ill. (Materials information report ; MI-121) ISBN 0-7729-4306-0
MICROLOG 88-04608 1 fiche

In 1986, hot mix pavement was cored to determine thickness and density in both main lane paving and 150 mm from the joint between adjacent lanes in the lane placed by the second paver. To determine the compaction actually attained on each side of a longitudinal joint in 1987, sets of two cores were cut from the mat, one on each side. Furthermore, the 1987 cores were cut with the edge of the core coincidental with the joint itself to determine if densities were lower at the edge than 150 mm away. Compaction results for 970 pairs of cores from all regions were entered into a micro-computer spread sheet for analysis.

Hot water system design for multi-residential buildings

by T.C. Olivares. Toronto : Ontario Hydro, Research Division, 1987. i, 35 p. Bibliogr. (Report ; no. 87-239-K)
MICROLOG 88-02032 1 fiche

One of the major concerns of utilization engineers today is the design of domestic hot water systems capable of coping with hot water demands efficiently. A large-scale sampling plan was implemented to monitor hot water and energy consumption in a senior citizen building, three condominiums and a rental building to develop an efficient design method for domestic hot water systems based on information gathered from the 5 buildings. Recording of data began in July 1985 and was continued for 1 full year. The raw data obtained for each building included hot water, natural gas, and energy consumption recorded in pulses at 15 minute intervals, converted and digitized into 1-hour intervals, then transformed into standard files for analysis.

Hours of work and overtime : the European experience

by K. Weiermair. Toronto : Ontario Task Force on Hours of Work and Overtime, 1987. 69 p. Bibliogr. *At head of title: Research report.*
MICROLOG 88-06095 1 fiche

In recent years, many European countries have followed a conscious policy of reducing hours of work as a form of worksharing. This study examines the extent and incidence of overtime in selected countries; reviews regulations; considers overtime from the perspective of employer, employee, and union; and summarizes the ongoing debate over governmental policies toward hours restrictions and overtime reduction.

Hours of work and overtime : U.S. experience and policies

by F. Lazar. Toronto : Ontario Task Force on Hours of Work and Overtime, 1987. 62 p. Bibliogr. *At head of title: Research report.*
MICROLOG 88-06094 1 fiche

The United States has gone through a recent public debate over the pros and cons of restricting overtime to create jobs. As well, the U.S. offers a multiplicity of experiences with legislation restricting the use of overtime. This study, in examining the U.S. situation, looks at the Fair Labor Standards Act, reviews hearings on proposals to amend that Act, examines states' laws, and presents a discussion of policy alternatives.

Hours of work and overtime policies to reduce unemployment

by F. Reid. Toronto : Ontario Task Force on Hours of Work and Overtime, 1987. 51 p. *CSI 56233.201.*
MICROLOG 88-05166 3 fiche

Voluntary worktime reduction policies are advocated to both increase the job satisfaction of current employees and to create jobs for the unemployed. The objective of this report is to assess various policy option to reduce work time (including reductions in the standard workweek, increased use of job sharing, increased accessibility of sabbatical leaves, and earlier retirement), and to reduce overtime (including amending employment standards legislation and the criteria for granting overtime permits). Potential policies are evaluated on the basis of both efficiency and equity. The political acceptability of the policies to the parties involved and the government is also considered.

Housing in Canada 1945 to 1986 : an overview and lessons learned

Ottawa : Canada Mortgage and Housing Corporation, 1987. iii, 35 p. *CSI 22118.212.*
MICROLOG 88-00918 1 fiche

This document summarizes two research monographs: John Miron's Housing Progress in Canada Since 1945; and, Dr. Frank Clayton's The Residential Construction Industry: Perspective and Prospective. This summary provides basic information about Canada, population growth and production of new housing since 1945. Miron's report reviews policies implemented to improve market efficiency and to promote equity and social justice and lessons learned for the housing industry, consumers and governments. Clayton's report discusses characteristics of the Canadian residential construction industry, structure of the industry, construction techniques and research. It also discusses geographically dispersed markets, heterogeneous consumer demand, immobile product and high transportation costs, local regulations and the cyclical nature of housing.

ISSN 0706-6473
MICROLOG 88-00942 1 fiche

Report of a shallow-water survey in the mouth of Howe Sound in August 1986 for juvenile prawn to locate the shallow-water habitats used by the prawn in their first summer. Trap sampling occurred in 36 sets among a group of islets at the mouth of the Sound and along the southern shores of Gambier Island using 4 types of traps baited with canned sardines. Beach sampling was conducted at 6 sites during low tides. Three SCUBA dives were completed in the southeast Popham Island area to observe microhabitat utilization by young prawn and their behaviour. Captured prawn were counted, sexed, and their carapace length measured and retained. A short review of the estuaries, including fjordic inlets, as nursery grounds for pandalid and penaeid shrimps is included.

Hydrogeological characterization of the East Bull Lake research area

by K.G. Raven...et al. Saskatoon, Sask. : Inland Waters/Lands Directorate, National Hydrology Research Institute, 1987. ix, 77 p. : ill., maps. Bibliogr. (NHRI paper ; no. 31) (Scientific series ; no. 160) *French ed. (Caractérisation hydrogéologique de la...) : 88-02048/1.*
MICROLOG 88-02047 1 fiche

From 1983-1985 the National Hydrology Research Institute in co-operation with Atomic Energy of Canada Limited undertook hydrogeological research studies at the East Bull Lake research area, a gabbroanorthosite pluton located near Massey, Ontario. This report describes the methodology, results and interpretation of the borehole investigations completed at East Bull Lake to measure the fundamental hydrogeological parameters of hydraulic conductivity, hydraulic head and ground-water chemistry. These parameters were measured in four deep boreholes (440-850 m in depth) and 14 shallow boreholes and in boreholes equipped with packer assemblies and multiple-packer casings. The results of the borehole investigations are interpreted in the context of a regional ground-water flow system for the East Bull Lake area.

Hydrothermally synthesized zirconia powder : a preliminary study

by S.S.B. Wang...et al. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. ii, 12 p. : ill. Bibliogr. (Report ; MSL 88-9(IR)) *Project 3.0.2.9.01 advance ceramic materials.*
MICROLOG 88-02660 1 fiche

Structural ceramics are currently the focus of an intense international R&D program due to their potential applications in heat engines, cutting tools and other wear-resistant components. In this study, a laboratory autoclave was used to synthesize zirconia powder by reacting zirconium oxychloride with water or aqueous urea under elevated pressure-temperature (hydrothermal) conditions.

An Ice strength indexer for model towing tanks : summary report

prepared for Transportation Development Centre by Melville Shipping Ltd. Ottawa : Melville Shipping Ltd., 1986. vi, 12 p. : ill. *TP 7947E.*
MICROLOG 88-00307 1 fiche

The mechanical properties of model ice are usually determined by manual cantilever beam tests. Additional ice property calibration is not feasible with existing testing equipment because model ice properties change with time. This report describes the design, development and preliminary testing of an instrument, the Indexer, which monitors the primary mechanical properties of the model ice, simultaneously with model tests. The Indexer uses three instrumented plates to monitor the flexural, shearing and crushing strength.

Identification des répercussions des programmes fédéraux sur l'utilisation des terres : manuel à l'intention des directeurs de programme

Comité interministériel des terres (Canada). Ottawa : Environnement Canada, Direction générale des terres, 1982. iv, 39, iv, 33 p. *Bilingue (The identification of impacts...).*
ISBN 0-662-91912-2
MICROLOG 88-03011 1 fiche

En novembre 1980, le Cabinet a enjoint tous les ministères d'appliquer les lignes directrices sur l'utilisation des terres aux politiques, programmes et activités du gouvernement fédéral qui pourraient avoir des incidences sur les terres, à tous les niveaux de juridiction. Ce manuel vise à aider les directeurs de programme à se conformer à la Politique fédérale sur l'utilisation des terres. La 1re partie aborde les effets des programmes fédéraux sur l'utilisation des terres. La 2e partie comprend un questionnaire de sélection qui permet aux directeurs de classer leurs programmes par catégorie de secteur et les oriente vers les chapitres appropriés de la 3e partie qui traite des effets potentiels de certains types de programmes sur l'utilisation des terres.

The Identification of impacts of federal programs on land use : a manual for program managers

Interdepartmental Committee on Land (Canada). Ottawa : Environment Canada, Lands Directorate, 1982. iv, 33, iv, 39 p. Bibliogr. *Bilingual (Identification des répercussions...).*
ISBN 0-662-12358-1
MICROLOG 88-03011 1 fiche

In November 1980, Cabinet directed that all departments would apply land use guidelines to federal policies, programs and activities which may affect land at all jurisdictional levels. The purpose of this manual is to assist program managers in dealing with the Federal Policy to help them identify the potential land use impacts of their programs through a series of questions and explanations. The document is divided into three sections: land use impacts of the federal government which defines the nature and types of land use impacts found to occur from federal programs and activities; program categorization and screening which consists of a questionnaire designed to assist them in the third section of the document which gives detailed explanations of land use impact for each sector.

Identification of mustard related compounds in aqueous samples by gas chromatography-mass spectrometry

by P.A. D'Agostino...et al. Ralston, Alta. : Defence Research Establishment Suffield, 1988. 57 p. : ill. Bibliogr. (Suffield report no. 488)
MICROLOG 88-04296 1 fiche

Copies of these documents are available from:
Micromedia Ltd., 165 Hôtel de Ville, Hull PQ J8X 3X2
(819) 770-9928 FAX (819) 770-9265

During World War II over 700 tons of the chemical warfare agent mustard were shipped to Suffield and stored in lead-lined concrete vaults. In the early 1970s, it was decided that this stockpile of agent mustard would be destroyed by hydrolysis. Aqueous samples were taken from near the site and analysed by capillary column gas chromatography-mass spectrometry under both electron impact and chemical ionization conditions.

Illustrated guide to some hornworts, liverworts and mosses of eastern Canada

Robert R. Ireland and Gilda Bellolio-Trucco ; glossary and structure illustrations by Linda M. Ley. Ottawa : National Museums of Canada, National Museum of Natural Sciences, 1987. 205 p. : ill. (Syllogeus ; no. 62) ISSN 0704-576X
MICROLOG 88-03288 3 fiche

An illustrated identification guide is presented for some of the common or distinctive bryophytes occurring in eastern Canada. Only superficial (25-50x) features are utilized for identification of the plants. Information is given on the life cycle and structure of bryophytes, on collecting and preparing a reference collection, on identification and methods of study and on a few reference books that are available. Keys to the bryophytes are accompanied by illustrations of the superficial characters important for their recognition. The habitat and distribution are listed for each bryophyte. The guide concludes with an illustrated glossary and an index to the bryophytes.

Image enhancement and display techniques applied to SAR580 images of ships

by M.T. Rey and M.R. Vant. Ottawa : Dept. of Communications, Communications Research Centre, 1987. viii, 56 p. : ill. Bibliogr. (CRC report ; no. 1421) *Sponsored by the Dept. of National Defence, Research and Development Branch.*
MICROLOG 88-00358 1 fiche

At radar wavelengths, a ship appears as a collection of smooth sheets arranged to form flat plates, di- and trihedral corner reflectors. The returns from the corner reflectors are very large, and tend to dominate the returns from the weaker reflectors in the image. Image enhancement techniques that emphasize the lower level returns in relation to the dominant targets can be applied to the images. This report discusses the properties of SAR ship returns, reviews the various types of image enhancement techniques applied to the image data, and gives examples of enhanced ship imagery. Detail in the enhanced images is compared to actual structural detail in the ships being imaged.

Immigration and the Canadian labour market

by K.B. Kerr. Ottawa : Library of Parliament, Research Branch, 1986. 24, 5 p. Bibliogr (Backgrounder ; BP-153E) *French ed. (L'immigration et le marché) on the same fiche.* ISBN 0-660-12443-2
MICROLOG 88-00700 1 fiche

Throughout most of the post-war period, the flow of immigrants to Canada has been influenced greatly by Canada's ability to facilitate their absorption into the labour market. With the relatively recent introduction of regulatory changes linking immigration levels to economic activity the impact has been a substantial reduction in the importance of "economic immigration". This paper examines the impact of immigrant labour on the labour market and especially its effect on unemployment through a review of recent immigration trends and policy objectives, the revised selection criteria, and immigration's contribution to the growth and composition of Canada's labour supply.

Impact of modernization on development and demographic behaviour : case studies in seven Third World countries

edited by Carol Vlassoff and Barkat-e-Khuda. Ottawa : International Development Research Centre, 1988. xi, 123 p. : ill. Bibliogr. *ISBN 0-88936-502-4*
MICROLOG 88-04561 2 fiche (Available on fiche only)

Articles in this volume focus on the impact of rural development policies and projects on demographic behaviour in seven countries in Asia and Latin America. The Phillipines study examines changes over time in two rural communities in Southern Mindanao influenced by the Green Revolution and agrarian reform. The Malaysian project investigates the impact of modern industrial expansion in a traditional rural area upon the family economy and gender roles. In Bangladesh, the effect of an integrated program for rural development upon demographic change, especially on fertility and family-planning behaviour, is examined. The Indian study focuses on the relationship between child labour and fertility in a village where jewelry-making is an important cottage industry. In rural Colombia, demographic and economic behaviour are compared in three different economic sectors. The Argentinian study investigates the demographic and economic characteristics of households belonging to different agricultural sectors of a relatively underdeveloped province. Finally, in Peru, demographic and economic behaviour in four rural areas, characterized by different levels of development, are compared.

The Impact of sorting fish prior to processing : a pilot project

NewLantic Group. St. John's : Fisheries Development Division, Newfoundland Region, 1987. vii, 57 p. (Canadian industry report of fisheries and aquatic sciences ; no. 182) ISSN 0704-3694
MICROLOG 88-00768 1 fiche

Yields from filleted groundfish at Newfoundland fishplants are lower than they might be, in part because of inconsistency in yield performance between production workers and by a single worker at different times. Filleting machines are not widely accepted. This report presents the results of experiments conducted between February and April of 1986 with a fish sorting machine, a modified Model 481 Scangrader, at the Fishery Products International Ltd. plant in Trespassey, Newfoundland. Benefits and problems are presented both in production and economically.

The Impact of the Migratory Birds Convention Act and of seasonal phenology on recreational hunting of waterfowl in northwestern Canada

by F.G. Cooch. Ottawa : Canadian Wildlife Service, 1988. 13, 13 p. : ill., maps. Bibliogr. (Progress notes ; no. 173)
MICROLOG 88-02600 1 fiche

Many northern residents feel that their opportunity to hunt is unduly restricted as dictated in the Act because of the short hunting season and the early onset of winter and early date of southward migration. Sales of migratory game bird hunting permits and the reports of respondents to the National Harvest Surveys from 1979-1985 are used to compare the impact of restrictions imposed by the Act and the effects of seasonal phenology on hunting opportunity and success in northwestern Canada. Comparisons are made between specific zones in the Yukon and the District of Mackenzie, Northwest Territories. Also discusses the offsetting procedure of increasing daily bag limits and the relatively low competition between hunters in these areas.

The Impact of vertical axis characteristics on helicopter handling qualities

by S.W. Ballie and J.M. Morgan. Ottawa : National Aeronautical Establishment, 1987. viii, 61 p. : ill. (Aeronautical report , LR-619)
MICROLOG 88-00241 1 fiche (Available on fiche only)

Report deals with the impact of vertical axis characteristics on helicopter handling quantities and describes an experiment on required heave damping levels in the environment of advanced control systems and an experiment on the issues of thrust to weight ratio limits and the effects of the dynamic response characteristics of the engine, governor and rotor system. The procedures and results of the first experiment are summarized and the second is fully described, both using the NASA-Ames Vertical Motion Simulator and the NASA-Ames CH-47 variable stability helicopter.

The Impacts of trade liberalization on imperfectly competitive industries : a review of theory and evidence

by S. Globerman. Ottawa : Economic Council of Canada, 1988. xiii, 64 p. : ill. Bibliogr. (Discussion paper ; no. 341)
MICROLOG 88-02109 1 fiche (Available on fiche only)

The purpose of this discussion paper is to review available theoretical and empirical evidence concerning the response of imperfectly competitive firms to trade liberalization in reference to the free trade agreement. Identifies and evaluates the claims of recent research efforts that product differentiation, and high domestic levels of concentration and foreign ownership may decrease, and even reverse, the expected gains of the agreement.

The Implication of climate change for agriculture in the prairie provinces : a summary of department of agricultural economics reports

by L.M. Arthur. Ottawa : Environment Canada, 1988. 12, 13 p. : ill. Bibliogr. (Climate change digest ; CCD 88-01) *Bilingual (Répercussions du changement...)*. ISSN 0835-3980 ISBN 0-662-55621-6
MICROLOG 88-03313 1 fiche

In recognition of the impact of climate and climatic fluctuations on society, Canada established a Canadian Climate Program in 1978 to integrate the efforts of various federal and provincial agencies, the universities, and the private sector. This study simulates the prairie agricultural impacts of climate change attributable to doubled atmospheric carbon dioxide concentrations. The analysis is an extension of earlier research concerning the economic effects of prolonged drought and two climate change scenarios generated from independent general circulation model experiments using the Geophysical Fluid Dynamics Laboratory and the Goddard Institute for Space Studies models. Historic weather data from 1961-85 were used as both the historic normal (baseline) and the base on which scenario climate changes are imposed.

Implications of climate change for downhill skiing in Quebec

prepared for Climate Change Digest, Atmospheric Environment Service ; by Lamothe & Périard with the collaboration of Joseph Litynski. Ottawa : Environment Canada, 1988. 12, 12 p. (Climate change digest ; CCD 88-03) *Bilingual (Répercussions d'un changement...). CSI 22138.222.* ISSN 0835-3980 ISBN 0-662-55770-0
MICROLOG 88-02892 1 fiche

There is now growing scientific evidence that increasing concentrations of "greenhouse gases" in the atmosphere could result, over the next few decades, in a rise of global mean temperature in the range of 1.5 to 4.5 C. This research evaluates the sensitivity of downhill skiing to this eventual climatic change. Meteorological criteria relevant to the definition of skiable days were identified in the first phase of the study. These criteria were subsequently applied to current climate conditions; they were also applied to projected scenarios of climate change in order to gauge the impacts of a warmer climate on the alpine ski industry. Preliminary socio-economic impact assessments were then made.

The Importance of wildlife to Canadians : demand for wildlife to 2001

by F.L. Filion, S. Parker and E. DuWors. Ottawa : Canadian Wildlife Service, 1988. v, 29 p. : ill. *CSI 21110.207.* ISBN 0-662-16117-3
MICROLOG 88-06290 1 fiche

In 1981, Statistics Canada carried out a survey sponsored by federal, provincial, and territorial government wildlife agencies and a number of non-government groups to determine the value of Canadian wildlife resources. In the survey, approximately 100,000 Canadians aged 15 years and over, from all regions and occupations, were questioned on their support for wildlife conservation, their participation in a number of wildlife-related activities and their related expenditures. This 5th report examines national and provincial patterns in potential demand for wildlife and forecasts how growth and aging of the population is likely to influence levels of participation by 2001. The analysis is followed by an exploration of implications for management of this new segmentation of constituencies benefiting from wildlife, patterns of potential demand for wildlife-related activities based on expressed interest, and projected shifts in demand for those activities.

Improved mortality searches for Ontario miners using social insurance index identifiers

by M.E. Fair, H.B. Newcombe and P. Lalonde. Ottawa : Atomic Energy Control Board, 1988. vi, 23 p. (Research report ; INFO-0264)
MICROLOG 88-06132 1 fiche

A continuing study of the mortality experience of Ontario miners, including uranium miners, depends for its reliability on the quantity and quality of the personal identifying information contained in the death searches. Since Worker's Compensation Board (WCB) records are often incomplete or inaccurate, use of Social Insurance Number (SIN) records are considered likely to improve the death searches wherever the Social Insurance Numbers of the miners were known. The present study was undertaken to test the feasibility of the proposed use of the SIN identifiers and to determine how much improvement in the accuracy of the death searches would result. The procedures were designed to compare the efficiencies of the death searches when initiated respectively by the WCB records alone, the SIN records alone, and by composite or 'hybrid' records containing identifiers from both. A file of known correct death links was used in the test. Comparisons of the error rates for the present searches, when initiated by the three types of records, were based on this prior verification of the potential good links.

Incidence of rabbit (snowshoe hare) damage in plantations in New Brunswick

Fredericton : Dept. of Forests, Mines and Energy, Timber Management Branch, 1986. 11 p. (Technique ; 86:01)
MICROLOG 88-01906 1 fiche

Seven hundred and twenty-one Crown land plantations were surveyed for the incidence of rabbit (snowshoe hare) browse damage as part of the annual survival and development assessments undertaken between 1982 and 1984. These assessments were carried out 1, 3 and 5 years after planting. Survival assessment sampling consisted of 5 meter radius plots sampled at an intensity of 1 plot for every 10-20 hectares of plantations. In this case 640 plantations were sampled. Development assessment plots were 8 meters in radius and sampled at an intensity as high as 1 plot per 2 hectares in 81 plantations. The data for the 3 study years was compiled following the 1984 survival and development assessment.

Increment core sampling techniques for high quality cores

by L. Jozsa. S.l. : Forintek Canada Corp., 1988. iii, 26 p. : ill. Bibliogr. (Special publication ; no. SP-30) ISSN 0824-2199
MICROLOG 88-04609 1 fiche

Most increment borers on the market today have been manufactured in Finland or Sweden, and are obtained in a wide range of lengths and diameters, either in two or three thread style. For commercially important softwoods in Canada, the number of threads are of no importance in obtaining good quality cores: it takes about the same physical effort. Almost all borers are now Teflon-coated to minimize friction, although the coating tends to wear off first where there is the most friction and where it is most needed - on the tapered threaded bit. This report presents sampling techniques to be used to obtain high quality cores.

Independent living : the time is now : a discussion paper on the future of independent living assistance in Ontario

Toronto : Ontario Advisory Council for Disabled Persons, 1988. v, 74 p. Bibliogr. ISBN 0-7729-3601-3
MICROLOG 88-04291 1 fiche

This paper is based on the philosophy that all citizens of Ontario, whether they are disabled or not, should have the freedom to choose the most appropriate lifestyle for themselves. Independent living assistance is defined here as assistance with tasks that individuals would normally do for themselves if they did not have a disability. The paper explores present methods of obtaining personal assistance in Ontario and ways in which Independent Living Centres and brokering can contribute to the process of linking consumers with independent living services. Issues surrounding the need for education of consumers and training of independent living assistants are also examined.

Index testing of fractures in URL diamond drill cores (level II concept assessment draft report)

by A. Annor and R. Jackson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. ii, 10 p. Bibliogr. (Report ; MRL 87-29(TR))
MICROLOG 88-03158 1 fiche

Deep igneous fractures generally control ground water flow through the rock mass, ultimately providing a pathway for radionuclide transport from a repository vault to the biosphere. As a contribution to the underground research laboratory concept assessment document currently being prepared for the Lac du Bonnet formation, this report

describes the procedure used to characterize small scale core sample fractures from the lease area. A range of joint roughness coefficient and joint wall compressive strength values are also provided to test the accuracy of mathematical models developed for predicting the coupled thermomechanical and hydrologic behaviour of rock joints.

Indian self-government -- Reviewed

by D. Wright. Ottawa : Library of Parliament, Research Branch, 1987. 13 p. Bibliogr. (Current issue review ; 86-31E) *French ed. (L'autonomie politique des...) on the same fiche.* ISBN 0-660-12571-4
MICROLOG 88-00799 1 fiche

Traces the background to the Native self-government claim incorporating a review of the Indian Act and the imposition of the band council system. This system causes a situation within Indian tribes where a band council is put in place to satisfy the federal government while traditional systems of government are still carried on. Discusses changes in federal attitude since 1950, reviews the 1983 report of the Special Committee on Indian Self-Government and surveys related parliamentary action, including the first self-governing band legislated, the Sechelt Band. Discusses alternative funding arrangements and the development of a constitution. Documents a historical chronology of events since 1763 concerning Indian self-government.

Industrial and occupational profile of the Quebec fabricated metal products sector

prepared as part of the Canadian Occupational Projection System (COPS) ; by Sylvain Bélisle. Montreal : Canada Employment and Immigration Commission, Quebec Region, Economic Services Branch, 1987. viii, 58 p. (Profile ; no. 10)
MICROLOG 88-01091 1 fiche

The health of the apparent Canadian market for fabricated metal products is closely aligned to the growth and decline of manufacturing and construction markets. A strong decline in construction investment has strongly detracted from the growth of this sector since 1977. This report gives a broad outline of the Quebec fabricated metal products sector seeking to identify the chief cyclical trends in the industry. A brief review of the sector's main markets over the last few years provides a trends forecast for up to 1992. Measures the impact on main occupational groups of the major factors determining change in the sector by linking employment changes occurring between 1971 and 1981 to the identified cyclical and structural factors making employment forecasts to 1992.

The Industrial mineral potential of kyanite and garnet in British Columbia

by J. Pell. Victoria : Mineral Resources Division, Geological Survey Branch, 1988. 43 p. Bibliogr. (Open file ; 1988-26) ISSN 0835-3530 ISBN 0-7718-8632-2
MICROLOG 88-04603 1 fiche

Garnet, kyanite, sillimanite and andulsite are minerals found in contact and amphibolite facies regional metamorphic rocks. In British Columbia such metamorphic rocks are confined mainly to two belts, the eastern Omineca crystalline belt and the western Coast Mountain belt, where they are accompanied by granitic plutons. Garnet, kynite and the other aluminosilicate minerals which are present throughout these belts have potential industrial applications, although currently there is no production of these commodities in British Columbia, or elsewhere in Canada. This report also presents the current world production and economic considerations for garnet and kyanite.

Cette étude résulte de l'évaluation et de la comparaison de données recueillies auprès d'entreprises de l'industrie du travail du métal. Ce rapport met en lumière des aspects structuraux, économiques et techniques de cette industrie dans le but de sensibiliser les autorités et les entreprises à la modernisation de l'industrie. Ce document se veut aussi une base de réflexion autant sur les causes de la situation actuelle que sur ses possibilités d'évolution future.

L'Industrie sidérurgique dans le monde

par G. Lefebvre. Québec : Gouvernement du Québec, Ministère de l'industrie et du commerce, Direction des communications, 1987. ix, 97 p. : ill. Bibliogr. *En tête du titre: Profil. CSI 66108.208.* ISBN 2-550-17631-6
MICROLOG 88-04224 2 fiche

Cette monographie retrace d'abord l'évolution passée de la sidérurgie à travers le monde et décrit l'état actuel des choses dans les principales régions productrices. Puis, on examine plus particulièrement l'évolution de la situation au Canada et les changements en cours en mettant l'accent sur les entreprises majeures et leur position relative. Par la suite, on se concentre sur l'état de la situation au Québec au sortir de la crise sidérurgique des années 1981-82 et on décrit les entreprises actives au moyen des fiches d'entreprises tout en soupesant les forces et les faiblesses du secteur. Enfin, on conclut sur les perspectives d'avenir de la sidérurgie sur les plans mondial et régional.

Industries de la machinerie (sauf électrique) au Québec : monographie sectorielle

Québec : Commission de la santé et de la sécurité du travail, 1987. xxii, 448 p. : ill. Bibliogr. *CSI 67137.200.* ISBN 2-550-16524-1
MICROLOG 88-04814 5 fiche

La CSST s'est donné pour tâche de rassembler et de diffuser les informations pertinentes qui sont reliées aux préoccupations de santé et de sécurité au travail. Les renseignements présentés dans cette monographie proviennent des résultats d'une analyse de besoin effectuée par diverses équipes de travail sur chacun des secteurs retenus. On traite d'abord des caractéristiques socio-économiques du secteur, de son évolution et on donne des informations sur les établissements, sur la main-d'oeuvre qui les compose ainsi que sur les intervenants sociaux qui y travaillent. Ensuite, on aborde les risques pour la santé et la sécurité. Finalement, on retrouve des informations sur l'organisation de la prévention en santé et en sécurité.

The Influence of flue dampers on the venting performance of flues

Scanada Consultants Limited. Ottawa : Canada Mortgage and Housing Corporation, 1987. xiii, 151 p. : ill.
MICROLOG 88-06475 2 fiche

As part of its ongoing study of combustion venting problems in houses, studies were conducted on several aspects of chimney flue performance. This report deals with the influence of flue dampers on flue performance. The study consisted of a literature review; a review of applicable codes and standards; modification of FLUE simulator, a microcomputer-based model of thermal, pressure and flow interactions in the furnace/flue/house system, to allow it to model venting systems incorporating flue dampers; and use of FLUE simulator in a parametric study of the effects of flue dampers. Tests were conducted on a chimney fitted with a damper.

Information technology in the Ontario government, 1983-85

Toronto : Management Board of Cabinet, 1988. 28 p. *CSI 55100.200.*
MICROLOG 88-04765 1 fiche

For several years, Management Board has published a brief annual report on electronic data processing (EDP) spending thoughout the Ontario government, based on information reported by all ministries. This year, the scope of the report on spending was expected to include other elements of information technology, such as office automation and end-user computing. Also new is an interpretation of the spending trends. The focus of this report is on information technology patterns, and not on specific systems or projects. Data was examined from a number of different perspectives and compared to past periods. Comparisons were made to other provincial governments and the federal governement. A survey of EDP spending in private sector organizations, published by a large research organization, was used to compare private and public sector spending patterns.

Les Infractions sexuelles à l'égard des enfants : le rapport Badgley -- Revu

par D. Macdonald. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 24 p. Bibliogr. (Bulletin d'actualité ; 84-38F) *L'éd. anglaise (Sexual offences against...) sur la même fiche.* ISBN 0-660-92165-0
MICROLOG 88-00931 1 fiche

Le Comité sur les infractions sexuelles à l'égard des enfants et des jeunes (Comité Badgley) avait pour mandat de déterminer si les lois canadiennes protègent suffisamment les enfants contre les infractions sexuelles et de formuler des recommandations en vue de renforcer cette protection. En août 1984, le Comité recommandait une révision en profondeur du Code criminel comparable à ce que proposaient le rapport de la Commission de réforme du droit et le projet de loi C-53. Ce bulletin examine 4 aspects du rapport: les infractions sexuelles, les témoignnages et la tenue du procès, la prostitution juvénile et la pornographie impliquant des enfants.

Initial trials of a proposed particle counter for underground use

by S.G. Hardcastle and J. Cavan. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. iii, 12 p. : ill. Bibliogr. (Report ; MRL 87-184(TR))
MICROLOG 88-03893 1 fiche

A particle counter was developed for use in non-certified underground mines. The counter is a light diffraction based unit which counts and sizes single airborne particles by their near forward scattered light as they are drawn through a sensing chamber, then sizes each airborne particle into one of six manufacturer set threshold size ranges that span 0.5 to 20.0 um. Detailed is a preliminary underground test that was peformed during the fabrication of two units. The test evaluated various elements of the counter design, conducted in a conveyor way with typical dust concentrations, 0.4 mg/m3 average and 6.0 mg/m3 peak, and provided information on the distribution of particles by number for operational and non-operational periods of the conveyor.

Instrumentation for Hartmann and 20-L dust explosibility tests at the Canadian Explosive Atmospheres Laboratory

by K.J. Judge. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iv, 27 p. (Report ; MRL 87-124(TR))
MICROLOG 88-02149 1 fiche

This report described the control and instrumentation equipment used for dust explosion testing at the Canadian Explosive Atmospheres Laboratory (CEAL). This equipment was developed in order to provide improved precision and resolution, plus better control over experimental parameters. The report is intended as a technical reference and includes detailed descriptions, wiring diagrams and the theory of operations for the in-house designs. The control and instrumentation equipment for dust explosion testing at CEAL consists of a timing control box, a strain gauge control box, a strain gauge pressure transducer, and a digital oscilloscope. It is the timing control box and the strain gauge control box which are of in-house design and are described in detail in this report.

Integrating children experiencing special needs in day nurseries : a background report

Toronto : Ministry of Community and Social Services, 1988. ii, 120 p. Bibliogr. *At head of title: Child care.* ISBN 0-7729-3379-0
MICROLOG 88-05737 2 fiche

Three years ago the Ministry of Community and Social Services undertook a review of day nursery programs for children and families experiencing special needs. This background paper is based on the information collected. It describes how the day nursery system, in Ontario and elsewhere, is serving children and families experiencing special needs. Much of the discussion reflects the perceptions of the service providers who participated in this study. As a working document for the field, this paper is meant to provide information, offer some new insights and, in a general sense, identify policy and operational issues that would benefit from further consideration.

An Inter-sectoral study of Canada's resource industries

by T. Bennett and D.L. Anderson. Kingston, Ont. : Queen's University, Centre for Resource Studies, 1988. xiii, 184 p. : ill. (Technical paper ; no. 8) *CSI 99240.200.* ISSN 0821-0675 ISBN 0-88757-090-9
MICROLOG 88-04213 3 fiche (Available on fiche only)

Statistical data on the resource sectors in Canada are frequently used to support policy studies and for comparisons of the economic impact and contributions of the various resource sectors, in the competition for allocation of goverment resources and fiscal incentives. In the past, such comparisons have been handicapped by lack of comparability between the data series used, particularly in terms of the Standard Industrial Classification (SIC) categories included in the various stages of each industry. This study aims at resolving this shortcoming by establishing a comparable set of SIC categories for these stages and then assembling the data within this framework. Resulting data is presented in tabular form and graphs, showing trends from 1963 to 1984 for macro and financial data.

The International debt problem -- Reviewed

by P. Berg. Ottawa : Library of Parliament, Research Branch, 1987. 17 p. Bibliogr. (Current issue review ; 84-30E) *French ed. (Le problème de...) on the same fiche.* ISBN 0-660-12606-0
MICROLOG 88-00794 1 fiche

Few international economic issues have generated the same kind of concern as has the international debt problem. This concern has emanated from virtually all the key international financial players. Commercial banks, international financial institutions, central banks as well as governments in both creditor and debtor countries all have had some stake in the substantial rise in international lending and borrowing which occurred in the 1970's. Heavily-indebted developing countries have experienced unmanageable debt-serving difficulties. This report traces the extent and nature of the international debt problem, analysing its origins, debtor adjustments that have been made, with their accompanying risk caused to the international financial system and the impact on Canadian exports. Outlines possible solutions and also gives a chronology of debtor countries experiencing debt-payment failure.

Interpretation of suspended sediment characteristics, Red River at Emerson, Manitoba, 1978-1986

by H. Glavic, T.J. Day and T.R. Yuzyk. Ottawa : Environment Canada, Inland Waters Directorate, Water Resources Branch, Water Survey of Canada, Sediment Survey Section, 1988. xiv, 74 p. : ill. Bibliogr. *CSI 21147.201.*
MICROLOG 88-05284 1 fiche

There is a growing awareness that fine suspended sediments are a prime media for the transport and storage of contaminants. This report, which provides a summary and interpretation of existing suspended sediment data, is the first of several planned for the Red River at Emerson, Manitoba. Sampling strategies, methodologies, equipment, computational procedures and data were evaluated to determine how the two Branches can work more effectively together. Meaningful suspended sediment monitoring began in 1978 with both Water Survey of Canada (WSC) and the United States Geological Survey (USGS) initiating sampling programs. The WSC program provides data on a flow-weighted basis, year round, while the USGS program collects monthly samples only. Earlier, Prairie Farm Rehabilitation Administration sampled suspended sediments during open water in 1956 and 1961.

Interprovincial forest fertilization program, 1968-1983 : standardized fertilizer installations in 81 unmanaged middle-aged stands in seven provinces, final report : results of ten-year growth remeasurements

by G.F. Weetman...et al. Ottawa : Government of Canada, Canadian Forestry Service, Forest Science Directorate, 1987. xi, 53, xi, 55 p. : ill. Bibliogr. (Information report ; DPC-X-21) *Bilingual (Programme interprovincial de...).*
ISSN 0705-324X ISBN 0-662-55143-5
MICROLOG 88-04121 2 fiche

The Interprovincial Forest Fertilization Program comprises 81 standardized experiments established by the provincial forest services of New Brunswick, Quebec, Ontario, Manitoba, and Alberta, and by the Canadian Forestry Service in the provinces of Nova Scotia and Saskatchewan. Seventy-three experiments were remeasured after 10 growing seasons. The field trials were designed to test the effect of nitrogen when applied as urea at the rates of 112 and 224 kg ha, and the effects of combined nitrogen, phosphorus, and/or potassium additions on the growth of pole-size and semimature conifer stands. In the combination treatments, nitrogen was applied at the high rate, phosphorus as triple super phosphate at the rate of 112 kg/ha, and potassium as potassium chloride, also at the rate of 112 kg/ha. This final report contains the 10-year response data, with sections of the 5-year report included to present a more complete picture.

Intersite shuttle bus for the elderly and the disabled at Expo 86

prepared for the Transportation Development Centre : by Tom Geehan. Ottawa : Transportation Development Centre, 1986. xii, 87 p. : ill. *TP 8085E*
MICROLOG 88-00308 2 fiche

At Expo 86, a world exposition on transportation and communications, held in Vancouver, Canada, between May 2 and October 13, 1986, the Canadian host pavilion was located about 1.2 kilometres from the main Expo 86 site. As a means of ensuring that the Canada pavilion was accessible and barrier-free and as a means of allowing elderly and disabled visitors to travel conveniently between the various gates of Expo 86, Transport Canada provided an accessible intersite shuttle bus service. The intersite shuttle bus service was monitored during its operation and this report provides an analysis of the results. The ridership and its distribution by various time periods, the productivity, cost and other operational characteristics are presented. In addition, the report provides an overview and description of the setting, the participants, the operation, the equipment and characteristics of the shuttle bus, and the attitudes, perceptions and characteristics of the passengers.

Intertidal and adjacent upland habitat in estuaries located on the east coast of Vancouver Island : a pilot assessment of their historical changes

by A.C. Prentice and W.S. Boyd. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1988. v, 75 p. : ill. Bibliogr. (Technical report series ; no. 38) ISSN 0831-6481 ISBN 0-662-16067-3
MICROLOG 88-03668 1 fiche

Estuaries are currently the focus of considerable attention for protection in British Columbia, due to their use as a critical habitat for migrating and wintering birds and anadramous salmonids, their scarcity and sparseness of distribution, and the considerable threat to them particularly from early farming interests that turned upper marsh into arable land. This pilot study establishes the amount, rates and types of estuarine habitat alienated in recent years and the reasons for those alienations on the east coast of Vancouver Island. Supplements two previous studies on wetland alienation in the interior of the province.

An Introduction to motor vehicle emissions inspection and maintenance programs

by D.L. Cope. Ottawa : Environment Canada, Environmental Protection Directorate, Industrial Programs Branch, Transportation Systems Division, 1987. vii, 59 p. Bibliogr.
MICROLOG 88-01167 1 fiche

The purpose of a vehicle emissions Inspection and Maintenance (I/M) program is to identify vehicles with excess emissions or inoperative emission control components and to affect repair. In 1985, the results of investigations into excess emissions from in-use light duty vehicles led Environment Canada to suggest that control agencies consider I/M programs for areas where urban air quality problems resulting from excess vehicle emissions are of concern. This report outlines the principal features of I/M programs and how they could apply in a Canadian context. An I/M program usually consists of a regulary scheduled inspection of vehicle in a designated area to detect those vehicle emitting pollutants at rates greater than selected specifications or with inoperative or missing pollution control equipment.

Inventoried air pollution emissions of sulphur dioxides, nitrogen oxides and volatile organic compounds for the Province of Ontario

authors S.K.S. Wong, D. Yap, Q.T. Huynh ; for Ontario Ministry of Environment, Emission Inventory Task Group. Toronto : Ontario Ministry of the Environment, Air Resources Branch, 1986. 24 p. (Report ; ARB-187-86-AQM) ISBN 0-7729-1544X
MICROLOG 88-00002 1 fiche

The Ontario Emission Inventory System is a computerized data management system that accepts, stores and reports on recent available emissions information covering sulphur oxides, nitrogen oxides, hydrocarbon and other pollutants. This analysis of current emissions presents the relative proportion of emission contribution of the major source sectors (industrial, transportation, fuel combustion, fires and incineration) in Ontario for 1980-83, identifies and quanifies the highest sulphur oxide and nitrogen oxide emitters, and indicates trends. Emissions of volatile organic compounds from anthropogenic sources in 1980 are also estimated and included.

In May 1985 the Minister of Justice tabled The Divorce and Corollary Relief Act, amending the Divorce Act so that Family lawyers are required to ask their clients about the possibility of either reconcilation or divorce mediation and to inform their clients of available reconciliation and mediation services. This inventory is designed to provide a reference tool for lawyers to assist them in advising their clients of available services. The inventory lists mediators by province, giving local addresses and telephone numbers, along with descriptive information of the services available, in alphabetical order of cities and towns.

Inventory of income security programs in Canada : recent initiatives and statistical update as of January 1987

Ottawa : Health and Welfare Canada, 1988. xviii, 210 p. : ill. Bibliogr. *CSI 21112.208.* ISBN 0-662-16012-6
MICROLOG 88-05417 3 fiche

Approximately 100 federal, provincial and municipal programs providing financial benefits to Canadians are described in the series of National Health and Welfare reports entitled Inventory of Income Security Programs in Canada. This interim report provides highlights of the changes that have occurred in these programs since the last full inventory was issued, as well as statistical updates. Used in conjunction with the July 1985 Inventory, this report gives a comprehensive summary of the income security system in Canada as it existed in January 1987.

Inventory of labour market programs and services in Manitoba operated by the provincial and federal governments

Canada. Employment and Immigration Canada (Commission). Planning and Analysis Branch. Winnipeg : The Branch, 1987. 78 p.
MICROLOG 88-01048 1 fiche

This inventory has been prepared to provide a reference of major training, employment and labour market adjustment programs operated by the Province of Manitoba and Government of Canada. This document briefly describes each labour market program in Manitoba in terms of general program description, identification of clients, planned investment dollars and anticipated output in terms of clients served and people employed. The annual time frame spans the fiscal year April 1, 1987 to March 31, 1988 which is common to both federal and provincial governments.

Inverarden : retirement home of fur trader John McDonald of Garth

by R.J. Burns. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1979. 240 p. : ill. Bibliogr. (History and archaeology ; 25) *Bound with: A Study of surface-mounted door locks from a number of archaeological sites in Canada.* ISBN 0-660-10180-7
MICROLOG 88-04065 3 fiche

In 1816, after 23 years in the western fur trade, North West Company wintering partner John McDonald of Garth retired to eastern Upper Canada where he lived as a country squire until his death 50 years later. He built an impressive residence.. now called Inverarden, in the Regency Cottage style in 1816. This report outlines McDonald's retirement career and traces the construction of and later modifications to his house. It also deals with the historical landscape.

The inverse power transformation logit and dogit mode choice models -- Rev.

by M.J.I. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1979. 15 p. Bibliogr. (Publication ; no. 96) (Cahier ; no 7803)
MICROLOG 88-06370 1 fiche

Paper which suggests a way of approaching two problems which occur in the explanation of the choice of travel mode. The first problem is that of the systematic underestimation of the choice probabilities of travel modes at the "end" of the distribution in logit models, a problem which arises when consumers choose certain modes despite their apparant attractiveness (the thin equals tails problem). The second problem is that of the asymmetry of the consumers' potential response function in mode choice contexts. Inverse Box-Cox and Box-Tukey monotonic transformations are applied to the exponential functions of logit and dogit models. It is also suggested that inverse power transformations introduce imperfect modeler information in the logit model and that in the dogit subclass, it is possible to distinguish between modeler ignorance of the characteristics of alternatives and consumer captivity to these alternatives. The paper concentrates on the formal description of IPT models and minimizes the use of practical examples and the references to the travel demand literature.

Investigation of PCBs in domestic submersible water well pumps

Ontario. Water Resources Branch. Drinking Water Section. Toronto : The Section, 1987. vii, 44 p. : ill. Bibliogr. ISBN 0-7729-2676-X
MICROLOG 88-01142 1 fiche

The first part of an Ontario Environment investigation of the PCBs in domestic submersible water well pumps showed that the scope of the issue is limited to relatively few wells in the province. Although homeowners whose wells have pumps with PCBs are at low potential risk, Environment Ontario has developed a program to help these homeowners determine: if their pumps are among the relatively few that could contain PCBs; and if their pump are leaking PCB oils into their water supplies. The second part of the investigation aims at identifying wells containing PCBs that came from leaked pump motor oils, and advising affected homeowners about remedial measures. Minisrty staff will investigate cases of suspected oil leakage and possible presence of PCBs in well waters.

Investigation of the explosion hazards of hydrogen sulphide, phase II

by I.O. Moen. Ottawa : Atomic Energy Control Board. 1986. vi, 83 p. : ill. Bibliogr. (Research report ; INFO-0180-2)
MICROLOG 88-06131 1 fiche

Hydrogen sulphide is used in large quantities during the production of deuterium oxide (heavy water). It is flammable in air at normal conditions, which therefore makes it necessary to assess the potential hazards caused by combustion following an accidental spill. This investigation quantifies the explosion hazards of hydrogen sulphide in air. Phase I focussed on the detonation properties of hydrogen sulphide-air mixtures. Phase II describes investigations on flame acceleration and transition to detonation in obstacle environments simulating a heavy water plant.

An Investigation of the extraction of deactivating components from synthetic crudes with supercritical carbon dioxide

Technitrol Canada ltée/Ltd., Pointe Claire, Que. : Technitrol Canada ltée/Ltd., 1988. 40 p. Bibliogr. *CANMET contract: OSQ84-00386*
MICROLOG 88-03176 1 fiche

Synthetic crudes derived from bitumen, heavy oils and residuals generally contain more nitrogenous and sulphurous components than conventional oils and require considerably more processing. Four heavy oils (Suncor Coker Kerosene, Syncrude Coker Gas Oil, Syncrude Coker Naptha and Suncor Coker Gas Oil) were extracted with supercritical carbon dioxide in an attempt to remove sulphur and nitrogen containing compounds. In all, 59 extractions were carried out under a variety of temperatures and pressures. The use of certain co-solvents such as water, methanol and acetic acid was investigated and the extracted fractions were submitted to CANMET for micro analysis.

An Investigation of the measurement of streamflow under winter conditions : international hydrometric gauging station on the Red River at Emerson, Manitoba, Canada

by P.M. Pelletier. Ottawa : Environment Canada, Conservation and Protection, Inland Waters and Lands, Western and Northern Region, 1988. x, 166 p. : ill. Bibliogr.
MICROLOG 88-02081 2 fiche

Report on an investigation in 1985 into the measurement of streamflow under winter conditions on the Red River at Emerson, Manitoba, as part of an attempt to explain discrepancies in streamflow data between the United States and the Canadian gauging stations. The report describes the hydrology of the Red River basin, an outline of the current hydrometric practices used by the United States Geological Survey and the Water Survey of Canada, including the procedures for the operation of an International Gauging Station. The definition of the problem and the methodology employed are explained, and field data and laboratory data are presented and analyzed. Differences investigated include the effect of depth soundings, suspension; current meter rating procedures: current meter design; limited number of observations in the vertical; and limited time of exposure.

Iterative methods for solving an equilibrium problem arising in transit deregulation

by P. Marcotte, L. Zubieta and O. Drissi-Kaitouni. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 13 p. : ill. Bibliogr. (Publication ; no. 568)
MICROLOG 88-03980 1 fiche

Transit deregulation is a very controversial issue, since in most western urban areas, the public transportation service is under the control of a centralized transit authority responsible for the planning of an operation of the system, with subsidies necessary for its operation. Recently, a traffic equilibrium model involving cars, transit users and bus operators with a deregulated context where each individual bus driver can decide which line he is going to operate was proposed. This paper presents and gives numerical results for iterative algorithms that solve the bus-operators subproblem arising in the first formulation of the model for a small network composed of 29 nodes and 8 bus lines and for the transit network of the city of Santiago de Chile.

L'entraide est une façon de confronter les problèmes auxquels nous devons tous faire face de temps à autre dans notre vie. Ce guide s'adresse aux personnes qui veulent fonder de nouveaux groupes d'entraide ou qui veulent améliorer le fonctionnement de leur propre groupe. On élabore différents concepts relatifs à la notion d'entraide et examine plusieurs espèces de groupes d'entraide. On s'adresse aussi aux personnes qui veulent fonder un groupe d'entraide et fournit quelques façons pratiques de découvrir les personnes qui partagent un intérêt commun et propose différentes méthodes de créer un groupe. Finalement, on s'adresse aux groupes qui fonctionnent depuis quelques temps et explique en détail comment un groupe peut maintenir sa vitalité.

Job analysis

Winnipeg : Manitoba Labour, Pay Equity Bureau, 1988. 40 p. Bibliogr. (Pay equity, equality at work ; 2)
MICROLOG 88-05815 1 fiche

The introduction of pay equity has heightened the importance of job evaluation and two of its basic components, job analysis and job descriptions. Job analysis is the process of collecting, verifying and recording the duties and minimum requirements necessary to perform a job. Job analysis is not a study of the employee's performance, but of the duties and requirements of the job itself. A job description is the result of job analysis and is a list, written in a logical sequence, of the duties and responsibilities of a job. The purpose of this booklet is to assist those involved in the pay equity process by presenting an overview of questionnaire design, job descriptions, job documents, and rating.

Job evaluation

Winnipeg : Manitoba Labour, Pay Equity Bureau, 1988. 30 p. Bibliogr. (Pay equity, equality at work ; 1)
MICROLOG 88-05814 1 fiche

Manitoba's Pay Equity Act requires specific employers and representatives of employees to examine their wage setting practices to determine if gender discrimination exists. Some form of job evaluation is essential in the process of implementing pay equity. Measuring jobs against the common factors of skill, effort, responsibility and working conditions makes it possible to determine whether job classes are of equal or comparable value, and thus, whether female-dominated job classes are being paid equitably. The purpose of this booklet is to acquaint parties with the requirements of the Act which relate to this important first step in the process, and to outline the types of job evaluation currently used. The booklet also discusses the problem of potential gender-bias in job evaluation systems.

Job futures : an occupational outlook to 1995 : 1988-89 edition

Canadian Occupational Projection System : COPS. Ottawa : Employment and Immigration Canada, 1988. 2 v. : ill. *Contents: V. 1 Experience of recent graduates -- v. 2 Occupational outlooks. French ed. (Emploi-avenir...) : 88-02859/9. CSI 21126.006.* ISBN 0-660-12614-1
MICROLOG 88-02858 9 fiche

Job Futures is a product of the Canadian Occupational Projection System, a labour supply and demand information and data bank designed by the Department. This publication concentrates on the link between the educational system and the labour market through the analysis of the labour market outcomes for graduates from over 100 fields of study at the post-secondary level appearing under the following subject groups: arts; business, commerce, management and administration; education; engineering and engineering technologies; humanities; medicine and health; natural sciences and primary industries; physical sciences; and social sciences and services. Includes a index to specific fields of study. Also provides information on the current and future labour market situations for selected occupations.

Joint fit-up tolerances and adaptive control for gas-tungsten-arc root-pass all-position pipe welding

by P.Y.Y. Maak and J.G. Galloway. Toronto : Ontario Hydro, Research Division, 1987. iii, 20, 9 p. : ill. Bibliogr. (Report ; no. 87-125-K)
MICROLOG 88-00150 1 fiche

As part of the Automated Pipe Welding Program, research studies are being carried out to improve existing mechanized pipe welding procedures and systems for field welding of large diameter piping. This report presents the results of P-GTA root-pass welding studies carried out to develop all-position P-GTA welding procedures for a wide range of weld joint fit-up conditions; to determine the tolerance of the mechanized P-GTA welding process to joint fit-up variations, assuming a consistent machined land thickness; to determine suitable adjustments of welding parameters to permit the extremes of joint fit-up to be welded; to establish suitable control strategies for adaptive control of P-GTA root-pass pipe welding; and to identify necessary enhancement to existing mechanized P-GTA welding systems such as computer intelligence and sensor systems.

La Juridiction et les responsabilités du Comité catholique

Québec : Gouvernement du Québec, Comité catholique, 1987. 29 p. Bibliogr. ISBN 2-550-13943-7
MICROLOG 88-04853 1 fiche

Depuis la création du Comité catholique par la Loi sur le Conseil supérieur de l'éducation de 1964, on s'interroge sur la portée exacte de sa juridiction et de ses responsabilités. Le Comité a cru utile de réunir en un seul document les éléments essentiels à l'interprétation de ces éléments. Tout d'abord, ce document retrace l'histoire de l'institution du Comité et examine les intentions qui ont inspiré sa création. Ensuite, il fait état des pouvoirs que la Loi sur le Conseil supérieur de l'éducation confère au Comité et il analyse la portée de ces pouvoirs. Enfin, il traite de quelques aménagements qui assurent les liens nécessaires entre le Comité catholique et les autorités de l'Eglise catholique.

Key areas for birds in coastal regions of the Canadian Beaufort Sea

by S.A. Alexander...et al. Edmonton : Canadian Wildlife Service, Western and Northern Region, 1988. vii, 146 p. : maps. Bibliogr. ISBN 0-662-16165-3
MICROLOG 88-03342 2 fiche

Information pertaining to avian distribution and abundance along the Canadian Beaufort Sea coast was summarized and used to evaluate the importance of the coastline to birds. Seasonal differences in the requirements of birds were considered through separate evaluations in spring migration (May to mid-June), nesting (June to mid-July), molting/broodrearing (mid-July to mid-August), and fall migration (mid-August to late September). The evaluations are presented in a series of 10 maps as colour-coded delineations of regions of high, moderate, variable and low avian use. For each region in each time period there is a description of the major aspect of avian use (which may include comments on local population estimates, behaviour, year to year variations in numbers, and local movements of birds), and a listing of some of the data used in the evaluations. A general discussion on the limitations of the data used is presented in the introductory sections as an aid to the interpretation of information contained in the report.

Kitchener landfill gas utilization project

Conestoga-Rovers & Associates. Ottawa : Environmental Protection Service, 1987. viii, 52 p. : ill., maps. (Report : EPS 3-UP-4) ISBN 0-662-15604-8
MICROLOG 88-00739 1 fiche

The Regional Municipality of Waterloo presented a proposal and application for a proposed landfill gas extraction and utilization system at the landfill site in Kitchener, Ontario. Phase I consisted of the design and installation of a pumphouse and pumping equipment; fifteen southern sector wells; gas transmission lines; and the conversion of one boiler at Bestpipe for acceptance of landfill gas as a fuel supply. The completion was delayed because of low methane concentrations and operational difficulties upon start-up. The researchers undertook an extensive investigation to determine the cause of the operational difficulties and a Phase I Optimization Plan was carried out with a modified Phase II plan recommended. This report presents a comprehensive review of the project as completed in February 1985.

L-1.2 : a program for Box-Cox transformations in regression models with heteroskedastic and autoregressive residuals

by T.C. Liem, M.G. Dagenais and M.J.I. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. iii, 81 p. Bibliogr. (Publication : no. 510) (Cahier : 8714)
MICROLOG 88-00024 1 fiche

L-1.2 is a program designed to deal with the specification of the functional form in the generalized single-equation regression model. Fixed or estimated parameters in the Box-Cox transformations can be associated with the dependent and groups of independent variables, which may be simultaneously modified by a chosen autocorrelation structure in which the autoregressive parameters are estimated, and by a selected functional form of heteroskedasticity. The asymptotic covariance matrix of all parameter estimates of the system is computed. A number of useful outputs, including elaborate statistics associated with forecasts and plots of the likelihood functions, can also be obtained.

Laboratory and field evaluation of a new radon progeny working level monitor using low-power CMOS electronics

by J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iii, 18 p. Bibliogr. (Report ; MRL 87-117(TR))
MICROLOG 88-01184 1 fiche

Miniaturized personal dosimetry instrumentation for the measurement of alpha-particles from radon decay products found in uranium mines and mills, and in certain building materials, is of great practical value for monitoring radiation levels to which radiation workers and general public alike are exposed. The measurement of radon progeny is particularly difficult because of the requirement for a portable unit with a high sensitivity capable of measuring radon progeny concentrations of the order of a few pCiL -1. This paper describes a dosimeter prototype of the active type that operates using a DRAM chip as an alpha-particle detector. The instrument is commercially known as the Radon Sniffer WL meter.

Laboratory and tank test evaluation of Elastol

by M.A. Bobra...et al. Ottawa : Environment Canada, Environmental Protection Directorate, 1987. x, 108 p. : ill. (Report ; EE-94)
MICROLOG 88-02060 2 fiche

Study conducted to determine the performance of a new spill treating agent called Elastol. When applied to oil, Elastol imparts a viscoelastic property which improves the efficiency of oil spill cleanup. This study focused on the effect of Elastol on selected oil properties and physical processes to which oil slicks are subjected. Experiments were performed in three stages: small-scale laboratory experiments, followed by small, and then large scale wave generating tank tests.

Laboratory confirmation of methods of determination of respirable combustible dust

by E.D. Dainty...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. v, 15 p. : ill. Bibliogr. (Report ; MRL 87-3(TR))
MICROLOG 88-03385 1 fiche

Because of significant differences in underground gravimetric measurements of respirable combustible dust (RCD), with and without the use of a pre-separating cyclone to pass only the respirable fraction, it was decided to make confirmatory laboratory determinations. Three tests on each of three different days were conducted in a simulated mine environment produced by diluting the exhaust flow of a steam-cleaned Deutz F6L 912W engine by fresh air from the test cell ventilation system.

Lake Huron index fishing program

by D.N. Hughes. Owen Sound, Ont. : Ontario Ministry of Natural Resources, Lake Huron Fisheries Assessment Unit, 1987. vi, 49 p. Bibliogr. (Report ; 2-87)
MICROLOG 88-02024 1 fiche

Monitoring of relative abundance of pre-result lake whitefish, bloater (chub), and yellow perch was continued in several areas of Lake Huron during 1986. In the central and southern portions of the Huron basin itself, graded mesh index gillnetting was performed in both June and September, providing information on all three commercial species. Index gillnetting for lake trout backcross in southern Georgian Bay in August also permitted assessment of whitefish, chub and perch stocks. North Channel populations of lake whitefish and yellow perch were studied through index gillnetting operations begun during July and August 1986 at Blind River and Clapperton Island. The larval cohort of lake whitefish in east-central Lake Huron was also monitored, as has been done since 1978.

Lake trout exploitation stress assessment on Drag, Dickey, and Twelve Mile Lakes

by J.A. Hoyle and T.J. Steward. Bancroft, Ont. : Ontario Ministry of Natural Resources, Haliburton-Hasting Fisheries Assessment Unit, 1987. vi, 50 p.
MICROLOG 88-00484 1 fiche

Exploitation is a major stress on Ontario lake trout stocks. In order to identify overexploitation of a stock before it begins to fail (i.e., decreased yields or complete collapse of the fishery), the use of biological attributes such as yield, abundance, age structure, growth and maturity were suggested. This report determines the level of exploitation of 3 Haliburton-Hastings Fisheries Assessment Unit lake trout lakes (Drag Lake, Dickey Lake, Twelve Mile Lake), as well as providing baseline estimates for comparison with other lakes and to the study lakes over time. The focus is on native lake trout only.

Lake trout studies : Clearwater Bay, Lake of the Woods, 1984-87

by T. Mosindy. Kenora, Ont. : Ontario Ministry of Natural Resources, Lake of the Woods Fisheries Assessment Unit, 1987. vi, 44 p. : ill. Bibliogr. (Report ; 1987:02)
ISBN 0-7729-3409-6
MICROLOG 88-05168 1 fiche

Lake trout are currently resident in the Clearwater - Cul de Sac - Echo Bay areas within the North Sector of the Lake of the Woods. These populations have come under increasing harvest pressure from a growing winter angling fishery, as well as continuing cottage and shoreline development. Intensive studies to address these concerns were initiated during the 1984-85 North/Central Sector monitoring program. These included: a water quality monitoring program during open water in 1984; lake trout spawning habitat and population assessment during the summer and fall of 1984 and 1985, and creel surveys of the winter angling fishery during 1986 and 1987. This report presents the results of this program.

Land use and market area analyses of mega-food stores in Edmonton

by E. Egyedy. Edmonton : Edmonton Planning and Building, Corporate Forecasting, 1988. v, 30 p. : maps. Bibliogr. (Research paper ; no. 22)
MICROLOG 88-06079 1 fiche

A new approach to food retailing has developed with the building of mega-food stores which combine the sale of food and non-food items in one larger operation. These giant stores are changing the shopping habits of some consumers and, as well, retail market areas. This report assesses mega-food stores in Edmonton by examining their land use and primary trade areas. A set of land use criteria for mega-food stores have been established and then related to a consumer license plate survey to determine the market extent of these stores. The study identifies the unique land use development patterns which are characteristic to mega-food stores and then relates this information to market areas.

Land use and zoning study of Victoria Avenue East -- Revised

Regina : Regina Urban Planning Dept., 1988. 31 p. : maps.
MICROLOG 88-05849 1 fiche

Limited direct access for the passing motorist and hence the poor marketability potential of the affected properties currently zoned as Highway Service have resulted in large amounts of vacant land within the area referred to in this study. This issue has led affected property owners and members of the development industry to question the appropriateness of the present zoning and land uses as they pertain to the study area. Earlier this year, a rezoning application to allow the development of a wider range of commercial uses including professional offices and specialty shops was approved by City Council. This review identifies appropriate zoning which will facilitate a desirable range and distribution of land uses within the study area, taking into account current development potential and the future role of Victoria Avenue East in this portion of the city.

Land use bylaws : their influence on agriculture in Alberta

by T. Hursin. Edmonton : Alberta Agriculture, Land Use Branch, 1988. v, 153 p. : maps. Bibliogr.
MICROLOG 88-04381 2 fiche

In 1982, the provincial government established specific policy directions for the conservation of better agricultural lands. The Alberta Planning Board instructed regional planning commissions to provide for the conservation of better lands by defining, for the guidance of their member municipalities, criteria for identifying these lands. Individual municipalities have been given regulatory authority to identify and protect better agricultural lands for uses related to agriculture. However, responsibility for land use issues ultimately lies with the province, and therefore, it is useful to periodically review agricultural land conservation regulations established by the rural municipalities. This study examines variations in municipal land use regulations and assesses their influence on agriculture.

Land use change evaluation of Canadian LRTAP calibrated watersheds

by J.C. Moyes. Ottawa : Environment Canada, Conservation and Protection, Inland Waters/Lands Directorate, 1987. viii, 111 p. : ill. Bibliogr. (Working paper ; no. 51) *French ed. (Evaluation des modifications...) 88-01160/2.* ISBN 0-662-15130-5
MICROLOG 88-01159 2 fiche

Through the Long Range Transport of Airborne Pollutants (LRTAP) Program, federal and provincial agencies have cooperated in establishing five major calibrated watershed areas in Eastern Canada. These sites, located at the Experimental Lakes Area, Turkey Lakes, and Dorset in Ontario, Lac Laflamme in Quebec, and Kejimkujik National Park in Nova Scotia were selected in order to conduct baseline ecosystem dose-response research. An important factor in ecosystem response to acid deposition is ecosystem stability and land use change. This report documents historical and chronological land use change in the five calibrated watershed through air photo interpretation of the watersheds between 1920-1950 and 1950-1980. The document also provides an ecological description and an interpretation of the regional representativeness of each of the watershed areas.

Land use policies for the R.M. of Sherwood -- Revised

Regina : Regina Planning Dept., 1984. 13 p.
MICROLOG 88-05847 1 fiche

The Rural Municipality of Sherwood completely surrounds the City of Regina. Over the years, the City has annexed land from the Rural Municipality to accommodate urban growth. This document articulates the general objectives and policies regarding land use in the Rural Municipality. From these adopted policies specific implementation recommendations have been made regarding potential development in the Rural Municipality for the various general types of land use. These policy objectives and policy recommendations constitute the basic planning statement that provides the basis on which the zoning bylaw is drafted.

Land use study of the 4300 to 7300 blocks of Dewdney Avenue

Regina : Regina Planning Dept., 1987. 28 p. : maps.
MICROLOG 88-05846 1 fiche

The 4300 to 7300 Blocks of Dewdney Avenue form the boundary between the predominantly low density older suburban residential precinct in the northwest portion of Regina, and the large institutional and public service holdings in the southwest sector. Dewdney Avenue is an arterial thoroughfare which carries traffic from the nearby neighbourhoods to the downtown, industrial areas and other destinations in the city. A recent commercial development and a request for additional commercial rezoning on the north side of Dewdney Avenue has led to a questioning of the current policies and protective land use regulations as they pertain to this residential edge. The overall purpose of this study is to identify development policies and zoning standards which will facilitate an appropriate range and distribution of land uses along Dewdney Avenue in the study area, taking into account current development and the future role of Dewdney Avenue in the city.

A Large-sample extractor for determining organic contaminants in the Great Lakes

by M.A. Neilson...et al. Burlington, Ont. : Inland Waters Directorate, National Water Research Institute, Canada Centre for Inland Waters, 1988. vii, 23 p. : ill. Bibliogr. (Technical bulletin ; no. 157) *French ed. (Extracteur a grand...) : 88-06237/1.* ISBN 0-662-16078-9
MICROLOG 88-06238 1 fiche

The construction and operation of two large-sample extractors onboard the *CSS Limnos* are described. They can extract water at up to 1L(min -1) and were used to extract water samples of approximately 50L volume with dichloromethane during the monitoring cruises on lakes Erie, Huron, Ontario and Superior in early 1986. Both whole water and clarified water were extracted. The dichloromethane extracts were later analyzed for organochlorines, chlorobenzenes, polychlorinated biphenyls, and polynuclear armatics. A solution containing surrogate standards was continuously added at a fixed rate to the water being extracted. The recoveries of these surrogates provide a continuous measure of the extraction efficiency and reproductibility of the analytical process, and confirm that the processes used are valid.

Laser Raman spectroscopy as a probe of surface structures

by L. Mannik. Toronto : Ontario Hydro, Research Division, 1987. 9 p. : ill. Bibliogr. (Report ; no. 87-255-K)
MICROLOG 88-01728 1 fiche

There is an ever-increasing need in Ontario Hydro for methods of analyzing the structure of materials and how this structure is altered during service, for example the hydriding and oxidation of pressure tubes in nuclear reactors. Laser Raman spectroscopy is an optical scattering technique which is useful in identifying the molecular structure of solid surfaces. This report outlines the basic concept of this diagnostic tool and presents the results of preliminary laboratory measurements on ceramic high temperature superconductors and the surface oxide on the Zr-2.5% Nb alloy used for CANDU pressure tubes.

Late winter hydrography of the Northwest Passage : 1982, 1983 and 1984

by B.R. de Lange Boom, H. Melling and R.A. Lake. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1988. xvi, 165 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 79) ISSN 0711-6774
MICROLOG 88-05819 2 fiche

Observations acquired during extensive surveys of seawater temperature and salinity within the waterways of the Canadian Arctic Archipelago between 1982 and 1984 are combined with existing data to produce an up-to-date description of the physical oceanography of this part of Canada's Polar Continental Shelf. The data are presented as contoured channel sections, maps of selected hydrographic properties and composite temperature-vs.-salinity diagrams. These graphic presentations are discussed in terms of baroclinic flows derived using the dynamic method, and in terms of water-mass transformations of both seasonal and adjective origins. Where possible, observed features have been related in a heuristic manner to physical processes in the atmosphere and ocean.

Late Wisconsinan stratigraphy and sand and gravel resources in the Rural Municipality of Lac du Bonnet and Local Government District of Alexander

by G. Matile and H.D. Groom. Winnipeg Manitoba Energy and Mines, Mines Branch, 1987. iv, 44 p. ; ill. Bibliogr. (Aggregate report ; AR85-2) *Fold. maps not filmed*
MICROLOG 88-01892 1 fiche

The stratigraphy of the Belair and Milner Ridge moraines was examined during the course of an aggregate resource inventory carried out in the Rural Municipality of Lac du Bonnet and the Local Government District of Alexander. Potential deposits were first delineated on 1:50,000 scale airphotos, incorporating information from pit inventory files of the Dept. of Highways and Transportation Services and from soil maps. During field mapping, all gravel pits were visited and samples collected from deposits considered to be of economic value, followed by a backhoe program designed

Lateral load behaviour of drilled piers in Leda clay

by H.S. Radhakrishna and R.H.K. Tsang.
Toronto : Ontario Hydro, Research Division, 1987. i, 81 p. : ill. Bibliogr. (Report : no. 87-19-K)
MICROLOG 88-01727 1 fiche

Steel pole structures with drilled pier foundations are used increasingly by electrical utilities to improve appearance and compactness of the transmission corridor for urban areas. Ontario Hydro's proposed 500 kV transmission line in Eastern Ontario traverses areas covered by Leda clay, a clay of high sensitivity. A load test program was carried out by installing 11 fully instrumented full-scale foundations in Leda clay at the Gloucester test site near Ottawa. This report presents the results of the lateral shear and overturning moment tests under short-term loading conditions. The influence of construction disturbance, the foundation depth to diameter ratio and the moment to shear ratio were investigated and test results compared with theoretical predictions made by the computer code Pier Analysis and Design for Lateral Loads (PADLL).

The Law and farm credit : knowing your legal rights -- 2d ed.

by S. Lee. Winnipeg : Manitoba Agriculture, 1987. 48 p. Bibliogr.
MICROLOG 88-03577 1 fiche

This booklet is designed as a guide to options for a farmer who is facing severe financial difficulties. It explains types of loan and credit available and what is involved in the rights, remedies and responsibilities of all parties concerned. Discusses long-term financing through real property mortgages, intermediate and short-term financing through chattel mortgages, security under the Personal Property Security Act, section 178 of the Bank Act, conditional sales agreement, trade credit, sources of credit, including credit unions and caisses populaires, near banks, the Manitoba Agricultural Credit Corporation, the Farm Credit Corporation, dealers and supplies, and private source. Discusses funding the farming operation from lands to equipment and buildings, and outlines steps to avoid financial difficulty and bankruptcy procedures.

MICROLOG 88-03142 2 fiche

The potential of producing lead, and other base metals, from sulphide concentrates or ores in a chloride medium has been under consideration for several decades. The interest in trying to develop processes based on chloride leach/electrolysis has increased. This study involved a technical review of the state-of-the-art of the development of fused salt and aqueous electrolysis methods for producing lead from lead chloride produced by the ferric chloride leaching of sulphide concentrates, a comparison of these electrolysis processes, a conceptual design for a pilot plant scale cell, and formulation of guidelines for future work. The review, based on information compiled during a visit to the selected research centres and production facilities, and on published data, includes eight fused salt electrolysis, ten aqueous electrolysis and four other related technologies.

Leisure and aging in Manitoba

report to Culture, Heritage and Recreation, by Mark S. Searle. Winnipeg : Culture, Heritage and Recreation, 1987. vii, 225 p. *CSI 41106.200.*
MICROLOG 88-01334 3 fiche

Since the end of World War II, the leisure services system has expanded at an unprecedented rate, with a concentration on services available for the youth population. This report identifies the problems of Canada's aging population and oversights that have recently been identified, leading to increased attention towards leisure services for those aged 55 and over. Describes patterns of general leisure behaviour and assesses the level of satisfaction with current behaviour. Identifies activities desired but not participated in and explores the barriers preventing participation, with an assessment of the differences in objectives in leisure programs based on various demographic factors. Recommends a framework for the effective development and delivery of community leisure services to individuals aged 55 and over.

Length and weight of fish delivered by thick-billed murres to their chicks at Digges, Coburg and Coats Islands, N.W.T., 1980-1987

by A.J. Gaston. Ottawa : Canadian Wildlife Service, 1987. 37 p. Bibliogr. (Technical report series ; no. 5) ISSN 0831-6481
ISBN 0-662-15709-5
MICROLOG 88-01163 1 fiche

Fish found on breeding ledges were collected in the course of field work carried out at the thick-billed murre colonies on Digges, Coats and Coburg Islands during 1980-87. This report is a preliminary attempt to summarize data on the fish collected, particularly where it related to length-weight relationships, useful in determining the weight at delivery of fish collected in a dehydrated condition (a large proportion at times), or of fish seen delivered, where the length could be accurately estimated. Where the specimens were fresh and complete they were weighed and their fork-lengths measured. Information from other studies in the North American Arctic, and data from the Fisheries Research Board of Canada files were also included where relevant. Measured fish include Arctic cod, capelin, sand lance, and sculpins.

Levels of polychlorinated dibenzodioxins and polychlorinated dibenzofurans in eggs of great blue herons *Ardea herodias* in British Columbia, 1983-87 : possible impacts on reproductive success

by J.E. Elliott...et al. Ottawa : Canadian Wildlife Service, 1988. 7 p. : ill., map. Bibliogr. (Progress notes ; no. 176) *French ed. (Teneurs en dibenzodioxinnes...) : 88-04743/1.*
MICROLOG 88-04584 1 fiche

In 1982, a survey of polychlorinated dibenzo-p-dioxin (PCDD) and polychlorinated dibenzofuran (PCDF) levels in Canadian wildlife revealed that great blue heron eggs from a colony in the Fraser River estuary contained unusually high levels of PCDDs. PCDDs and PCDFs are trace contaminants in chlorophenols used for wood preservation and are formed in the manufacture of bleached kraft wood pulp; they are potent avian embryotoxins. This report gives the results of studies undertaken in 1983-87 to measure PCDD and PCDF levels in heron eggs from several colonies along the Strait of Georgia and to determine their effect on great blue heron reproductive success.

LIF waste characterization for handling/disposal, 1986

by A. Golomb. Toronto : Ontario Hydro, Research Division, 1987. i, 57 p. : ill Bibliogr. (Report ; no. 87-146-K)
MICROLOG 88-00149 1 fiche

Ontario Hydro is in evaluating acid gas emission control by direct injection of pulverized limestone into the furnace, along with the effectiveness of using slaked lime and other alternative dry sorbents. Extended testing of direct limestone injection into the furnace (LIF) for acid gas control was scheduled to be held at Lakeview TGS in July/August 1987. To generate useful design data for improved handling/disposal of wastes from the furnace sorbent injection process, detailed waste characterization has been carried out on a selected "worst case" (highest CaO) wastes from two previous trials at Lakeview TGS, and on two wastes derived from pilot-scale tests at the Combustion Research Facility, Research Division. The samples were examined in terms of principal chemical and physical properties, before and after fixation by water addition. Based on the experimental results, recommendations are made for future work.

Les Limitations des attributs économiques du droit d'auteur

par G. Roussel. Québec : Ministère des affaires culturelles, Direction des services aux artistes, 1987. 72 p. Bibliogr. (Etudes)
ISBN 2-550-18082-8
MICROLOG 88-04858 1 fiche

La loi canadienne sur le droit d'auteur comporte, comme toute législation de *common law*, de nombreuses limitations au monopole exclusif de l'auteur sur son oeuvre. Ces restrictions sont justifiées tantôt pour des raisons d'intérêt public, tantôt pour un plus grand accès à l'information, tantôt pour des motifs d'ordre pratique. Dans ce document, on traite d'abord de la situation générale de ces limitations au Canada puis de trois d'entre elles: la copie privée, l'utilisation pour fins d'enseignement et l'enregistrement éphémère. Pour chacune de ces formes de limitations, on expose le droit dans divers pays européens et on y situe les propositions canadiennes de modification législative.

Limnological results from the 1985 British Columbia Lake Enrichment Program

by B.H. Nidle and K.S. Shortreed. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, 1987. iv, 59 p. : maps. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 631) ISSN 0706-6465
MICROLOG 88-02018 1 fiche

Results of the 1985 limnology subprogram of the British Columbia Lake Enrichment Program. Twenty-five stations in 19 lakes were sampled from 1-19 times for a variety of physical, chemical, and biological variables. Summarized data for each station and date are presented, and raw data are contained in the appendix tables.

Limnologie physique d'un lac recouvert par les glaces avec écoulement sous-jacent : lac Laberge au Yukon

par E.C. Carmack. Saskatoon, Sask. : Direction générale des eaux intérieures et des terres, Institut national de recherche en hydrologie, 1987. vii, 58 p. : ill. Bibliogr. (Rapport de l'INRH ; no 35) (Série scientifique ; étude no 157) *L'éd. anglaise (Physical limnology of an...) sur la même fiche.* ISBN 0-662-94726-6
MICROLOG 88-03010 2 fiche

L'objectif de l'Expérience de saisonnalité glacielle du Yukon est d'expliquer les processus physiques qui influent sur le manteau glaciel dans les réseaux hydrographiques (lacs et cours d'eau) du Nord. A cette fin, des études limnologiques ont été effectuées durant les hivers 1982-1983 et 1983-1984 dans le lac Laberge, qui est un lac long, étroit, profond et à temps de séjour moyen du Yukon. Ce rapport décrit l'évolution de la structure thermique, la croissance et la désintégration de la glace, ainsi que les conditions météorologiques et hydrologiques associées.

Line intersect sampling for the density and bark area of logging residue susceptible to the spruce beetle *Dendroctonus rufipennis*, Kirby

by L. Safranyik and D.A. Linton. Victoria : Pacific Forestry Centre, 1987. 10 p. : ill. Bibliogr. (Information report ; BC-X-295) ISSN 0830-0453 ISBN 0-662-15845-8
MICROLOG 88-02381 1 fiche

The spruce beetle is a highly destructive pest of mature spruce in North America. Fresh logging residue is readily infested by spruce beetles. As part of a study of population dynamics of the spruce beetle carried out in central British Columbia from 1972-80, yearly estimates of the density and bark surface area of logging residues were needed. This report compares estimates of the density and bark area of stumps based on fixed plots and line intersects; determines sample sizes required for a predetermined degree of precision; and develops a method of estimating densities and bark areas of stumps based on counts only of the intersected places.

Lingcod hook and line survey in the Gulf Island region (Statistical Area 17) of the Strait of Georgia, October-December 1985

by A. Cass and L.J. Richards. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. iii, 65 p. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1934) ISSN 0706-6473
MICROLOG 88-00940 1 fiche

A lingcod hook and line survey was conducted in the Gulf Island area of the Strait of Georgia during October-December 1985 to compare research catch-per-unit-effort (CPUE) with the CPUE determined from sales records of the hook and line fishery. This report presents an analysis of the first year of a proposed 3-year study. Testing was done for the effects of the fishing method, depth, sea condition, cloud cover, time of day, current and tide on CPUE.

Lithogeochemistry (including gold) of altered and mineralized samples from the Burnthill Brook area of central New Brunswick

by L.R. Fyffe and H.E. MacLellan. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1988. 92 p. : maps. (Geoscience report ; 88-1) *Fold. maps not filmed.* ISSN 0838-2565
MICROLOG 88-04697 2 fiche

Detailed geologic mapping of the tin-tungsten-bearing granites in the Burnthill Brook area was carried out in the summer of 1985 and 1986. Several hundred rock specimens were collected during this program and of these, 52 altered samples were selected for geochemical analysis in order to evauate the metallic mineral potential of the area. These samples represent variously greisenized, feldspathized, and brecciated lithotypes within the granitic plutons as well as quartz veins and silicified stockworks from the plutons and their surrounding country rocks. Many of the samples were collected from known mineral occurrences, and contain visible mineralization.

Location-routing problems

by G. Laporte. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. 61 p. : ill. Bibliogr. (Publication ; no. 506) (Cahiers du GERAD ; G-87-05)
MICROLOG 88-00022 1 fiche

Location-routing problems involve simultaneously locating a number of facilities among candidate sites and establishing delivery routes to a set of users in such a way that the total system cost is minimized. This paper presents a survey of such problems. The main examples and applications found in the literature are described. Heuristic and exact algorithms for their solution are then presented.

La Loi sur la responsabilité de la Couronne est-elle à l'heure de 1986

par J. Rousseau. Ottawa : Bibliothèque du Parlement, Service de recherche, 1986. 24 p. Bibliogr. (Etude générale ; BP-157F) *L'éd. anglaise (The Crown Liability...) sur la même fiche.* ISBN 0-660-92032-8
MICROLOG 88-00696 1 fiche

La Loi sur la responsabilité de la Couronne (Loi de 1953) constitue actuellement le fondement législatif de la responsabilité délictuelle de la Couronne fédérale. Une question significative reste toutefois celle de l'étendue des activités du gouvernement pouvant faire l'objet d'un recours en vertu de cette loi. Cette étude tente de répondre à cette question. Quelques points sont examinés: la responsabilité délictuelle dans les activités législatives et les services publics, la jurisprudence antérieure à 1953 et la Loi de 1953.

La Loi sur les jeunes contrevenants a remplacé la Loi sur les jeunes délinquants, adoptée en 1908. Cette nouvelle loi met l'accent non pas tant sur l'intervention sociale que sur la délimitation des droits et des obligations. Ce bulletin, préparé à l'intention des parlementaires à Ottawa, résume les principaux éléments de cette loi en faisant remarquer au besoin les différences importantes entre cette dernière et l'ancienne loi. On aborde également les dispositions de la loi qui ont prêté à controverse ou qui demandent à être modifiées.

Long-term ecological behaviour of abandoned uranium mill tailings, 1 : synoptic survey and identification of invading biota

by Margarete Kalin ; for Environment Canada, Atomic Energy Control Board, Energy, Mines & Resources Canada. Ottawa . Environment Canada, Environmental Protection Service, Environmental Strategies Directorate, 1983. xiii, 130 p. Bibliogr. (Technology development report ; EPS 4-ES-83-1) ISBN 0-662-12534-7
MICROLOG 88-01148 2 fiche

In the Elliot Lake and Bancroft districts of Ontario, uranium mining-milling activities have continued with varying intensities since the early 1950s, and some of the tailings sites have been inactive/abandoned for nearly 20 years, subjected to the physical, chemical and biological forces of weathering. In 1980 a detailed investigation was initiated, with the results of the first phase of the multi-year study presented in this report. Indigenous vegetation growing on the tailings was identified and selected physical and chemical characteristics of the tailings surfaces and the water bodies on the tailings were determined. Uptake of radionuclides and heavy metal in indigenous vegetation growing on tailings was assessed and processes which appear of significance in the long-term fate of the tailings were delineated. A methodology is included.

Long-term ecological behaviour of abandoned uranium mill tailings, 3 : radionuclide concentrations and other characteristics of tailings, surface waters, and vegetation

by M. Kalin. Ottawa : Environment Canada, Environmental Protection Service, 1988. xvi, 97 p. : ill. Bibliogr. (Report ; EPS 3/HA/4) ISBN 0-662-16020-7
MICROLOG 88-03681 2 fiche

Inactive or abandoned uranium mill tailings have been studied to obtain information on some of the parameters that will enable predictions to be made about possible pathways for long-lived radionuclides to enter the surrounding environment. Populations of the major indigenous plant species that colonize these waste sites were identified. Physical and chemical data describing the surface of the uranium tailings and the associated surface water and biological data on the indigenous vegetation growing on the tailings were collected and are summarized. A comparison of physical factors and chemical factors of the tailings surface from three sites (Bancroft, Elliot Lake, and Uranium City) with soils from nearby control areas is presented. Similar physical and chemical characteristics were determined for surface waters and the results from these analyses are compared with those derived from leachate solutions from the root-zone depths of tailings. Vegetation are analyzed for radionuclide concentrations, and above-ground biomass and associated litter accumulations were also analyzed.

LRC Wheel/Rail Interaction and Suspension Program : final report

prepared for Transportation Development Centre, Transport Canada, by David D. Taylor. Montreal : Bombardier, Rail & Diesel Products Division, 1986. xv, 32, 115 p. : ill.
MICROLOG 88-00287 2 fiche

The VIA Rail LRC locomotives, with the CN modified Heumann wheel profile, became unstable after 20,000-30,000 miles of wear. The goal of this project was to understand the effect of wheel/rail interaction geometry on stability. Researchers tested a suspension modification, validated a non-linear computer model using filed data and conducted a sensitivity analysis of LRC locomotive stability to rail inputs and suspension changes. Wheel and rail measurements were taken by CN Research, and were combined to provide effective conicity and contact angle data under stable and unstable (hunting) conditions. The computer model was successfully validated using this information. The report describes main observations and conclusions, proposes a theory for the destabilizing effect of wear and discusses a means of further increasing the critical hunting speed of the locomotives.

MICROLOG 88-00356 1 fiche (Available on fiche only)

Paper analyses the effects of various welfare programs on aggregate economic variables. The analysis focuses on the effects of programs on the saving-consumption decisions of households and considers the effects and desirablity of the various cash programs from an economic point of view. Four types of programs are considered: age-related public pension plans, unemployment insurance, child-related assistance, and welfare. Variables analysed are: capital stock, economic growth rates, inflation, unemployment rate. Also analyses the effects of economic conditions on income security programs and the level of poverty.

The Management of underwater cultural resources : an overview

by S. Finley. Fredericton : Tourism, Recreation and Heritage, Provincial Parks and Historic Sites, Archaeological Services, 1988. 21, 23 p. Bibliogr. (Manuscripts in archaeology : 21) *Bilingual (La gestion des ressources...).* ISBN 0-88838-329-0
MICROLOG 88-05682 1 fiche

Until recently shipwreck sites have been seen only in terms of retrieval of artifacts for private exhibit or profit. Due to lack of conservation, either plan results in the destruction and/or loss of the artifact. This overview proposes that the province moves into the diving community and re-educates divers to the concept of conservation. It argues that if done tactfully, it could lead to the realization by divers that the government program is there to enhance the sport of wreck diving, not restrict it.

Managing adjustment : policies for trade-sensitive industries : a statement

Economic Council of Canada. Ottawa : The Council, 1988. x, 42 p. : ill. Bibliogr.
MICROLOG 88-02814 1 fiche

The postwar period has been marked by significant liberalization and expansion of world trade especially due to the setting up of the General Agreement on Tariffs and Trade (GATT) and more recently, the Free Trade Agreement between the US and Canada. The growth and liberalization of trade have caused problems that have directly affected domestic employment levels, industrial activity and regional economies dependent upon industry. Measures were designed to counter or at least make adjustments in areas significantly impaired by freer trade. This report sets out policies for adjustment as already experienced in selected industrial sectors and labour markets, and makes recommendations for adjustment policies. Statistical data included surveys of the economic impact of Canada's international trade.

Manitoba. Immigration and Settlement Branch : Annual report 1986 : Manitoba Immigration Information Bulletin

Winnipeg : The Branch, 1987. ix, 79 p. : ill.
CSI 42113.002.
MICROLOG 88-01104 1 fiche

The process of consultation and assessment of immigration in Canada since the proclamation of the 1978 Immigration Act has yielded three conclusions: immigration does not take jobs away from Canadians, immigration should be moderately increased, and the three streams of immigration, social (family class), humanitarian (Refugees and members of designated classes) and economic (business immigrants, assisted relatives and independants), are in need of re-balanced levels. These assumptions guide the federal government's determination of the immigration levels and components for 1986 and 1987 which are set out in this report with specific reference to how the recommendations will affect immigration into Manitoba.

Manitoba ambient air quality annual report, 1985

Winnipeg : Manitoba Environment and Workplace Safety and Health, Air Standards and Studies Section, 1988. iii, 69 p. : ill. Bibliogr. (Air standards and studies ; no. 88-01)
CSI 42154.003.
MICROLOG 88-04524 1 fiche

Ambient air has been monitored at several locations throughout the province since 1968. Monitoring activities in 1985 took place in Winnipeg, Brandon, Thompson, Flin Flon and the Pas. The majority of the sampling is continuous involving dedicated monitors in permanent stations, divided into general or urban air quality monitoring and source specific or industrial monitoring. This report covers the 1985 data for carbon monoxide, nitrogen dioxide, nitric oxide, ozone, ammonia, hydrogen sulphide, sulphur dioxide, soiling index, total suspended particulate, lead, sulphates, and nitrates. The report outlines ambient air monitoring activities, provides summary statistics and a comparison to air quality objectives and/or guidelines where applicable, compares 1985 data with previous years, and provides a rating of the air quality relative to the Canadian Annual Index of Air Quality.

Manitoba mathematics assessment program 1987 : preliminary report : test data

Winnipeg : Manitoba Education, Curriculum Development and Implementation Branch, 1987. iii, 32 p. *CSI 41107.005.* ISBN 0-7711-0696-3
MICROLOG 88-01100 1 fiche

The Provincial Assesment of Mathematics was conducted at grades 3, 6, 9, and 12. A written test of the curriculum objectives was carried out in May, 1987 for grades 3, 6, and 9, and in June 1987 for grade 12 (Mathematics 300 and 301). The subtests delineated for the Mathematics Assessment at each grade level are reflective of the Manitoba curriculum with the component discussed in this report designed to represent several levels of the cognitive domain. There are two subsequent components assessments, results of which are contained in the final report. Information discussed refers to both English and French immersion programs.

Manitoba migration statistics 1976-86

Winnipeg : Manitoba Bureau of Statistics, 1987. 33 p. *CSI 42108.212.*
MICROLOG 88-00925 1 fiche

Migration is the most volatile component of population growth in Manitoba and has had the greatest impact on the year-to-year change in the population of the province and its eight economic regions over the last 10 years. This report presents information on net migration for the period 1976/7-1985/6. Data were obtained from Statistics Canada and were derived from changes of address on personal income tax forms filed with Revenue Canada Taxation. This report concentrates on levels of net migration to Manitoba and its eight economic regions by type, origin and age of migrant.

by D. Bezak and T.M. Rae. Winnipeg Manitoba Environment and Workplace Safety and Health, Air Standards and Studies, 1987. ii, 44 p. : ill. (Air standards and studies ; no. 87-2) *CSI 41110.004*
MICROLOG 88-04522 1 fiche

The collection and monitoring of precipitation in Manitoba has been on-going by the Manitoba Network for Precipitation Collection since the

fall of 1980. The program provides a sufficient data base to determine the quality of precipitation with the emphasis on acidic substances, offers verifiable precipitation chemistry data to other jurisdictions, and determines any spatial or temporal trends in precipitation chemistry related to industrial and/or meteorological conditions within the boundaries of Manitoba. This report presents data accumulated from January 1 to December 31, 1984 from stations located at Island Lake, Norway House, Gillam, Brochet, and Pointe du Bois. Daily precipitation summary and yearly statistical data summaries are given by station, along with a summary from 1980-84.

Manitoba piping plover survey, 1987

by R. Moszynski, W.H. Koonz and K. De Smet.
Winnipeg : Manitoba Natural Resources, Wildlife Biological Services, 1988. i, 37 p. : maps. Bibliogr. (Manuscript report ; no. 88-03)
MICROLOG 88-04605 1 fiche

The piping plover is a North American shorebird whose former breeding range included sandy open beaches from the Atlantic coast of South Carolina northward to the St. Lawrence River, westward through the Great Lakes and across the Prairie Provinces. Breeding populations flourished around prairie lakes and the shorelines of rivers such as the Missouri, Saskatchewan and Platte. In Manitoba, the piping plover is known to nest along the shores of Lake Manitoba, Lake Winnipeg and West Shoal Lake. This report is a follow-up to Haig's 1981-86 work which identified the shores of Lake Winnipeg as a major area of potential piping plover habitat. Results are intended to assist in the management of critical breeding areas provincially and as part of a National Recovery Plan for the species.

Manitoba reading assessment, 1985 summary report

Manitoba. Manitoba Education. Curriculum Development and Implementation. Winnipeg : The Branch, 1985. ix, 13 p. Bibliogr. ISBN 0-7711-0657-2
MICROLOG 88-02579 1 fiche

The 1985 Reading Assessment provides an indication of the reading performance of students in Manitoba and is the second one conducted since May 1980. The assessment studies the current whole language model used in English language arts curriculums across the province and assesses its success in developing interrelationships between thought and language, making reading a natural extension of human language development. Reading skills assessed include: meaning vocabulary (recognizing words in context); literal comprehension (understanding explicitly stated meaning); critical and reflective comprehension (judging the validity of the material and considering implications); and study skills (locating, organizing, and interpreting reading in content areas). Tests included use of cloze passages, multiple-choice and open-ended items. Contains results for grades three, six, and nine.

MAPUM : a model for assigning passengers to a flight schedule

by F. Soumis, J.A. Ferland and J.-M. Rousseau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1979. 26 p. : ill. Bibliogr. (Publication ; no. 142) (Publication ; no 269)
MICROLOG 88-06418 1 fiche

An airline has to forecast its schedule and its fleet to satisfy the growing demand and to be competitive with other airlines and other transportation modes. The model described in this paper is to be used in such a planning mode. The problem can be specified as follows: given a daily flight schedule and the corresponding demand curve by the time of day for each origin-destination pair, assign passengers to flights. This passenger assignment model MAPUM (Model for the Assignment of Passengers developed at the University of Montreal) can be used independently to evaluate a proposed flight schedule or could be integrated into an automatic schedule generator as presented in Soumis (1980).

Mass wasting on the Queen Charlotte Islands : a regional inventory

by P. Gimbarzevsky. Victoria : Ministry of Forests and Lands, 1988. viii, 96 p. : ill., maps. Bibliogr. (Land management report ; no. 29) ISSN 0702-9861 ISBN 0-7718-8619-5
MICROLOG 88-05571 2 fiche

Mass wasting constitutes the dominant geomorphic process in the coastal regions of the province, and encompasses a variety of slope movement processes by which masses of soil, rock, and debris are transported downslope primarily by gravity. This study involved a rapid analysis of 1979-80 aerial photography to develop an overview showing the distribution and frequency of failures on a cross-island basis. A systematic analysis was then done of dominant landscape characteristics and slope failure frequencies within Universal Transverse Mercator cells that contained one or more slope failure initiation points.

Matrices of co-occurrences of fish species on the Scotian Shelf and in the Bay of Fundy

by J.S. Scott. St. Andrews, N.B. : Dept. of Fisheries and Oceans, Marine Fish Division, Biological Sciences Branch, Biological Station, 1987. iii, 54 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1581) *195th technical report from the Biological Station, St. Andrews, N.B.*. ISSN 0706-6457
MICROLOG 88-01710 1 fiche

The results of annual groundfish research trawling surveys of the Scotian Shelf and Bay of Fundy in the summers of 1970-79 and in spring, summer and autumn 1980-84 provide numbers of co-occurrences in the catches of the principal fish species of the area. These data are presented as matrices by sub-area and season. Original numbers of co-occurrences were grouped and considered for production of graphic matrices for detailed analyses. The effect of change of species order in the matrices by systematic group and by order of preference by bottom type, depth and site type was examined and depth selected as the criterion giving the best resolution of species assemblages. Alternative means of considering co-occurrences are presented including matrices of actual numbers, graphic matrices of standardized number, matrices of percentage co-occurrences of each species in the catches of others, tables of co-occurrence indices.

Measurements of radioactive air from bacterial leaching of uranium stopes

by J. Bigu. Ottawa . Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iii, 22 p. : ill. Bibliogr. (Report : MRL 88-42(TR))
MICROLOG 88-06059 1 fiche

Bacterially-assisted leaching provides a relatively inexpensive and simple way of recovering uranium from mined-out stopes or low-grade uranium ores in some Canadian underground uranium mines. A study was conducted to characterize the radioactivity environment of a typical mined-out uranium stope where uranium was being recovered by bacterially assisted heap-leaching of muck brought down by drilling and blasting operations. Measurements were carried out on radon gas and its progeny, thoron progeny, and air flow through the stope during several experimental phases of the leaching operation. In addition, the residence time of radioactive air in the leaching stope during the aeration operation was determined by several methods.

Measures for peace in Central America : a conference report

by Liisa North, with the assistance of Steven Baranyi and Julie Leonard. Ottawa : Canadian Institute for International Peace and Security, 1987. 76 p. (Report ; no. 5)
ISBN 0-662-15778-8
MICROLOG 88-02083 1 fiche

Report from the Roundtable conference focusing on bilateral and multilateral policy initiatives that would contribute to the Contadora-led peace process throughout Central and Latin America. Reviews Canada's and other countries' provision of technical advice to Contadora on verification and control mechanisms needed for the implementation of a peace policy. The first two sessions of the conference explored the positions of different governments and the principal issues involved in the Central American conflict and the third and fourth sessions discussed policy alternatives available for reaching settlements. Also includes a brief history of the Contadora agreement.

Measuring characteristics of the fastest commercially-available digitizers

by J. Kuffel. Toronto : Ontario Hydro, Research Division, 1987. 10 p. : ill. Bibliogr. (Report : no. 87-169-K)
MICROLOG 88-00146 1 fiche

Report on the measurements of the dynamic performance of 8 diferent digitizers, with an analysis to show the types and magnitudes of error to which each digitizer is prone. The impact of these errors on the measurements of fast single-shot transients, such as front chopped impulses with times-to-chopping in the range of 500 ns (the fastest covered by the standards) to a few ns, is examined and the suitable range of application of each digitizer is presented.

Measuring thyroid uptake with hand-held radiation monitors

by M. Deschamps. Ottawa : Atomic Energy Control Board, 1987. 74 p. : ill. Bibliogr. (Research report ; INFO-0236(E))
MICROLOG 88-01851 1 fiche

When using some volatile radioisotopes or those where there is a significant amount of absorption through the skin, it is necessary to carry out bioassays to evaluate the internal radiation component on the basis of a model of standard man. This study deals only with Iodine 123, 125, and 131, as well as with Technetium 99m. The possibility of using hand-held contamination measurement devices (CMD) and portable gamma detectors to measure the thyroid uptake of users in 9 Nuclear Medicine Departments was evaluated.

Mechanical properties and freezing and thawing durability of concrete incorporating a ground granulated blast-furnace slag

by V.M. Malhotra. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. vii, 46 p. : ill. Bibliogr. (CANMET report ; 86-10E) ISBN 0-660-12726-1
MICROLOG 88-03156 1 fiche (Available on fiche only)

Results of laboratory investigations on a series of fifteen 0.06 m3 concrete mixtures made with water-to-(cement and slag) ratios ranging from 0.70 to 0.45. The percentage of slag used as a replacement for normal portland cement ranged from 0 to 100% by weight. All mixtures were air entrained. A number of test cylinders and prisms were cast for determining the mechanical properties and freezing and thawing resistance of concrete.

The Meech Lake Accord and the theory of federalism

by T. McIntosh. Edmonton : Legislature Library, 1987. 16 p. Bibliogr.
MICROLOG 88-05740 1 fiche

This position paper places the recent Meech Lake Accord within the context of federalism, both on theoretical and political grounds. It demonstrates that the agreement, in many of its provisions, violates the principles of federalism and leads to some degree of political disaster. The paper takes the view that the solutions offered to Canada's political and constitutional ills are based on a desire to seek temporary and make-shift answers to problems that must clearly be tackled only after long consideration of all alternatives and the impact of each.

Membrane processing of oil field produced water for enhanced oil recovery (EOR) steam generation : final report

prepared for CANMET/ERL Energy Mines & Resources ; prepared by Zenon Environmental Inc.. Burlington, Ont. : Zenon, 1987. 2 v. : ill. *CANMET contract: OSQ85-00194.*
MICROLOG 88-02161 4 fiche

Cross flow ultrafiltration systems, which have been successfuly applied to the treatment of emulsified oils in many industries, may provide a valuable alternative to conventional treatment of oil field produced water emulsions. Samples of produced water were obtained from different EOR sites in Western Canada for initial characterization work to determine some of the variability which exists from site to site and from different locations in the treatment process. Tests were then conducted using flat sheet membrane test cells and a sample of wellhead produced water at temperatures of 65C, 75C, and 85C. A series of 13 experiments were then conducted using produced water obtained from eight different enhanced oil recovery operations in Western Canada to determine if the high and stable flux rates obtained with produced water from the first site could be obtained with samples from other sites and different points in the treatment process. A final set of tests were conducted to optimize a number of factors affecting system performance including the membranes used, the operating strategy used to process the produced water and the chemistry of produced water itself.

Mercury in Canadian non-ferrous metals extraction circuits, part 1 : Hudson Bay Mining and Smelting Company, Limited, Flin Flon, Manitoba

by T.T. Chen and P. Pint. Ottawa : Canada Centre for Mineral and Energy Technology, 1980. 42 p. : ill. (Report ; MRP/MSL 80-9(CF)) *Project MRP-4.3.0.6.07, control of toxic pyrometallurgical emissions.*
MICROLOG 88-02150 1 fiche

In an effort to reduce the emissions of potentially hazardous compounds or elements from pyrometallurgical processes, a project was initiated to determine the occurrences of toxic elements in Canadian sulphide ores and concentrates, to determine their distribution in processing circuits and to evaluate methods for minimizing emissions of these toxic elements. Mill concentrates and smelter dusts from Hudson Bay Mining and Smelting Co., Ltd., Flin Flon, Manitoba, were studied to identify the principal carriers of mercury and to establish the distribution of this element in the pyrometallurgical circuits. These data indicate the behaviour of mercury during processing and will aid in the selection of abatement technology. This report summarizes findings on mercury deployment at the Flin Flon copper and zinc smelters.

Metallic minerals on the deep seabed

by G.A. Gross and C.R. McLeod. Ottawa : Geological Survey of Canada, 1987. 65 p. : ill. Bibliogr. (Paper ; 86-21) *Folding maps not filmed.* ISSN 0068-7650 ISBN 0-660-12612-5
MICROLOG 88-02807 1 fiche

Technology developed in recent years has made it possible to explore mineral occurrences on the deep seabed that are analogous to many mineral deposits mined on land. This paper reviews the main types of occurrences on the deep seabed, their geological setting in relation to major geological features, and their proximity to land areas. Brief notes on the mineral occurrences describe their type and depositional environment. A world map shows islands and continents, areas 370 km from land, major tectonic features, the distribution of manganese nodules and crusts, various types of metalliferous sediments and crusts and areas where hydrothermal processes are now, or have been, active on the seafloor.

Metallurgical aspects of machinability in medium carbon steels : final report

by D.A.R. Kay...et al. Hamilton, Ont. : McMaster University, Dept. of Metallurgy and Materials Science, 1987. vi, 130 p. : ill. Bibliogr. *CANMET contract: OST85-00201*
MICROLOG 88-06400 2 fiche

Final report describing the research carried out on chip formation and tool wear in the machining process, aimed at the development of current and future machining technologies in Canada. Detailed SEM studies of chips and quick-stop samples were undertaken to map the damage associated with the type, size, volume fraction and local dispersion of 2nd phase particles. Free machining additives are used to decrease the accumulated damage to fracture in steels machined at low and moderate cutting speeds (less than 100m/min.). The research reported here concentrates on the design of clean steel for high strain rate machining; and chip formation mechanics and development of continuum models for analyzing the machine operation, tool wear in metal cutting, and inclusions and tool wear.

Methane desorption in coal handling

by B. Das. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1987. v, 30 p. : ill. Bibliogr. (Report : CRL 87-123(OP,TR))
MICROLOG 88-03885 1 fiche

Methane is associated with all types of coals and thus creates problems through desorption in coal handling: mining, storage, transportation, preparation and utilization. Although the total amount of methane desorption is important, the degree of methane hazards is directly related to the rate of desorption, which in turn depends on coal rank, maceral composition, type of metamorphism, temperature, pressure, etc. Methane hazards can be drastically reduced through a clear understanding of these processes. This report puts together the slides presented at the Annual Meeting of the Calgary CIM on the above subject.

Méthodes analytiques de recherche sur la réduction de la production d'acide par les bactéries dans des stériles pyriteux

par M. Silver. Ottawa : Centre canadien de la technologie des minéraux et de l'énergie, 1985. vi, 26 p. : ill. Bibliogr. (Rapport de CANMET ; no 86-3F) *Programme de recherche sur les minéraux : Laboratoires des sciences minérales.* ISBN 0-660-92182-0
MICROLOG 88-01546 1 fiche (Available on fiche only)

Depuis 20 ans, le CANMET réalise des recherches sur la production et la circulation des eaux de mine acides à l'intérieur des stériles de minerai d'uranium. Ces études ont progressivement fait place à des recherches sur des moyens de prévenir la production d'eaux de mine acides, par manipulation du niveau phréatique et par établissement d'une couverture végétale palustre à la surface des stériles. Ce recueil de procédés analytiques a été préparé pour assurer l'uniformité des analyses, et ainsi pouvoir comparer les données fournies par diverses enquêtes sur les stériles de minerai. Le document décrit la conception et la construction du lysimètre ainsi que l'échantillonage, l'analyse physique, la microbiologie et l'analyse des composés organiques des sols et des stériles.

The Mineral characteristics that affect metal recoveries from the Cu, Zn, Pb and Ag ores from Manitoba, part 1 : an investigation of the ore mineralogy of the Trout Lake deposit with a view of predicting mineral liberation and metal recovery during ore dressing

by R.E. Healy and W. Petruk. Ottawa Canada Centre for Mineral and Energy Technology, 1988. x, 181 p. : ill. Bibliogr. (Report ; MSL 88-61(IR))
MICROLOG 88-04996 3 fiche

Report of a mineralogical study conducted on the ores from the Trout lake deposit, a volcanic massive sulphate deposit that contains the recoverable metals copper, zinc, gold, silver, lead, Cd, Co and selenium. The project was to establish whether the deposits contain unique mineralogical characteristics and whether these characteristics can be utilized to modify metallurgical practices, so that recovery could be optimized. The study involved collecting a representative suite of samples from the deposit, fitting them into a classification based largely on that developed by the mine geologist, and characterizing the ore from each classification. The ore characterization involved identifying the minerals, determining mineral quantities, determining the average chemical composition, defining the host mineral(s) for each element of interest, determining the size distribution of the minerals in the unbroken ore, and noting mineral textures that might have a bearing on mineral beneficiation.

Mineral exploration economics : the search for base metals in Australia and Canada

by B.W. Mackenzie and R. Woodall. Kingston, Ont. : Centre for Resource Studies, Queen's University, 1987. xi, 112 p. Bibliogr. (Working paper ; 40) ISBN 0-88757-084-4
MICROLOG 88-00354 2 fiche (Available on fiche only)

Historically, Australia and Canada have displayed similar patterns of mineral exploration and development. These overall patterns suggest that the economics of base metal exploration in the two countries may also be similar. This paper examines that premise and attempts to explain, in the light of historical evidence, similarities and differences in base metal exploration between the two countries in a way that will be useful for corporate planning and the analysis of government policy. The marked differences observed in discovery costs, the expected value of exploration, and the average size of deposits are considered and explanations offered.

Minesoil and landscape reclamation of the coal mines in Alberta's mountains and foothills

by A.W. Fedkenheuer, L.J. Knapik, D.G. Walker; prepared for the Mountain-Foothills Reclamation Research Program of the Land Conservation and Reclamation Council (Reclamation Research Technical Advisory Committee) and the Coal Association of Canada. Edmonton : The Committee, 1987. x, 174 p. : ill. Bibliogr. (Report ; RRTAC 87-2)
MICROLOG 88-03652 3 fiche

The rehabilitation of coal-mined land in the mountains and foothills of Alberta is a rapidly developing field. It is based on a relatively few years of experience, and techniques adapted from other areas. This report reviews the state-of-the-art of reclamation for site and soil reconstruction and re-establishment of biological productivity, and identifies needs and opportunities for research in the Mountain-Foothills area to fill existing data gaps. The primary aim of this review is to assemble information to enable operational reclamation decisions to be made, to provide for tree growth (forestry use), shrub growth (wildlife habitat), and herbaceous cover (erosion control). The review is to also identify information gaps and recommend research needed to fill those gaps.

Mining potential in northern and southern Canada : guidelines for regional development policy

by L.J. Verleun and B.W. Mackenzie. Kingston, Ont. : Queens University, Centre for Resource Studies, 1988. xiv, 211 p. Bibliogr. ISBN 0-88757-091-7
MICROLOG 88-06282 3 fiche (Available on fiche only)

Examination of the potential cost, risk, and return characteristics of base metal supply in northern and southern Canada by comparing the quality and viability of their resources: by analyzing time trends; the influence of geological regions and deposit types; and the return characteristics of economic discoveries: and by assessing the direct effects of government mineral policies, especially mining taxation. The data base gathers exploration expenditures, possible economic discoveries for evaluation, projections of long-term metal prices, ore reserves and costs for individual deposits, generalized net smelter return conditions and deposit costing relationships, infrastructure estimates, and remoteness costs. The evaluation is carried out on a potential value basis, and on an after-tax basis.

A Mist-net study of migrating birds at Yellowknife, Northwest Territories, spring 1985

by J. Sirois...et al. Ottawa : Canadian Wildlife Service, Western and Northern Region, 1987. vi, 27 p. Bibliogr. (Technical report series ; no. 33) ISSN 0831-6481 ISBN 0-662-15781-8
MICROLOG 88-04782 1 fiche

Several studies have confirmed that the Slave River-western Great Slave Lake-Mackenzie River corridor is a major migration route for migratory birds which breed in the western Canadian Arctic. A mist-net study was undertaken from 2 May to 6 June 1986, to monitor the spring migration of birds at Yellowknife, NWT. Mist-nets were erected for various periods at Niven Lake, Yellowknife River, and Willow Flats, near downtown Yellowknife. Most of the mist-netting and banding was done at Willow Flats. Most captured birds were identified, sexed (when possible), banded, and released.

Mixed motivations for migration in the urban prairies : a comparative approach

by R.A. Curris and S.S. Halli. Edmonton : Dept. of Sociology, Population Research Laboratory, 1987. 25 p. Bibliogr. (Edmonton area series report ; no. 54) *CSI 99241.203.*
MICROLOG 88-02323 1 fiche

Study of two Canadian Prairie cities, with populations of about 600,000 each, which have both experiencing dramatically different growth patterns in the last twenty years due to different economic bases. While Edmonton has been a fast growth city based on the oil and gas boom, Winnipeg has experienced very slow growth with a diversified economy. Through the vehicles of the Edmonton and Winnipeg Area Studies, an analysis is made of the migration to the two cities. Discusses migration on the level of single motives and with relation of these motives to the economic and family motives also involved.

A Modal choice function for Winnipeg : calibration and validation

by R. Cléroux, M. Florian and S. Galarneau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1979. 23 p. Bibliogr. (Publication ; no. 135) (Publication ; no 320)
MICROLOG 88-06397 1 fiche

Detail description of the calibration of a modal split function for the City of Winnipeg, Manitoba. Such a function is used in transportation planning to predict the relative shares of the main modes used for travel, usually during peak hours. The data used was part of a larger project to implement a new urban transportation planning method that simultaneously predicts the mode choice and route choice on the road and transit networks. The modal split function calibrated is an aggregate logit type function using auto travel times from the road network assignment and the transit travel time (impedances) from the transit network in addition to zonal average values for several socio-economic variables which are also described in detail.

A Model for large scale aircraft routing and scheduling problems

by F. Soumis, J.A. Ferland and J.-M Rousseau. Montreal : Université de Montréal. Centre de recherche sur les transports, 1978. 22 p. Bibliogr. (Publication : no. 117) (Publication : no 273a)
MICROLOG 88-06387 1 fiche

Given the estimated demand for travel, an airline wishes to determine the flight schedule which maximizes its profit while taking into account the satisfaction of its customers. In this system, two components interact: the aircraft routing in the physical network determines a flight schedule, and the passengers use these flights to travel. The solution technique proposed is an heuristic adaptation of the Frank-Wolfe algorithm for an integer programming problem with a special structure. It corresponds to solving alternatively the aircraft routing problem to select the flights that improve profits, and the passenger assignment problem to these flights to estimate revenues.
PS SC TR

Model studies of ice interaction with ship rudders and steering systems

submitted to Transportation Development Centre , submitted by B. Menon, L. Phillips, T. Roots. Ottawa : Arctec Canada Limited, 1986. 2 v. : ill. Bibliogr. *TP 8136E.*
MICROLOG 88-00328 5 fiche

Two complementary model scale experiments have been carried out to systematically investigate the response characteristics of ship steering systems under the influence of ice loads acting on the rudder. In the first phase of the project a 1:17 scale model of the rudder assembly of the Canadian Coast Guard icebreaker Louis S. St. Laurent was designed and parametrically tested over a range of impact conditions. In the second phase of the project, three ship models were tested in the ice basin to measure frequency of ice impacts on the rudder as a function of a range of ship operating conditions. The database and trends determined as a result of these two experiments represents a valuable tool in advancing the design of steering systems for ice-worthy vessels.

Modèle d'évaluation des terres humides du Québec en fonction de leur importance pour la sauvagine

par S. Tremblay et L. Bélanger. Québec : Gouvernement du Québec, Ministère du loisir, de la chasse et de la pêche, Direction de la gestion des espèces et des habitats, 1987. xi, 58 p. : ill. Bibliogr. ISBN 2-550-17855-6
MICROLOG 88-03511 1 fiche

La sauvagine constitue le groupe d'oiseaux aquatiques migrateurs le plus important en Amérique du Nord. Malheureusement, on observe depuis plusieurs années une baisse importante des populations de sauvagine. Les 2 facteurs les plus souvent identifiés comme étant responsables de ce déclin sont l'augmentation de la pression de chasse et surtout la disparition et la dégradation des habitats humides. Ce document propose une méthodologie d'évaluation des habitats humides du Québec pour évaluer leur importance pour la sauvagine, leur valeur sociale et leur vulnérabilité par rapport aux activités humaines de même que leur potentiel d'aménagement. Le document contient aussi une revue de la littérature sur le sujet.

Modèle de comportement des clients du transport aérien

par F. Soumis. Montréal : Université de Montréal, Centre de recherche sur les transports, 1978. 11 p. Bibliogr. (Publication : no. 119)
MICROLOG 88-06388 1 fiche

Le problème est de prédire pour un ensemble de vols offerts par un transporteur aérien, quelle sera la demande pour chaque paire origine-destination et sa répartition entre les vols proposés. Ce document présente une approche partant d'hypothèses de comportement de chaque passager face à l'attraction et à la disponibilité des routes offertes.

Un Modèle pour la simulation de la population des grandes oies blanches

par J. Gauvin et A. Reed. Ottawa : Service canadien de la faune, 1987. 29 p. : ill., cartes géogr. Bibliogr. (Publication hors série ; no 64) *L'éd. anglaise (A simulation model...) sur la même fiche.* ISSN 0576-6370 ISBN 0-662-94392-9
MICROLOG 88-01155 1 fiche

Les grandes oies blanches ont connu récemment une augmentation spectaculaire de leur population. Un modèle mathématique a été conçu pour comprendre et simuler l'évolution de cette population. Pour ce modèle, les données de recensement de la population au printemps, des pourcentages de juvéniles à l'automne et de la récolte de chasse des 20 dernières années ont été analysées pour obtenir un taux vraisemblable de la mortalité naturelle ainsi que des les lois de probabilité pour reproduire les paramètres de la reproduction de l'espèce et de la mortalité due à la chasse. Le modèle est disponible sur disquette pour usage interactif sur ordinateur personnel IBM.

Les Modèles de design en aménagement urbain et régional

par C. Lardinois. Montréal : Université de Montréal, Centre de recherche sur les transports, 1977. vii, 103 p. Bibliogr. (Publication : no. 64)
MICROLOG 88-06320 2 fiche

Depuis une trentaine d'années environ, de nombreux modèles mathématiques ont été imaginés afin de constituer l'un des supports scientifiques et techniques de la planification urbaine. Les modèles de design, qui sont les derniers nés parmi ces outils, constituent le sujet de ce mémoire. On y fournit des information sur le cadre théorique, sur les modèles de planification et la réalité professionnelle et politico-économique, ainsi que sur les modèles existants.

Modèles de distribution avec contraintes d'inégalité : calibration et résolution

par R. Ducharme. Montréal : Université de Montréal, Centre de recherche sur les transports, 1980. viii, 59 p. Bibliogr. (Publication ; no. 170)
MICROLOG 88-06439 1 fiche

Les modèles de distribution basés sur la maximisation de l'entropie avec fonction de coût sont grandement utilisés dans divers problèmes d'interaction spatiale. L'une des raisons justifiant ce choix est l'efficacité de l'algorithme de balancement pour les résoudre. Une plus grande flexibilité peut être introduite dans ces modèles en permettant à certaines contraintes d'être sous signe d'inégalité. Ce travail démontre qu'on peut généraliser l'algorithme de balancement pour calibrer et résoudre ces modèles ainsi modifiés.

Les Modèles probabilistes appliqués aux problèmes de transport et d'ordonnancement

par M. Trahan. Montréal : Université de Montréal. Centre de recherche sur les transports, 1974. vi, 172 p. Bibliogr. (Publication ; no. 12) (Publication ; no 185)
MICROLOG 88-06299 2 fiche

Les modèles probabilistes suscitent un grand intérêt en recherche opérationnelle. Ces modèles, soutenus par la théorie des réseaux, laissent entrevoir la possibilité de mieux contrôler les problèmes de transport et d'ordonnancement. Cette thèse a pour but de collaborer au développement des modèles probabilistes à l'intérieur de ces deux problèmes. Relativement aux problèmes de transport, on élabore un algorithme fondé sur un modèle d'affectation probabiliste sans capacité, tandis que pour les problèmes d'ordonnancement, on apporte des modifications techniques à la méthodologie PERT.

La Modélisation de marchandises au Canada

par Y. Bigras. Montréal : Université de Montréal, Centre de recherche sur les transports, 1985. xii, 312 p. Bibliogr. (Publication ; no. 483)
MICROLOG 88-00457 1 fiche

Deux approches ont été privilégiées dans cette thèse sur les techniques d'estimation de la demande de transport des marchandises entre les régions: l'approche des modèles d'interaction spatiale et l'approche des données input-output. On y propose un modèle dans le but d'estimer les matrices origine-destination entre 8 régions du Canada et pour 64 catégories de biens. Les résultats obtenus avec ce modèle sont comparés à ceux obtenus avec des modèles gravitaire, entropique pur et linéaire.

Modelling of a deregulated transit system

by E. Fernandez and P. Marcotte. Montreal : Université de Montréal. Centre de recherche sur les transports, 1988. 24 p. Bibliogr. (Publication ; no. 575)
MICROLOG 88-04679 1 fiche

Paper considering an urban public transport system served by buses that are individually owned and operated by small entrepreneurs under deregulated conditions. Given a set of lines where public transport can be offered, private operators freely decide on which of these lines to run their buses such that their net benefit be maximized. The model is representative of the present situation in cities in Chile in particular and in developing countries in general. The problem is in finding the equilibrium state of the passengers-operators system, and defining a bimodal (private car - transit users) equilibrium.

Models of inflation : a taxonomy of effects

by C. Freedman. Ottawa : Bank of Canada, 1977. 19 p. Bibliogr. (Technical report ; 8)
MICROLOG 88-06465 1 fiche

This study uses three wage equations and three price equations to examine the effect on wages and prices of various shocks. Different combinations of wage and price equations yield very different results when subjected to excess demand shocks and to exogenous price shocks. The results of the shocks are explained in terms of the general characteristics of the models used. The study also examines the effect of increasing the lags in the wage and price equations on the inflationary responses to the shocks.

The Moisture re-sorption characteristics of thermally dried coal: final report

by M.A. Rashid. Devon, Alta : Coal Mining Research Company, 1986. 52, 35 p. Bibliogr. *CANMET contract: ISQ 84-00440.*
MICROLOG 88-00482 1 fiche

Two representative western Canadian coals were used in the study: high volatile bituminous C thermal coal; and medium volatile bituminous metallurgical coal. Washed coal samples were taken from the thermal dryer feeds and were dried in a pilot plant using a batch Roto-Louvre unit so that a wide range of product moisture contents could be obtained. These coal samples, together with control samples were exposed to controlled atmospheres, [varying between 20 and 40 degrees Celsius and between 30% and 90% relative humidity,] in an environmental chamber. The coal samples tested included product dried to as much as 5% below the equilibrium moisture content in addition to current commercial specifications. These coal samples, together with control samples, were exposed to controlled atmospheres, varying between 20C-40C and between 30%-90% relative humidity, in an environmental chamber.

Moisture, liquid and textiles : a critical review

by R.M. Crow. Ottawa : Defence Research Establishment Ottawa, 1987. vii, 42 p. Bibliogr. (Report ; no. 970)
MICROLOG 88-01295 1 fiche

This paper presents a literature review of the basic theories of moisture and liquid transport in textiles. The methods used to measure liquid-substrate interaction are summarized, compared and discussed as to use. The wetting properties of fibres, yarns, fabrics, chemically-modified fibres and chemically-treated fabrics as determined by many researchers are presented, as well as the results of moisture transfer from fabric layer to fabric layer. Recommendations are proposed for areas where additional research is required on wetting properties to provide a more adequate base for the intelligent design of wicking systems for clothing.

Molting and growth in crayfish : a review

by D.E. Aiken and S.L. Waddy. St. Andrews, N.B. : Dept. of Fisheries and Oceans, Marine Fish Division, Biological Sciences Branch, Biological Station, 1987. iii, 34 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1587) *196th technical report from the Biological Station, St. Andrews, N.B.* ISSN 0706-6457
MICROLOG 88-03402 1 fiche

Crayfish increase their size by shedding their exoskeleton and expanding their underlying flexible integument. The rate at which they grow depends on the frequency of molting and the size increases at each molt. Temperature, photoperiod, nutrition, hydrological conditions, stress and reproductive state are some of the factors controlling molting and growth. This publication presents a review of the process in some detail, covering stages of the molt cycle, molt staging techniques, biochemical changes, the integument, structure, cyclic changes, calcium metabolism, characteristics of growth, environmental and other influences, endocrine mechanisms, molt inhibition, and manipulation of molting and growth.

Mortality and morbidity : the Matlab experience

by S. D'Souza...et al. Ottawa : International Development Research Centre, 1988. 59 p. Bibliogr. (Technical study ; 56e) (Infant mortality and health studies) ISBN 0-88936-501-6
MICROLOG 88-03055 1 fiche (Available on fiche only)

The increased interest in mortality studies in recent years has seen the proliferation of frameworks and models to study the factors underlying mortality. However, insufficient attention has been focused on the fact that in developing countries appropriate data rarely exist to test the validity of such models. The Matlab field station in Bangladesh has acquired international recognition because of the availability of longitudinal data of reliable quality since its inception in 1966. This paper is intended to present examples of studies showing how mortality and morbidity can be studied within a small area. The paper attempts to establish that although cost considerations prevent population laboratories like that of Matlab being replicated in every developing country, regional centres particularly in Africa could be usefully considered.

Mountain Pine Beetle Control Program 1980-1986 : a success story

Edmonton : Alberta Forestry, Lands and Wildlife, Forest Service, 1986. 12 p. : ill. ISBN 0-86499-318-8
MICROLOG 88-05390 1 fiche

Although the mountain pine beetle has been detected in Alberta's forests in the past, the most recent outbreak beginning in 1977 is the first significant infestation which has threatened the major forest stands established along the Eastern Slopes. A control program was initiated in 1980 to contain the northward spread of beetles until the natural factors reduced the population to an acceptable level. This report describes the history of the mountain pine beetle outbreak, the signs and symptoms of infestation, the control program, and involvement of the public and other agencies.

The MP-SEMS-IPS image analysis system

by W. Petruk. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1986. vi, 28 p. ill. Bibliogr. (CANMET report ; 87-1E) ISBN 0-660-12663-X
MICROLOG 88-01547 1 fiche (Available on fiche only)

Image analysis is a technique used to determine mineral quantities, grain size distributions, grain orientations, mineral intergrowths, mineral associations, and degree of alteration of minerals in rocks, ores, and broken materials. The Mineral Processing Laboratory at CANMET developed an automatic image analysis system by interfacing a JEOL 733 microprobe, a Tracor Northern 2000 EDXA, and SEM-IPS Kontron image analyser with two-way communications between all units. This paper gives a description of this system as an example of a fully equipped automatic image analysis system.

A Multimode multiproduct network assignment model for strategic planning of freight flow

by J. Guélat, M. Florian and T.G. Crainic. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. i, 20 p. Bibliogr. (Publication ; no. 549) (Publication ; no. 637)
MICROLOG 88-01665 1 fiche

Paper presenting a normative model for simulating freight flows of multiple products on a multimodal network. The multimodal aspects of the transportation system considered are accounted for in the network representation chosen. The multiproduct aspects of the model are exploited in the solution procedure, which is a Gauss-Seidel - Linear Approximation Algorithm. An important component of the solution algorithm is the computation of shortest paths with intermodal transfer costs. Computational results obtained with this algorithm on a network that corresponds to the Brazil transportation network are presented.

Nanticoke TGS-tubine blade/disc investigation : 3D finite element stress analysis

by M.F. Ishac and T.P. Byrne. Toronto : Ontario Hydro, Research Division, 1987. iv, 7, 24 p. Bibliogr. (Report ; no. 87-211-K)
MICROLOG 88-00159 1 fiche

In November 1983, the L-I blade failure at the blade root top serration fillet of Nanticoke TGS Unit 2 resulted in a forced shut-down. Following this blade failure, two independent stress analysis investigations were carried out. The recent discovery of cracks at new locations of the blade root in Unit 6 created a need to extend the previous investigation and create an improved finite element model to carry out a more detailed stress analysis throughout the blade and the disc. This finite element model included the vane, the platform, the blade root and disc, with no locking groove. This report summarizes the results of the preliminary 3-D finite element stress analysis and draws some conclusions and recommendations.

A National forest sector strategy for Canada

developed at the Canadian Forestry Forum on a National Forest Sector Strategy ; sponsored by the Canadian Council of Forest Ministers. Saint John, N.B. : Canadian Forestry Forum on a National Forest Sector Strategy, 1987. vi, 22, vi, 25 p. *Bilingual (Une stratégie nationale ...).*
MICROLOG 88-01077 1 fiche

Mounting competition and protectionism in world markets, adverse economic developments, and technological changes have necessitated a re-evaluation of government and private sector policy. This paper discusses trade and investment in the international trading environment, securing market access, market development and new products. In terms of forest management, issues discussed include wood supply and benefits, forest wildlife management, forest protection, criteria for investment, tenure and wood allocation, management responsibilities and funding, land use issues and impact of pollution on forests. A discussion of employment covers worker adjustment, education and employment in silviculture. Also includes discussion of research, development and innovation in terms of priorities, technology transfer, funding, and human resources. Discusses public awareness of the issues facing the forest sector and makes general policy recommendations.

A National geographic information system for the Forest Insect and Disease Survey : requirements and selection

by J.M. Power and D.H. Williams. Ottawa : Petawawa National Forestry Institute, 1987. ii, 14 p. (Information report ; PI-X-75) ISSN 0706-1854 ISBN 0-662-15686-2
MICROLOG 88-01469 1 fiche

The Forest Insect and Disease Survey (FIDS) is a program of the Canadian Forestry Service responsible for the collection, processing, and dissemination of information on forest insect and disease conditions of Canada. FIDS prepared annual estimates of pest occurrence by species, location, area of forest affected, and intensity of damage. A large part of the data the Survey collects is now retained in an information system called FIDSINFOBASE, developed using the INGRES relational database management system and providing national access. This report looks at the potential application of Geographic Information System (GIS) technology in the Survey, determines the requirements, including technical, in relations to FIDS activities and GIS functions, and conducts both system selection and investigation.

National incinerator testing and evaluation program : environmental characterization of mass burning incinerator technology at Quebec City : summary report

Ottawa : Environment Canada, Environmental Protection Service, 1988. xii, 97 p. : ill. Bibliogr. (Report ; EPS 3/UP/5) *French ed (Le programme national...) : 88-06240/2.*
ISBN 0-662-16287-0
MICROLOG 88-06241 2 fiche

The environmental characterization of mass burning incinerator technology is the second of three incinerator technologies being tested under the National Incinerator Testing and Evaluation Program. The facility tested is located in Quebec City, and was built in 1974. For the testing program, one of the furnaces was modified to a "state of the art" unit and was evaluated during a three month period. All incoming wastes and ash residues were weighed, sampled and analyzed and key incinerator operating variables were monitored by an extensive computer network system. A wide range of analyses was carried out on exhaust gas emissions and all the ash discharges, including analyses for dioxins, furans, polychlorinated biphenyls, chlorophenols, chlorobenzenes, polycyclic aromatic hydrocarbons, over 30 heavy metals, and acid gases.

Native harvest of wildife in the Keewatin Region, Northwest Territories for the period October 1985 to March 1986 and a summary for the entire period of the harvest study from October 1981 to March 1986

by R.L. Gamble. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1988. v, 85 p. : ill. (Canadian data report of fisheries and aquatic sciences ; no. 688)
22nd data report from the Central and Arctic Region, Winnipeg. ISSN 0706-6465
MICROLOG 88-03406 1 fiche

Harvest data were collected from Inuit hunters of the Keewatin Region by the Keewatin Wildlife Federation. Part I of this report covers October 1985 to March 1986 and is an update and supplement to the previous reports which cover the earlier years of the survey. Data were aggregated at a community level and field workers continued to maintain a high level of performance as measured by participation of hunters in the study and a subjective judgement of the quality of data based on experience. Part II of this report is a summary of the entire period of the harvest study, giving the estimated harvest of species by community for the years of survey and the harvest of selected species aggregated at a regional level.

Final report of a project to study a fleet of 25 vehicles of varying make and use, ranging from a 4-cyclinder passenger car to a 14,515 kg GVW dump truck equipped with a V8 engine, using natural gas as fuel. An electric compressor facility was constructed on the site for refuelling of the fleet with compressed natural gas, having both slow and fast-fill capabilities. Electrical operating costs of the compressor were tracked and included in fuel cost calculations. Fuel quantity delivered to each vehicle was recorded as accurately as possible to assess vehicle fuel consumption. Vehicle maintenance costs were also monitored to evaluate differences compared with gasoline vehicles. Sound levels were monitored near the refuelling facility, and engine oil analysis was also carried out. All data collected are included.

A New agenda : health and social service strategies for Ontario's seniors

Toronto : Office for Senior Citizens' Affairs, 1987. viii, 22 p. ISBN 0-7729-1492-3
MICROLOG 88-04295 1 fiche

By 2001, there will be approximately 1,400,000 people who are 65 years of age or older in Ontario. The increase in the number of elderly citizens, and particularly the older elderly, is creating a new generation of issues which will have a profound effect upon provincial services. Given the implications of demographic change, the Province initiated a comprehensive review of all senior citizen services. This report, which addresses health and social services, is the first of a series of papers on elderly programs. The primary objective of this paper is to outline a series of broad policy directions which would, in the view of the government, lead to a more effective and affordable system of health and social services for the elderly.

A New algorithm for point and plane pattern matching

by S. Umeyama and T. Kasvand. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1987. v, 70 p. : ill. Bibliogr.
MICROLOG 88-04447 1 fiche (Available on fiche only)

Finding the best matching between two images or between an object and a known model is one of the most important problems in computer vision and image analysis. This report focuses on the utilization of location, regarded as the most common and important property of features. A new algorithm for finding a matching between two point or plane patterns given in m-dimensional Euclidean space is presented. The algorithm is formulated as a tree search procedure, and the search tree is pruned by a specified tolerance measure, defined as the maximum distance between the transformed entities and their corresponding entities, for matching. The proposed method is based on the locations and is invariant to rotation, translation, and scaling, and easy to use with additional information (such as semantic labels or order relations of points) within the same framework to guide the search. Global geometric constraints such as rotation or scaling parameters known in advance can also be exploited easily.
CA PS SC

A New approach of crew pairing problems by column generation and application to air transports

by S. Lavoie, M. Minoux and E. Odier. Montreal : Université de Montréal, Centre de recherche sur les transports, 1985. 26 p. Bibliogr. (Publication ; no. 439)
MICROLOG 88-00462 1 fiche

Description of a new approach to the classical problem of optimally assigning crews to flight services in airline companies, the crew pairing problem. The problem is first formulated as a large scale set covering problem with man columns, each column representing a valid crew-pairing. A solution procedure is then suggested for the continuous relaxation of this large scale problem, based on generalized linear programming, in which the column generation subproblem is shown to be equivalent to a shortest path problem in an associated graph. Computational results obtained on a series of real problems (involving up to 132 flight segments) are reported.

A New beginning : a review of the needs of seniors in the North Peace Region

Regional Interdisciplinary Steering Committee for Geriatric Services in the North Peace River (Alta.). S.l. : The Committee, 1986. 2 v. : ill., maps. Bibliogr. *Contents : Vol. 2 : Technical report -- Vol. 3 : Directory of agencies.*
MICROLOG 88-04048 3 fiche

This report describes the senior citizen population, the utilization of health care services by senior citizens, a report on the opinions of seniors regarding present services and those services that would keep seniors independent for as long as possible. Identifies seniors' housing conditions and their future housing requirements, as well as seniors' information needs. Describes an effective means of transmitting information to seniors, and the development of a services co-ordination model, including seniors' participation.

Fredericton : The Commission, 1988. 20 p.
Bilingual. CSI 46116.001.
MICROLOG 88-05298 1 fiche

The Civil Service Commission's mandate is to preserve the merit principle as the basis for effecting appointments to or from within the civil service. Essentially the Commission is to fulfill its mandate by auditing staffing and appointment practices, and by conducting inquiries and investigations of appropriate matters which may come to its attention. This annual report covers the Commission's reporting, organization and mandate, and its activities, including a summary of recommendations, observations and opinions. It reviews staffing audit activities, appeal activities and complaints. An appendix defines what portions of the Public Service falls under the Civil Service Act.

New Brunswick : a trial in parliamentary democracy

by S.F. Mellen. Edmonton : Legislature Library, 1988. 24 p. Bibliogr.
MICROLOG 88-05745 1 fiche

The 1988 New Brunswick election secured an overwhelming mandate for the Liberals of the province by a clean sweep of the fifty-eight electoral seats available, thereby depriving the Progressive Conservatives and New Democrats of direct involvement in the parliamentary process. This result poses problems for all three political parties, including the governing Liberals who must decide how to function in an adversarial system without an adversary. This paper addresses the question that if one contends that the role of an Opposition is essential to a parliamentary democracy, how can the problem of having no elected Opposition be resolved?

New dimensions in emergency health services : an Alberta solution

Alberta. Alberta Hospitals and Medical Care. Policy Advisory Committee. Edmonton : The Committee, 1988. 86 p. : ill. Bibliogr.
MICROLOG 88-04313 1 fiche

On February 5, 1987, the Policy Advisory Committee to the Minister of Hospitals and Medical Care was assigned the task of examining all aspects of the ambulance services system in Alberta and making recommendations to the Minister. During the course of this comprehensive review, it became clear to the Committee that a broader look, beyond the ambulance service system and into emergency health care services, was needed. The Committee extended its mandate to encompass emergency health care services as these services relate to the health care delivery system. This paper gives the Committee's recommendations and a review of both the Alberta ambulance system and other provincial ambulance systems.

New methods for testing workability and cohesion of cold patching material

by K.K. Tam and D.F. Lynch. Toronto : Ontario Ministry of Transportation, Engineering Materials Office, Bituminous Section, 1987. 60 p. : ill. (Report ; EM-85) ISBN 0-7729-3825-3
MICROLOG 88-02383 1 fiche

Cold mix patching of potholes and minor surface defects is an accepted routine pavement maintenance process, although not as long lasting as hot mix, particularly if done with poorly designed mixture and/or construction practices. A lack of precision control test methods to evaluate the physical properties of cold patching material led to this project to develop improved test methods. Two new test methods were developed (Blade Resistance and Rolling-Sieve), based on simulation of field operation conditions and on using simple equipment normally available in a typical asphalt laboratory and studies were conducted to verify the applicability of the two methods. Forty samples were obtained from all 5 regions in the province and were tested using the new methods. This report presents the results of those tested in workability, cohesion, gradation and mix properties, and mix performance.

The Newfoundland coastal zone and its influence on community development

Canadian Commission for Unesco. Annual Meeting (26th : 1984 : St. John's, Nfld.). Ottawa : Canadian Commission for Unesco, 1984. 59, 61 p. : ill. Bibliogr. (Occasional paper ; no. 49) *Bilingual (La zone côtière...).* ISSN 0317-5693
MICROLOG 88-03049 2 fiche (Available on fiche only)

The Coastal zones of the world have been identified by UNESCO as a priority for the synthesis of knowledge, for the training of specialists, and for research leading to better ways in which coastal regions can be used and occupied by men. The four papers given at the UNESCO's Annual Meeting are included in this document. The topics covered include descriptions of the variety of eco-systems in coastal zones around the world and the importance of recording the traditional knowledge of individuals living in coastal regions, as well as the effect of fishing, ocean waste disposal, and energy development on coastal populations. Also addressed are social concerns such as isolation, demanding physical conditions, fluctuating natural resources, poverty of coastal communities, and legislative inadequacies that have been reactive and development-oriented rather than proactive and resource management-oriented. Discussed also are the positive effects of high technology in these areas.

Nine-year results of a black spruce and white spruce paperpot planting trial in boreal Ontario

by J.B. Scarratt and J.E. Wood. Sault Ste. Marie, Ont. : Government of Canada, Canadian Forestry Service, Great Lakes Forestry Centre, 1988. 24 p. : ill. Bibliogr. (Information report ; O-X-391) ISSN 0832-7122 ISBN 0-662-15915-2
MICROLOG 88-04962 1 fiche

A few years before the Ontario Ministry of Natural Resources adopted the Japanese paperpot system in its container planting program, the Canadian Forestry Service initiated a series of planting trials with this container. The first of these trials, comparing the performance of FH308 paperpots and bareroot stock, was established in 1974 near Thunder Bay. Black spruce and white spruce were planted in late May and late July on a recent cutover underlain by loess deposits. This report documents the first 9 years performance in this planting trial (1974-82), using both absolute size and relative growth rate to compare growth performance.

Nineteenth-century glassware from the Roma Site, Prince Edward Island

by J. Alyluia and B.J. Wade. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1979. 141 p. : ill. Bibliogr. (History and archaeology ; 27) *Bound with: Cutlery from the Roma Site, Brudenell Point, Prince Edward Island / Barbara J. Wade.* ISBN 0-660-10299-4
MICROLOG 88-04058 2 fiche

The 19th-century glassware from the Roma site falls into nine major categories on the basis of function. In descending order of artifact concentration, these are: liquor bottles; medicinal bottles; miscellaneous glassware; perfume and cosmetic containers, and sauce bottles (equal quantities); lamp chimneys and mirrors (equal quantities); stoppers, and ink bottles. Approximately 100 identifiable objects are represented, the majority of which were excavated from the MacDonald store, although they do not necessarily date from its period of occupation. The collection is typical of the 19th century, and includes a cross-section of many of the types of utilitarian glasswares which were available at the same time and which could have been purchased at a general store. While some of the glassware may have been manufactured in Canada, it also appears to have been imported from the United States, England, and in one case, Scotland.

NOGAP B.6, volume 1 : Beaufort Sea current measurements, March-August, 1987

by D. McCullough...et al. Sydney, B.C. Institute of Ocean Sciences, Patricia Bay, 1988. v, 42 p. : ill. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 60) ISSN 0711-6721
MICROLOG 88-04151 1 fiche

As part of an inter-disciplinary study to measure the transport and fate of hydrocarbons over the Beaufort Shelf, and primary productivity of these coastal waters, 4 subsurface moorings were deployed along the 200 meter isobath at locations ranging from the Mackenzie Canyon to Cape Bathurst. Data were collected during total ice cover, through ice break-up and into full open water conditions. The centrepiece instrument on each mooring was a sequential sediment trap designed to obtain, by catching particle fallout, a record which would contain in it the seasonal productivity cycle for the duration of the deployment. The data and descriptions of the sediment traps are detailed in a separate report. Above and below the sediment traps self-recording current meters were installed to provide information about currents and water properties to assist in identifying water masses and transport. This report presents current, salinity, temperature, and light transmission data in tabular or graphic form.

The North American high definition television demonstrations to the public : an overview of the survey results

by S.J. Lupker, N.J. Allen and P.J. Hearty. S.l. : Committee for the North American HDTV Demonstrations to the Public, 1988. 17 p. Bibliogr. *French ed. (Démonstrations publiques nord-américaines...) on the same fiche.* ISBN 0-662-16241-2
MICROLOG 88-03798 1 fiche

Overview of the results of a survey conducted during the North American High Definition Television Demonstration held in October 1987. The demonstration and survey project was intended neither to test nor to endorse any particular advanced television system, but rather to demonstrate and gather reaction to the concept of advanced television. Evaluation measures were aimed at assessing the extent to which viewers saw a difference between systems: the extent to which viewers preferred one system over the other: the viewer's evaluations of likely pricing: and the viewers' project purchasing behaviour at various prices.

International Symposium on Traffic Equilibrium Methods, Montreal, November 1974.
MICROLOG 88-06300 1 fiche

Examination of the relationship between the time delay curves of traffic assignment problems and supply curves, with the claim made that most delay curves are simplified cost and/or production functions. The resulting distinction between delay and supply curves is illustrated by differentiating between production and market eqilibria in networks, notably in cases in which the former equilibria are observed while the latter are not.

Notre nouvel Accord de libre-échange : Territoires du Nord-Ouest et Yukon

Ottawa : Affaires extérieures Canada, 1988. 6, 6 p. *Bilingue (Canada's new Free...).*
MICROLOG 88-01796 1 fiche

Cette brochure d'information expose les conséquences avantageuses qu'aura l'Accord de libre-échange sur le Yukon et les Territoires du Nord-Ouest. On y présente d'abord les principaux points de l'Accord, puis on aborde plus spécifiquement les questions de l'élimination des droits de douane, de l'adaptation, du règlement des différends commerciaux, du passage de la frontière, de l'énergie, de l'exploitation minière, des investissements, du développement régional et des programmes culturels et sociaux.

Notre-Dame des Prairies -- Rev. ed.

Winnipeg : Manitoba Culture, Heritage and Recreation, Historic Resources, 1988. 20 p. : ill. Bibliogr. *French ed. (Notre-Dame des Prairies) on the same fiche.* ISBN 0-7711-0838-9
MICROLOG 88-04509 1 fiche

The Trappist monastery of Notre-Dame des Prairies, Our Lady of the Prairies was founded in 1892 by the Abbot of Bellefontaine, France. The Romanesque Revival church was built in 1903-04 and the connecting monastic wing in 1905. The guesthouse was erected in 1912 on the foundations of the first church building. This self-sufficient monastery included milking barns, stables, a cheese house, apiary, sawmill, and cannery. This document gives a history of the St. Norbert monastery, located on the banks of La Salle River and of the Order that founded it.

Un Nouveau cap environnemental : la conservation, agent de progrès

Québec (Province). Ministère de l'environnement. Québec : le Ministère, 1987. 41 p. ISBN 2-550-17940-4
MICROLOG 88-01332 1 fiche

Ce document cherche à définir des orientations pour l'avenir environnemental du Québec. Il propose les grandes lignes que suivront la pensée et l'action du ministère de l'Environnement au cours des années à venir. A partir de ces lignes directrices, le Ministère définira des politiques sectorielles et spécifiques après une consultation de la population. Ce document divisé en 4 sections expose les raisons incitant à faire un nouveau choix d'orientation, une nouvelle façon de comprendre le problème, le changement dans les façons d'agir et quelques orientations sectorielles.

Le Nouveau régime de nomination des juges

Ottawa : Ministère de la justice, 1988. v, 20, v, 19 p. *Bilingue (A new judicial...)*. ISBN 0-662-55921-5
MICROLOG 88-04859 1 fiche

La nomination des juges par le gouvernement fédéral a souvent fait l'objet de critiques. Un nouveau régime a donc été mis en place pour maintenir les plus hautes qualités de compétence et de travail de la magistrature. Cette brochure, qui s'adresse tant aux membres de la profession juridique qu'au grand public, décrit le nouveau régime de nomination à la magistrature fédérale.

Nova Scotia Research was established in 1946 to use science and technology to assist in the economic development of the province, in particular secondary manufacturing industry and the ocean industry. Report for 1986/7 presents a financial summary and a listing of projects in applied science, industry services and product development as well as a short overview of the year's activities in each area and affiliates. A financial statement is included.

Nova Scotia Task Force on AIDS : interim recommendations

Nova Scotia. Task Force on AIDS. Halifax : The Task Force, 1988. 6 p.
MICROLOG 88-04850 1 fiche

This document sets out guidelines for the province's creation of a public information and education strategy that will inform the public about AIDS. The recommendations are designed to increase the public's understanding of HIV infection and AIDS, to prevent the spread of HIV infection, and to develop a caring and compassionate community response to AIDS. Programs are recommended to be directed in public schools, post secondary school educational institutions, hotlines and in the workplace.

A Numerical simulator for flow and transport in stochastic discrete fracture networks

by A. Rouleau. Saskatoon, Sask. : Inland Waters Directorate, National Hydrology Research Institute, 1988. vii, 204 p. : ill. Bibliogr. (NHRI paper : no. 39) (Technical bulletin ; no. 155) *French ed. (Simulateur numérique de l'écoulement. .) 88-05389 3*
ISBN 0-662-16290-0
MICROLOG 88-05388 3 fiche

This report documents the two programs used by Rouleau and Gale (1987), NETWRK and NETFLO, and two other related programs, APEGEN and NETRANS. The program NETWRK uses a Monte Carlo approach to generate two-dimensional discrete fracture networks based on the statistics of the main fracture-geometry parameters: fracture density, orientation, trace length, and aperture. The program APEGEN can then be used to generate different aperture distributions using the same fracture network geometry generated by NETWRK. The program NETFLO computes the steady-state fluid flow in the generated network, subject to specific boundary conditions; it also computes cumulative values of a number of flow parameters in each ten-degree range of direction. These latter directional flow parameters can then be used by the program NETRANS, which again uses a Monte Carlo approach to compute the transit time of particles over an arbitrary distance.

Numerical solution of Poisson's equation in a toroidal region with a rectangular cross-section

by J.B. Campbell. Ottawa : National Research Council Canada. Division of Electrical Engineering, 1987 v, 18 p.
MICROLOG 88-04436 1 fiche (Available on fiche only)

A 9-point different approximation to Poisson's equation in cylindrical coordinates with axial symmetry is solved by the fast Fourier transform method. Numerical results are given which indicate that the difference approximation produces results which are almost as accurate as the corresponding approximation for rectangular coordinates.

Object-oriented simulation of EW systems

by B.M. Barry. Ottawa : Defence Research Establishment Ottawa, 1987. xiii, 58 p.
Bibliogr. (Technical note : 87-31)
MICROLOG 88-03864 1 fiche

Simulations of complex EW systems are difficult to build and virtually impossible to thoroughly validate. As a consequence, most EW systems engineers tend to regard results derived from simulations as suspect, preferring to rely instead on laboratory testing and field trials for performance evaluations. The real problem may be that traditional simulations do not provide the kind of modelling and analysis tools which the systems engineer really needs. In this paper a prototype for a new kind of EW simulation environment which supports an object-oriented approach to modelling and simulation is described with background information on object-oriented programming, description of the software architecture of the simulation environment, and discussion of several examples which illustrate its use.

Objective procedure for fish freshness evaluation on nucleotide changes using a HPLC system

by B.G. Burns, P.J. Ke and B.B. Irvine
Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region, Fisheries Development Branch, Halifax Laboratories, 1985. iv, 35 p. ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1373)
ISSN 0706-6457
MICROLOG 88-04103 1 fiche

A high performance liquid chromotography (HPLC) method for determining ATP degradation products in biological samples has been developed. Nucleotides are extracted with 0.6 M perchloric acid, and determined by HPLC using a reversed phase microparticulate column with UV absorbance detection (254 nm). The mobile phase is a 0.01 M phosphate buffer (pH 4.5) at 0.5 ml/min. By applying the described method, post-mortem nucleotide changes in various fish meats were investigated and two new indicators of fish freshness defined. Biodeterioration of post-mortem samples in terms of G and P values for a number of fish species were discussed and some tentative recommended guidelines of both P and G values proposed for further grading operations.

Oblique aerial photo index for southern British Columbia (1976-86)

by W.N. Holman. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection Service, Pacific and Yukon Region, 1987. iv, 86 p. : maps. Bibliogr. (Regional program report ; 87-05)
MICROLOG 88-03005 2 fiche

In 1975, a vertical aerial photographic system called the Light Aircraft Camera was developed by the Environmental Protection Service in Ottawa for use by various Environmental Protection Service regions across Canada. This system, consisting of two Vinten 70 mm cameras and video navigation/recording equipment, was designed to be installed in commonly available small charter aircraft for use in photographic mapping as and when required. The index is a compilation of oblique aerial photographs of over 100 sites, including a variety of industrial operations, landfill sites, harbours and waterways located in southern British Columbia. Flights were conducted between 1976 and 1986 to provide information on observable environmental impacts, or to document visual reference material for future environmental investigations. Information on the type of aircraft and cameras chosen for optimum results, as well as the film and processing, is provided.

Observations of lake trout *Salvelinus namaycush* spawning behaviour in low pH lakes near Sudbury, Ontario

by V.A. Liimatainen, E.J. Snucins and J.M. Gunn. Toronto : Ontario Ministry of Natural Resources, 1987. i, 71 p. : maps. Bibliogr. (Ontario fisheries acidification report series ; no. 87-10) ISSN 0832-7629 ISBN 0-7729-3256-5
MICROLOG 88-06153 1 fiche

As lakes acidify, fish populations generally decline through failure to spawn or mortality during early life history stages. In long-lived species such as lake trout, acid stressed populations can be composed of only a few adults which survive for a decade or more after spawning has ceased. This paper describes lake trout spawning assessments conducted during 1983-85 on 4 low pH lakes near Sudbury (Whitepine Lake (pH 5.7), Laundrie Lake (pH 5.36), Michaud Lake (pH 5.45) and Marina Lake (pH 5.13)). Lake Panache (pH 6.38) was included as a control. Detailed descriptions of brood stock status, lake trout spawning behaviour, and spawning sites for each of the above lakes are described. Extensive use was made of ultrasonic transmitter tags to monitor fish movements.

Observations of seawater temperature and salinity at British Columbia shore stations, 1985

by L.F. Giovando. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1987. iii, 104 p. Bibliogr. (Canadian data report of hydrography and ocean sciences : no. 55) ISSN 0711-6721
MICROLOG 88-00072 2 fiche

Surface oceanic salinities and temperatures have been recorded once a day at several locations on the coast of British Columbia for varying lengths of time--from about one year to several decades. This publication presents the data obtained in 1985 from 17 such shore stations. The data obtained are presented in two forms: tables provide, for each site, the monthly means and the associated standard deviations; graphs indicate the behaviour, throughout the year, of the data after the higher-frequency oscillations (e.g., those associated with lunar tides) have ben removed by the use of a seven-day normally-weighted running mean.

Observations on electrostatic effects in a filter test system

by J.R. Coleman. Ottawa : Defence Research Establishment Ottawa, 1987. v, 32 p. : ill. Bibliogr. (Technical note ; 87-18)
MICROLOG 88-01298 1 fiche

The filter test system FTS 400 makes possible the measurement of filter penetration as a function of particle or droplet size. To generate a challenge in the size range 0.01-0.31 um, it employs a TSI instrument, the electrostatic classifier, which selects a narrowly homogenous (monodisperse) aerosol from an initially heterogenous aerosol of dioctyl phthalate (DOP) or NaCl. A number of filter papers were observed using this system, and the penetration of the aerosol was measured.

Observations on ice cover and streamflow in the Yukon River near Whitehorse during 1985-86

by M.E. Alford and E.C. Carmack. Saskatoon, Sask. : Inland Waters Directorate, National Hydrology Research Institute, 1988. vii, 36 p. : ill. Bibliogr. (NHRI paper ; no. 40) (Scientific series : no. 162) *French ed. (Observations de la couverture...) on the same fiche.* ISBN 0-662-16407-5
MICROLOG 88-06216 1 fiche

The Yukon Ice Seasonality Experiment was initiated to obtain a better understanding of physical processes affecting the ice cover on northern lake and river systems. This report on the third year (1985/6) of the project documents meteorological, hydrological, and ice conditions, investigate the effects of specific ice conditions (e.g., leads, ice fronts, frazil deposits, and ice ripples) on river hydraulics, and introduces a new method for the measurement of river discharge in winter. A summary comparison of the 3 winters is presented. Studies were conducted on a 4.3-km reach of the Yukon River at Whitehorse.

Off-target deposit measurements and buffer zones required around water for various aerial applications of glyphosate

by N. Payne, J. Feng and P. Reynolds. Sault Ste. Marie, Ont. : Government of Canada, Canadian Forestry Service, Forest Pest Management Institute, 1987. ii, 23 p. Bibliogr. (Information report ; FMP-X-80) ISSN 0833-5540 ISBN 0-662-15591-2
MICROLOG 88-00717 1 fiche

This investigation was designed to quantify off-target deposit from three types of glyphosate application for forestry use, and to estimate the width of buffer zones required around water to protect fish and their food supply from direct toxicological effects. To overcome the difficulty of estimating different buffer widths to meet the various conditions encountered, a realistic worst case scenario was chosen. Applications of glyphosate (Roundup Monsanto) were made by helicopter using three types of dispersal system, a MICROFOIL boom (Union Carbide), a Through Valve Room (Waldrum Specialties) and a D8-46 hydraulic nozzle. Off-target glyphosate deposits on water and foliar surfaces were measured at various downwind distances from several swaths overlaid on a crosswind track. Airborne glyphosate was also sampled. Using these measurements, mathematical equations were formulated to predict glyphosate deposits on water surfaces downwind of multiple swath applications. Based on report measurements of the toxicity of glyphosate to salmon, rainbow trout and various aquatic invertebrates, an estimate was then made of buffer widths required around water bodies.

Office space characteristics : metropolitan region

Toronto : Metropolitan Toronto Planning Dept., 1987. 38, 22 p. : maps. *CSI 89181.008.*
MICROLOG 88-00725 1 fiche

Comprehensive analysis of office characteristics in the metropolitan region based on the Office Data Bank first developed in 1984. Regional characteristics examine the overall growth of office floor space in the Metropolitan Region which includes Durham, York, Peel, Halton and Metropolitan Toronto. A section on Metropolitan Toronto characteristics examines the overall characteristics of office space in the Metro area; Area Municipal Characteristics covers the trends within each of the area municipalities and Key Employment Areas examines the major employment areas and designated centres. Also covered are other characteristics related to office buildings such as the largest existing and proposed office buildings, non-office employment, head office locations and vacancy rates.

Official bilingualism in Canada : the second decade -- Reviewed

by R. Soucie. Ottawa : Library of Parliament, Research Branch, 1987. 21 p. Bibliogr. (Current issue review ; 86-11E) *French ed. (Le bilinguisme officiel...) on the same fiche.*
ISBN 0-660-12559-5
MICROLOG 88-00806 1 fiche

Despite the entrenchment of language rights in the constitution a number of issues remain unresolved with respect to the implementation of official languages policy in the federal government. As well new issues continue to arise in Ontario, Manitoba, New Brunswick, and especially Quebec with its concept of territorial rights clashing with the federal government's institutional approach. Current demographic trends continue to move in a way that works against the federal approach, and with official bilingualism in its second decade the fact that it is still creating major problems stresses the need for continued assessment of policy direction. This review examines three continuing areas of concern about language rights and language policy: the implications of constitutional entrenchment of language; the practical problems of implementation of official languages policy in the federal bureaucracy; and, the situation of official language minority rights in selected provinces.

On the appropriate output measure in the trucking industry

by R. Gagné. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 8 p. Bibliogr. (Publication ; no. 586)
MICROLOG 88-05758 1 fiche

The effects of output qualities on costs of trucking firms are not independent of the choice of the output measure used. This paper shows that the total number of shipments

is a more appropriated measure than the total ton-kilometres carried by firms.
PS SC TR

On the calibration of the combined distribution-assignment model

by S. Erlander, S. Nguyen and N.F. Stewart. Montreal : Université de Montréal, Centre de recherche sur les transports, 1978. 19 p. Bibliogr. (Publication ; no. 100)
MICROLOG 88-06372 1 fiche

The traditional transportation planning process deals with the sequential stages of trip generation, trip distribution, modal split, and assignment to the network. The model addressed in this paper treats trip distribution and assignment to the network simultaneously in the formulation used by Florian et al. (1975). In this case the objective function consists of a weighted sum of a certain (integral) function of the link costs and an entropy expression. The paper discusses the weakness of obtaining the deterrence factor from and independent calibration of the gravity model and provides insights into the direct calibration of the combined distribution-assignment model.
PS SC TR

On the combined distribution-assignment of traffic -- Rev.

by M. Florian, S. Nguyen and J.A. Ferland. Montreal : Université de Montréal, Centre de recherche sur les transports, 1974. 20 p. Bibliogr. (Publication ; no. 8) (Publication ; no 177)
MICROLOG 88-06296 1 fiche

In transportation planning, the distribution and assignment computations are treated sequentially as independent problems, although ideally they should be solved simultaneously. This paper attempts to shed some light on the eventual results of repetitive use of distribution and assignment computations. An approach is also developed for solving the distribution and assignment problem simultaneously and to relate it to other methods which have been proposed for the problem. A numerical example illustrates the conclusions drawn.
PS SC TR

On the probabilistic origin of Dial's multipath traffic assignment model

by M. Florian and B.L. Fox. Montreal : Université de Montréal, Centre de recherche sur les transports, 1975. 9 p. Bibliogr. (Publication ; no. 29) (Publication ; no 209)
MICROLOG 88-06309 1 fiche

Dial's multipath traffic assignment model apportioned trips to alternative reasonable paths in a way which is related to the length (cost) of these paths, and in addition required a modest computational effort when compared to the "all-or-nothing" method. This paper interprets Dial's model as a probabilistic choice model. Anomalies in path assignments generated by Dial's algorithm are related to the independence-of-irrelevant alternatives axiom.

A One-day test for determining frost hardiness using the electrical conductivity technique

by S.J. Colombo and D.F. Hickie. Maple, Ont. : Ontario Tree Improvement and Forest Biomass Institute, 1987. 4 p. Bibliogr. (Forest research note : no. 45) ISSN 0381-2650
MICROLOG 88-04324 1 fiche

In Ontario, frost hardiness testing is almost without exception the basis for determing when containerized tree seedlings in greenhouses are hardy enough to be moved outside for overwintering. Using the standard electrical conductivity procedure for measuring frost hardiness, test results are obtained in three days. This is a constraint upon operations, since approximately 45 million container seedlings from nearly 30 nurseries are annually overwintered in Ontario. This note describes a revised procedure which shortens the time required for measuring the degree of damage from 3 days to 1 day.

Bilingue. CSI 56147.001. ISSN 0319-7263
MICROLOG 88-04901 1 fiche

La Commission a reçu un nouveau mandat lorsque le gouvernement a réorganisé la structure de la gestion des ressources humaines en mars 1986. Elle s'attache maintenant à surveiller les réalisations du gouvernement en tant qu'employeur, particulièrement en ce qui a trait au respect du principe du mérite et à la promotion des valeurs propres à la fonction publique. Ce rapport annuel porte sur la 1re année complète de fonctionnement de la nouvelle structure organisationnelle. Il décrit les activités de la Commission dans son nouveau rôle et présente les progrès qu'a réalisés le Secrétariat des ressources humaines dans l'exercice des responsabilités qui lui ont été confiées.

The Ontario Lake of the Woods fisheries atlas

Kenora, Ont. : Ontario Ministry of Natural Resources, 1986. v, 50 p. : maps. Bibliogr.
MICROLOG 88-01219 1 fiche

Atlas summarizing current information on the status of Lake of the Woods fishery in Ontario and related socio-economic data. While concentrating on the Ontario fishery, data is also incorporated on the Buffalo Bay (Manitoba) and Minnesota sectors of the lake. The Ontario waters of the lake were divided into 7 sectors forming separate basins with distinct limnological, fish community and user group characteristics. The potential yield by species and sector was based on the overall capability of a particular sector to produce a crop of fish as indicated by the morphoedaphic index. Estimates of both actual harvest and potential yield by species were used to determine the target level which reflects the actual status of the stock and insures maintenance of a harvestable population.

MICROLOG 88-04286 1 fiche

The Ontario Lottery Corporation was established in 1975 to develop and manage provincial government lotteries. The Corporation operates six lotteries in Ontario Wintario, Lottario, Instant (Ontario-only game), Provincial, Super Loto and Lotto 6/49 (interprovincial game). This annual report covers the year in review, gives a profile of winners, lists grants awarded, and discusses the Corporations proposed move to Sault Ste. Marie. The document also includes financial statements.

Ontario universities statistical compendium, 1970-1987, part A : macro-indicators

Council of Ontario Universities. Research Division. Toronto : The Division, 1988. v, 43 p. *CSI 56103.002.* ISBN 0-88799-228-5
MICROLOG 88-04808 1 fiche

With increasing amounts of detailed data on post-secondary education being turned out each year, decision-makers in recent years have hoped for a concise series of macro-indicators which would measure what was taking place and assist in focussing on what decisions had to be made. The COU Committee has identified basic objectives which are listed in this report. The report also presents a statistical compendium that provides these macro-indicators and analyses, together with commentary on the material and a glossary of terms and definitions. In addition, derived system data which have been used in development of the indicators are presented. Data includes operating revenues, research and operating expenditures, and operating grants in Ontario universities.

Optimal strategies : a new assignment model for transit networks -- Rev.

by H. Spiess and M. Florian. Montréal : Université de Montréal, Centre de recherche sur les transports, 1988. 33 p. Bibliogr. (Publication ; no 286) (Publication ; no. 466)
MICROLOG 88-02273 1 fiche

Description of a model for the transit assignment problem with a fixed set of transit lines in which the traveller chooses the strategy that allows him/her to reach his/her destination at minimum expected cost. Cases are considered in which no congestion effects occur and in which the waiting time at a stop depends only on the combined frequency. In the latter, the problem is formulated as a linear programming problem of a size that increases linearly with network size. A label-setting algorithm is developed that solves the latter problem in polynomial time. Nonlinear cost extensions of the model are considered as well.

Optimisation des horaires d'équipages d'avions

par S. Lavoie. Montréal : Université de Montréal, Centre de recherche sur les transports, 1985. 44 p. Bibliogr. (Publication ; no. 400)
MICROLOG 88-00461 1 fiche

La rotation utilisée comme unité de base pour l'assignation des équipages est définie comme une séquence de tronçons (segments de vols) pouvant être effectués les uns à la suite des autres. Pour générer un ensemble de rotations, on a utilisé dans cette recherche une toute nouvelle approche basée sur une technique de programmation linéaire généralisée. Le document présente la formulation mathématique du modèle et l'analyse des résultats obtenus sur les données de la compagnie Air France.

Optimisation of grinding and flotation parameters : pilot-plant treatment of Quebec talc ore

by P.R.A. Andrews and J.P. Rouleau. Ottawa Canada Centre for Mineral and Energy Technology, 1987. iii, 47 p. Bibliogr. (Report ; MSL 87-120(IR)) *Project 30.21.02 beneficiation of industrial minerals.*
MICROLOG 88-03171 1 fiche

In a previous study concerning the laboratory scale evaluation of talc ore from Bakertalc, Highwater, Quebec, several recommendations were made concerning the optimisation of grinding and flotation parameters. Due to a planned expansion at Bakertalc, it is now necessary to accurately establish flotation retention times so that necessary flotation cell capacity can be planned. This study addresses each of these parameters on a pilot-plant scale.

An Optimization algorithm for trucks dispatching in an open pit mine

by F. Soumis, J. Ethier and D. McInnis. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. i, 35 p. Bibliogr. (Publication ; no. 466-A)
MICROLOG 88-01666 1 fiche

In the past few years, a number of truck dispatching systems were developed for open pit mines using sophisticated telecomunication equipment to detect the true working time of trucks and shovels. This paper proposes an advanced dispatching system integrating both the planning and control functions in selecting the available equipment and the areas to be worked in the mine.

Optimization for maximum production of truck-shovel mining systems

by V. Srajer...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1988. v, 19 p. Bibliogr. (Report ; CRL 88-17(OP.TR))
MICROLOG 88-06049 1 fiche

Several optimization approaches used by the mining industry were used to investigate surface coal mining operations in Canada. A computer program was applied to optimize truck/shovel systems and for various analysis. The analysis of eight western Canadian coal mines included investigation of fleet imbalance, under- and over-trucking, development of the criteria for automated truck control, comparison study of various haulers and loaders, haulage layout, driving conditions, machine performance, and servicing and maintenance policies. Each property investigated supplied background information for the study and cooperated in optimization studies.

Optimization of fungal adsorption of uranium and cell immobilization and pelletization : final report

by Acres Davy McKee Engineering Inc....et al.. S.l. : Acres Davy McKee Engineering Inc., 1987. 56 p. : ill. *CANMET contract: 69052-01-SQ.*
MICROLOG 88-01565 1 fiche

The volumes of leachate encountered in bioleaching are enormous, uranium concentrations are low, and the costs of pumping millions of gallons per day of such leachate are very high. Therefore, the best means of producing and utilizing fungal biomass for the recovery are being sought. This report presents the results of an investigation of the nutrient requirements to obtain a high uranium adsorptive capacity for inactivated Penicillium biomass; investigation of the ability of physical and chemical factors to alter the uranium adsorptive capacity of the fungal cell walls; and a preliminary investigation of the immobilization and the pelletization of the fungal biomass to allow its use in a packed column uranium recovery system.

Optimization of protection as a decision-making tool for radioactive waste disposal

by K. Bragg. Ottawa : Atomic Energy Control Board, 1988. 14 p. Bibliogr. (Paper ; INFO-0267)
MICROLOG 88-06128 1 fiche

Optimal radiation protection in radioactive waste management, can be limited application of the optimization principle as it applies to radiation protection or can be a more general application to complete disposal systems or concepts. This paper focuses on the relationship between these two types of optimization, pointing to the fundamental differences between actual decisions which are made about waste disposal systems and those which might appear to be justified based on radiation protection principles alone. Examples are given which characterize some of the advantages and disadvantages of the optimization principle.

Optimization of the 'Kool-fire' heat pump

by D.F. Cuthbert and D.J. Young. Toronto : Ontario Hydro, Research Division, 1987. viii, 37, 30 p. Bibliogr. (Report ; no. 87-63-K)
MICROLOG 88-00143 1 fiche

The Kool-Fire model HC3 heat pump is a residential heating device, manufactured in Canada, that acts as a hybrid heat pump and condensing-gas furnace combining a conventional air-source heat pump with a gas burner that is located under the outdoor coil. It is sold as a complete home comfort system, providing all necessary heating in the winter and air-conditioning in the summer. This report presents the results of an assessment of the performance and potential improvement to the hardware, each of which were examined and tested separately. Operational considerations, including operating costs and changeover methods, are also included.

Optimizing the tracometer for use in detecting impairment

by L. Buck, B. Grant and M. Anderson. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1987. iv, 14 p. : ill. Bibliogr. (Technical report ; TR-SYS-014)
MICROLOG 88-04438 1 fiche (Available on fiche only)

Legislation which defines the offence of driving while under the influence of alcohol assumes that behavioural impairment is related to the concentration of alcohol in the blood and frames its provisions in terms of blood alcohol concentration rather than impairment as such. Despite the difficulties of measurement, attempts have been made to detect such states of impairment. The tracometer is a subject-paced pursuit tracking task and as such requires a more complex target display than the simple error display used by the critical tracking task. It also requires, in its present form, a longer test period. The experiments described here were designed to test whether the form of the tracometer and the procedure for carrying out a test could be simplified. The performance of subjects using modified versions of the tracometer was compared with that using the original standard version. No tests were carried out at this point to see whether the simplified versions could equally well detect impairment due to alcohol.

Organic and iron-rich colloids in three major rivers of Ontario's Arctic watershed

by G.C. Leppard, R.C. McCrea and D. Uriciuoli. Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1988. 25 p. : ill. Bibliogr. (NWRI contribution ; 86-136)
MICROLOG 88-04721 1 fiche

Water samples from three northern Ontario rivers (Winisk, Attawapiskat, Moose), known to have elevated levels of naturally-occurring organic matter, were sampled in 1984-1985. These samples were fractionated by means of filtration (0.65 um pore diameter) followed by an ultracentrifugation step (105,000 g) to divide the aqueous (or "non-particulate") fraction into dissolved and colloidal fractions. The fractions were analyzed for organic carbon and iron content, and they were examined by transmission electron microscopy and energy-disperse spectroscopy. The colloidal fraction was characterized in terms of the structure, size, shape and relative iron level of the major colloidal particulates.

Organochlorine contaminants in ambient waters of Lake Ontario

by J. Biberhofer and R.J.J. Stevens. Burlington, Ont. : Inland Waters/Lands Directorate, 1987. v, 11 p. Bibliogr. (Scientific series ; no. 159) *French ed. : 87-06094/1.* ISBN 0-662-15532-7
MICROLOG 88-05373 1 fiche

The organochlorine contaminant burden of Lake Ontario is the result of municipal and industrial point source discharges; tributary inputs; atmospheric deposition; the Niagara River; and resuspension of contaminated bottom sediments. This study is part of the Great Lakes Surveillance Program, designed to identify areas that would warrant more intensive sampling and to locate point sources, as well as to provide a baseline for the evaluation of trends with respect to selected parameters. Samples were collected from one meter below the surface in October 1983, at 14 stations, and analysed for a range (23) of organochlorine contaminants: chlorobenzenes, pesticides and their by-products, and polychlorinated biphenyls (PCBs).
CA EV ON SC

Organochlorine pesticides and polychlorinated biphenyls in Lake Superior precipitation

by C.H. Chan and L.H. Perkins. Ottawa : Water Quality Branch, Ontario Region, 1985. 23 p. : ill. Bibliogr.
MICROLOG 88-04712 1 fiche

The discovery of chlorinated pesticides (OCs) in remote regions of the world has demonstrated the problem of long range transport of atmosphere pollutants on a global scale. Within the Great Lakes Basin, organic contaminants found in the aquatic habitats in Siskiwit Lake of Lake Superior point to atmospheric deposition as a likely source. Numerous studies have identified the presence of the OCs and the PCBs in rain and snow samples in the Great Lakes and a report submitted to the International Joint Commission concluded that the Upper Great Lakes were especially susceptible to the impact of organic contaminants because of their huge volumes, long residence times, low productivities and low sedimentation rates. Water Quality Branch of Environment Canada has developed a precipitation collector for year round collection of rain and snow samples for organic analysis. Two of these collectors have been located on the north shore of Lake Superior for over two years. Results from these samplers represent the first attempt to collect time series data for organic contaminants in atmospheric precipitation. This is a report on the data collected to date.

Organochlorines and polyaromatic hydrocarbons in the St. Lawrence River at Wolfe Island, 1982-84

by A. Sylvestre. Burlington, Ont. : Inland Waters/Lands Directorate, Ontario Region, Water Quality Branch, 1987. v, 11 p. Bibliogr. (Technical bulletin ; no. 144) *French ed. (Les organochlorés et...) on the same fiche.* ISBN 0-662-15626-9
MICROLOG 88-00408 1 fiche

The intensive agricultural use of pesticides between 1950 and 1970 and improper disposal methods for many other toxic substances are among the practices responsible for the current contamination problem in the Great Lakes basin. Until recently, toxic contaminant problems in the eastern end of the lake were rarely reported. This report presents and evaluates the results from the first 3 years of data collection from the Wolfe Island permanent station located on the south channel of the St. Lawrence River. The report provides a description of the station and sampling procedure, the occurence and concentration or organochloride pesticides, PCBs, chlorobenzenes, and polyaromatic hydrocarbons, and estimates the loadings to the St. Lawrence River for the main contaminates.

by J.E. Udd. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iii, 12 p. (Report ; MRL 87-87(TR))
MICROLOG 88-01180 1 fiche

The International Society of Rock Mechanics is comprised of national groups located on all 6 continents. Each year the Society sponsors an International Symposium and, every 4 years, an International Congress. At each of the Congresses the regional vice-presidents are required to present comprehensive reports of the developments which have taken place in their respective areas since the previous Congress. This report from the Canadian group presents an overview of the developments in rock mechanics which have taken place in Canada from 1983-87: the evolution of the Canadian national group; meetings and symposia organized in Canada, major advances in rock mechanics; and national initiatives and trends.

An Overview of phosphorus, nitrogen and organic carbon of Manitoba interjurisdictional river sites, 1970-1979

by D. Gregor and V. Chacko. Ottawa : Environment Canada, Western and Northern Region, Water Quality Branch, 1987. iv, 51 p. : maps. Bibliogr.
MICROLOG 88-00412 1 fiche

Report of water quality sampling including all major incoming (20) and outgoing (4) rivers in Manitoba. The report provides a summary and overview of the phosphorous, nitrogen and organic carbon data available for transboundary water sites with respect to spatial patterns and annual cycles; discusses these patterns and cycles in relationship to gross drainage basic characteristics, including geology, soils, land use and other factors; and evaluates the data for problems, completeness and inadequacies. A detailed methodology is included.

Overview of Regina's development and population trends -- Revised

Regina : Regina Planning Dept., 1984. 43 p. : maps. *CSI 89280.203.*
MICROLOG 88-05775 1 fiche

The report examines present rates of land absorption for development in relation with demographic trends in Regina. It identifies a major underachievement of Concept Plans for the Northwest and Southeast sector. If present trends of development continue, lands will be absorbed sooner and would accommodate smaller population than expected, requiring excess investment rates in infrastructure and services per capita. To cope with that problem two alternatives are presented: to develop the areas in higher densities and to implement infill and redevelopment in the inner city to replace an equivalent of 12 years of land absorption in the periphery. A recommendation is stated to establish a Task Force to further review the implication of the changes in population characteristics.

Overview of the Canadian surface finishing industry : status of the industry and measures for pollution control

by Chemical Industries Division, Environmental Protection, Conservation and Protection, Environment Canada and J.E. Hanna Associates Inc. Ottawa : Environment Canada, Environmental Protection Service, 1987. x, 116 p. Bibliogr. (Report ; EPS 2/SF/1)
MICROLOG 88-02070 2 fiche

The metal finishing industry is known to discharge many potentially toxic chemicals. This report compares the current status of the industry with the findings presented in the 1973 review, and measures the impact of the guidelines and other control requirements adopted by provincial and municipal agencies. This review has been expanded to include plating on non-conductors. In addition to liquid effluents, sludges and air emissions are examined. Specific objectives described plating processes that generate wastes and the appropriate control technologies, determined the status of compliance with government controls, and recommended future actions that environmental agencies should consider.

Paradoxes in equilibrium traffic assignment and their implications for optimal planning strategies -- Rev.

by C. Fisk and S. Pallottino. Montreal : Université de Montréal, Centre de recherche sur les transports, 1980. 13 p. : ill. Bibliogr. (Publication ; no. 144)
MICROLOG 88-06420 1 fiche

A recent study by Fisk (1979) into the sensitivity of the user equilibrium assignment solution to changes in input flows revealed that for certain network configurations the model exhibits properties which are counter-intuitive; namely that an increase in input flows can lead to a decrease in total travel costs. These findings are extended here to show that this phenomenon may occur in 'real life' using calibrated network data for the City of Winnipeg. The significance of these results for the problem of determining optimal planning strategies is discussed. Also examined are some of the implications of these results for the network design modelling where the simplifying assumption that the traffic assignment is system optimized is often made.

Parking and accessory apartments : a Metro Toronto case study -- Revised

prepared by Marshall Macklin Monaghan Limited in association with McNair & Marshal. Toronto : Ministry of Municipal Affairs ; Ministry of Housing, 1988. 66 p. : ill., maps. Bibliogr. *At head of title: Neighbours. CSI 55115.201.* ISBN 0-7729-3599-8
MICROLOG 88-04904 1 fiche

The purpose of this study was to examine whether the parking demand associated with intensification can or cannot be accommodated in areas that are intensifying, and, therefore, whether meeting the parking demand created by intensification hinders the potential of an area to intensify. Various factors such as the nature and location of the neighbourhood, size of unit, and socio-economic characteristics of the inhabitants were investigated to determine if the parking demand associated with intensification is dependent upon such factors. The study also provides municipalities with general guidelines that can be used to assess parking requirements associated with residential intensification.

Part-time work -- Reviewed

by M. Baker. Ottawa : Library of Parliament, Research Branch, 1987. 13 p. Bibliogr. (Current issue review ; 85-7E) *French ed (Le travail à...) on the same fiche.* ISBN 0-6600-12555-2
MICROLOG 88-00797 1 fiche

Canadian as well as world trends indicate that the number of part-time workers will reach 20% of the labour force by the end of the century. A rise, in Canada at least, from 3% of the labour force in 1956. This report studies the trends and focuses on the issue that it is women who are probably most adversely affected by the increase. Through a survey of types of part-time workers and benefits, this report discusses the long-term implications for women, such as their disproportionate level of old-age poverty, and consequences resulting from part-time employment that affect their families. Overviews major government studies on part-time employment and the federal government's performance as an employer in regulating part-time work. Documents a chronology of related parliamentary action.

PATLQ : programme d'analyse des troupeaux laitiers du Québec : option 'régulier', option 'officiel', option 'postal' : rapport sommaire

Québec : Gouvernement du Québec, Ministère de l'agriculture, des pêcheries et de l'alimentation, Service des productions animales, 1987. 64 p. : ill. ISBN 2-550-17570-0
MICROLOG 88-03505 1 fiche

L'année 1986 marque le 20e anniversaire du Programme d'analyse des troupeaux laitiers du Québec (PATLQ). Au cours de cette période, le PATLQ a largement contribué à l'amélioration de la productivité du cheptel laitier québécois. Ce document contient une série de tableaux présentant les résultats sommaires de production pour l'année 1986. La liste des troupeaux ayant obtenu les meilleurs rendements au cours de l'année comprend les troupeaux dont la moyenne de production a dépassé de 10 unités la M.C.R. moyenne de la race PATLQ-Officiel.

Le Patrimoine archéologique de compétence fédérale, protection et gestion : document de travail

publié par le ministère des Communications ; avec la collaboration du ministère de l'Environnement, ministère des Affaires indiennes et du Nord, ministère des Transports, et du musée canadien des civilisations. Ottawa : Ministère des communications, 1988. 72, 70 p. *Bilingue (Federal archaeological heritage...)*
MICROLOG 88-03567 2 fiche

Notre patrimoine archéologique constitue un atout national important et un témoignage concret sur les peuples qui ont vécu au Canada au cours des 12,000 dernières années. Ce document est destiné à établir la base d'un dialogue constructif parmi les Canadiens sur les questions de protection et de gestion du patrimoine archéologique. On y aborde, dans un 1er temps, le processus de consultation, c'est-à-dire les questions à l'intention du public et la façon de prendre part à la consultation. Dans un 2e temps, on fournit des renseignements de base sur la patrimoine archéologique: son importance, la position du gouvernement fédéral, la compétence fédérale et celle provinciale, la protection du patrimoine archéologique, la gestion actuelle par le gouvernement fédéral et les problèmes et types de solutions.

Pavement deflection measurement by an indirect response method

prepared for Transportation Development Centre of Transport Canada and Roads and Transportation Association of Canada ; by Bill Swindall, Dave McDaniels. Paris, Ont. : Roads and Transportation Association of Canada, 1986. x, 66 p. : ill Bibliogr. *TP 7671E.*
MICROLOG 88-00319 1 fiche

The structural strength of a roadway is a key factor in characterizing a pavement and in determining rehabilitation strategies for a roadway or road surface. Currently available

equipment for measuring structural strength requires stopped or near-stopped operation for obtaining the measurement. This study investigated a method of measuring roadway structure that is particularly suited for implementation at speeds of up to 60 km/h. the method involved instrumenting an impact probe and characterizing its response during an impact blow on a pavement surface. The testing outlined in this report was conducted with a stationary prototype. The impact response was characterized by the peak deceleration, peak rebound, velocity, and maximum pavement penetration of the impact probe. These results were compared to results obtained with an SIE Dynaflect.

PCB field test kit evaluation

report prepared for the Commercial Chemicals Branch ; by Marcel DeBellefeuille. Ottawa : Environment Canada, Environmental Protection Service, Technical Services Branch, 1985. viii, 35 p.
MICROLOG 88-01168 1 fiche

Evaluations of three polychlorinated biphenyl field test kits manufactured by McGraw-Edison Company, Syprotec Inc., and Dexsil Chemical Corporation. For the field evaluation, National Defence personnel assisted in collecting 86 oil samples in November, 1983, from out-of-service transformers awaiting disposal at Canadian Forces Bases Ottawa North and South. Seventy-eight of the 86 oil samples were tested with the field test kits. Of these, 40 were selected and submitted to Syprotect Analytical Services Inc. for analysis by gas chromatography (GC): the results of the analyses were used as a reference with which to compare the results obtained from field test kits. Of the 40 samples analyzed by Syprotect, five were also submitted to the Technical Services Branch organic laboratory for confirmation of the results obtained by Syprotec.

Peace and security in the 1980s : the view of Canadians

by D. Munton. Ottawa : Canadian Institute for International Peace and Security, 1988. 86 p. : ill. (Working paper)
MICROLOG 88-01595 2 fiche

Report on a public opinion survey designed to elicit an overview of common conceptions and misconceptions held, especially the latter in reference to three criticisms about public opinion competency: coherence, which questions the public's ability to judge on rarified subjects; coloration, which shows that the public veers either towards complete pacifism or jingoistic and militaristic extremes when an option to war is imminent; and constancy, which questions the sometimes erratic nature of peoples' opinions. In light of these assumptions the survey results discuss perceptions of threat, superpowers, the possibility of nuclear war, policy preferences, Canadian policies. The report contains a sample questionnaire with data analyzed by age, gender and language, and constancy

Peace-Athabasca Delta water management works evaluation : appendices

Edmonton : Peace-Athabasca Delta Implementation Agreement, 1987. 3 v. : ill. *Contents: Appendix A: Hydrological assessment -- Appendix B: Biological assessment -- Appendix C: Ancillary studies. Final report : 88-00297/1.*
MICROLOG 88-03293 10 fiche

Report prepared at the request of the Committee to evaluate the hydrological performance of remedial weirs constructed in the Peace-Athabasca Delta on the outlet channels of Lake Athabasca. The two rock weirs were constructed in 1976 as a major part of an implementation agreement between the governments of Canada, Alberta and Saskatchewan to restore as nearly as possible water levels in the Peace-Athabasca Delta and thereby reestablish associated ecological conditions. This report represents the findings and conclusions reached by members of the Hydrology Subcommittee regarding the weir performance and hydrological conditions in the delta. The comparative model simulations for 1960-81 were constructed of the natural regime, and the regulated regime in combination with the Rivière des Rochers and Revillon Coupé weirs, using a one-dimensional hydrodynamic model developed in the late 1970s.

Peat slurry pumping-pipeline trials on a Canadian peatland site

prepared for Renewable Energy Branch, Energy Mines and Resources Canada ; prepared by Monenco Peat Group. Ottawa : The Branch, 1987. xvii, 287 p. : ill. Bibliogr. ISBN 0-662-15815-6
MICROLOG 88-06160 4 fiche

Third phase of a study on peat rheology and peat slurry pumping. This project carried out a full-scale mining and peat slurry pumping test on a virgin Canadian peatland site and demonstrated the use of an integrated mining and peat slurry pumping system. The site selected, near Gravenhurst, Ontario, offered suitable access, variation of peat type and degree of decomposition, adequate water supply, minimum site preparation, and considerable open areas without tree cover. Details are given on the peat slurry pump/pipeline and the water supply pump/pipeline system tests, as well as pump performance, friction loss, critical length, and settling and dewatering.

La Pêche à la crevette, 1982-86

Québec : Bureau de la statistique du Québec, Direction des statistiques économiques, 1988. 17 p. : ill. *CSI 67131.016.*
MICROLOG 88-04542 1 fiche

Ce rapport statistique présente les principales statistiques de la pêche à la crevette au Québec de 1982 à 1986. On y trouve de l'information sur l'activité de pêche proprement dite et sur ses implications financières. Les mesures statistiques les plus simples, comme la moyenne arithmétique, la médiane et l'étendue, sont données pour l'effectif, les voyages, les captures, les valeurs au débarquement et les rendements. Il en est de même pour la plupart des tableaux sur le revenu, les dépenses d'entretien et d'exploitation. Enfin, un tableau présente les effets de la pêche à la crevette sur le secteur secondaire en donnant des statistiques sur les emplois en usine qui découlent de cette activité de pêche et sur les sommes versées à ces travailleurs.

Pêche exploratoire du crabe épineux du nord *Lithodes maia* pour le chenal esquiman et le sud du chenal laurentien

par E. Ferguson et L.G. Lanteigne. Ottawa : Ministère des pêches et oceans. Developpement et repartition des ressources, 1986. 16 p. : ill. Bibliogr.
MICROLOG 88-04140 1 fiche

Dans la péninsule acadienne, la saison de pêche du crabe des neiges se termine généralement vers la mi-juillet. Il serait économiquement et socialement avantageux de développer une pêche qui pourrait être un complément à l'industrie du crabe. Selon certains pêcheurs et propriétaires d'usine, la pêche au crabe épineux du Nord pourrait être ce complément. Dans le but de vérifier cette hypothèse, on a entrepris une pêche exploratoire dans le Golfe St-Laurent. Les objectifs de cette pêche étaient d'estimer la population et la distribution du crabe épineux, d'évaluer le rendement et la sélectivité de l'engin de pêche, de déterminer le rendement en chair de crabe et de développer des méthodes de transformation. Ce document contient les résultats et les conclusions de cette étude.

Pension standards for Prince Edward Island : proposals for discussion

Charlottetown : Dept. of Finance, 1988. 10 p.
MICROLOG 88-05200 1 fiche

The intent of Pension Standards legislation is to set basic minimun standards for employer sponsored pension plans. The legislation does not compel employers to provide pension plans, nor does it compel employees to belong to pension plans. But if a plan is in operation in the province then it must meet the standards in the legislation. The standards being contemplated by the Government of Prince Edward Island are based on a federal-provincial consensus which has been adopted by Maritime provinces, Ontario, Alberta and the federal government. These standards have been developed out of a common desire to improve income security of Canadians in their retirement. The purpose of this discussion paper is to describe the standards being contemplated with a view to receiving comments from interested parties.

Pentachlorophenol thermal wood preservation facilities : recommendations for design and operation

by D.E. Konasewich and F.A. Henning. Ottawa : Environment Canada, Environmental Protection Service, 1988. xi, 88 p. : ill. Bibliogr. (Report ; EPS 2/WP/5) *French ed. (Installations de préservation...) : 88-03694/2.*
ISBN 0-662-16127-0
MICROLOG 88-03693 2 fiche

Wood preservation is the pressure or thermal impregnation of chemicals into wood to a depth that will provide effective long-term resistance to attack by fungi, insects, and marine borers. The chemicals predominantly used in Canada for wood preservation are pentachlorophenol, creosote, and aqueous formulations of arsenic, copper, and chromium or ammonia. The wood preservation process deposits or fixes these chemicals in the wood, and the toxic nature of the chemicals effectively prevents the attack of living organisms on the wood. Because the chemicals are also toxic in varying degrees to humans and aquatic organisms, their use in industry must be carefully controlled. This document provides guidelines for the design and operation of wood preservation facilities in a manner that will protect workers and the environment from harmful exposure to wood preservation chemicals.

Perceived impacts of the Norman Wells Project on social conditions and Native peoples

by D.A. Stewart. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1986. 30 p. : ill. Bibliogr. (DIAND monitoring reports ; 5-85)
MICROLOG 88-06113 1 fiche

The impact of an industrial project on social conditions in the study communities was found to be difficult to assess. For this reason, two approaches were utilized by the Norman Wells Socio-economic Impact Monitoring Program to assess the social impacts of the Project. The first was to review available data in order to evaluate it as a potential secondary source. The second approach was the insertion of two questions into the perception section of the household questionnaire. The responses to these two questions for the 1985 household questionnaire form the basis of this report.

Percent carboxyhemoglobin in resting humans exposed repeatedly to 1,500 and 7,500 ppm CO

by P. Tikuisis, F. Buick and D.M. Kane. Ottawa : Defence and Civil Institute of Environmental Medicine, 1987. p. 820-827 : ill. Bibliogr. *In Journal of Applied Physiology* vol. 63, no. 2, 1987 p. 820-827.
MICROLOG 88-01060 1 fiche

Eleven nonsmoking male resting subjects were exposed to 2 transient CO profiles to examine whether the resultant carboxyhemoglobin (HbCO) differs with CO concentration for a fixed total dose of CO and to determine the predictive capability of the theoretical model of Coburn using measured alveolar ventilation. One profile consisted of 5 sequential exposures to 1,500 ppm CO for 5 min. each and spaced 3 min. apart. The other consisted of 5 sequential exposures to 7,500 ppm CO for 1

La Perfection n'est pas de ce monde : introduction aux difficultés d'apprentissage à l'intention des employeurs

Ottawa : Emploi et immigration Canada, 1988. 15, 15 p. *Bilingue (Nobody's perfect...).* ISBN 0-662-55645-3
MICROLOG 88-03735 1 fiche

Il existe des milliers de personnes qui présentent des difficultés d'apprentissage et qui n'en sont pas moins intelligentes et pourvues de nombreux talents et possibilités. De plus en plus d'employeurs prennent conscience des compétences et de la capacité des travailleurs qui ont des difficultés d'apprentissage particulières. Le but de ce guide est de fournir des informations utiles à tous ceux que concernent les secteurs de l'embauchage, du maintien de l'effectif et de la formation. On y définit d'abord l'expression difficulté d'apprentissage et on y propose divers moyens pour aider les employeurs à reconnaître les membres de leur personnel qui peuvent présenter des difficultés de cette nature de même que des suggestions sur les plans de l'adaptation, de la surveillance et des mesures à prendre.

Performance evaluation of the dynamic wall house

University of Toronto, Centre for Building Science. Ottawa : Canada Mortgage and Housing Corporation, Project Implementation Division, 1988. v, 51 p. : ill.
MICROLOG 88-06481 1 fiche

The Centre for Building Science, University of Toronto, has been carrying out research on dynamic insulation, moisture dynamics in walls, and the effect of negative pressure on building performance. Recently this work involved the design and construction of a house which incorporates dynamic wall insulation. When this house was completed, a performance evaluation was conducted to demonstrate the concept and to monitor the performance of the house operating in a cold winter environment. Factors examined were: airtightness of the building; the effect of wind on air supply to the house; incoming dynamic air flows and temperatures; wall surface temperatures; moisture levels and drying of the walls while in dynamic operation; and the performance of a naturally aspirated wood burning stove in a negative pressure environment.

Performance of a wet scrubber to reduce long-lived radioactive dust emissions in underground uranium mines

by J. Bigu, M.G. Grenier and S.G. Hardcastle. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. i, 23 p. : ill. Bibliogr. (Report ; MRL 87-85(TR))
MICROLOG 88-03387 1 fiche

Investigation of the performance of a wet scrubber to control long-lived and short-lived radionuclides associated with airborne particulate matter in the submicron and respirable ranges. The study was conducted during hard rock crushing operations at a crusher plant in an undergrond uranium mine. Measurements were carried out of long-lived radioactive dust concentration and radon progeny and thoron progeny. Working levels and mineral dust and radioactive dust size distributions were measured by means of 8-stage cascade impactors. Measurements were preferentially conducted at the crusher platform, the wet scrubber itself, and in an area adjacent to the crusher.

A Performance survey of tapecrete installations in Ontario

by R.M. Rollings. Toronto : Ministry of Transportation of Ontario, Engineering Materials Office, Concrete Section, 1987. 3, 11 p. : ill.
MICROLOG 88-01169 1 fiche

Over the past 10 years, tapecrete has been recommended for use on structure barrier walls with insufficient cover or lace of entrained air, to extend the life of the wall by retarding the penetration of chlorides. In most cases where tapecrete was used, the treatment consisted of a layer of fibre reinforcement surrounded by 2 layers of latex modified grout. Application of 2 layers of grout without the fibre has also been tried. This report summarized the findings of a 1987 performance survey of 13 tapecrete installations in Ontario. These installations were all treatments on structural barrier walls and the majority contained fibre reinforcement.

Performance testing of C.F.B. Gagetown low NOx/SOx burners

G.A. Robb Associates. Ottawa : G.A. Robb Associates, 1987. 36 p. *CANMET contract: 6-9184-01-SQ*
MICROLOG 88-01198 1 fiche

The report describes performance tests performed in 1987 together with changes in design and operating procedure to the low NOx/SOx pulverized coal burners installed in Unit No. 2 at the central heating plant, CFB Gagetown. The low NOx/SOx burners are staged with primary, secondary and tertiary air to reduce NOx emissions. Powdered limestone, introduced with the tertiary air, enters the cooler combustion zone to avoid dead burning in the higher temperature zone near the burner tip. The Gagetown program, which is aimed at contributing to the reduction of acid rain emissions, is described in a series of reports beginning with that on 1982 baseline tests.

The Periodic loading problem : formulation and heuristics

by P.J. Schweitzer, M. Dror and P. Trudeau. Montréal : Université de Montréal, Centre de recherche sur les transports, 1988. 21 p. Bibliogr. (Publication ; no 561)
MICROLOG 88-02270 1 fiche

The periodic loading problem involved the allocation of periodically-occurring tasks to the time-slots of a synchronous server in such a way as to minimize utilization of any time-slot. It arises when a time-division-multiplex communications bus collects data from a collection of periodically-producing sensors, e.g., the MIL-STD-1553 protocol. This paper formulates the problem, gives bounds on the solution, and shows it contains the minimum makespan problem, hence is NP-complete. Heuristic procedures are given and their performance illustrated on a (actual) problem for which a solution is found within 1% accuracy. In addition, an empirical study for the heuristic procedures is conducted on an extensive set of artifical problems.

Pesticide regulation in British Columbia

Victoria : Ombudsman of British Columbia, 1988. 72 p. Bibliogr. (Public report ; no. 11).
MICROLOG 88-03231 1 fiche

The Environmental Appeal Board in British Columbia has, among other duties, responsibility for hearing appeals against the issuance of permits under the Pesticide Control Act for pesticide use on publicly owned land. The major regulated users of pesticides are the Ministry of Forests and Lands, forestry companies, railways, public utilities, municipalities and regional districts. The Ombudsman's Office has received many complaints from interested members of the public concerning the lack of opportunity to participate effectively in the decision-making process for determining the safe use of such substances. This systems study makes recommendations for the timely and meaningful participation by all interested parties in such decisions.

Pesticide research report

compiled by Expert Committee on Pesticide Use in Agriculture. Ottawa : Agriculture Canada, Research Branch, Scientific Information Retrieval Section, Research Program Service, 1987. vi, 438 p. *Bilingual (Rapport de recherche sur les pesticides).* ISBN 0-660-53894-6
MICROLOG 88-02813 5 fiche

The Committee has three major functions: to define problems in crop and animal protection and to coordinate and stimulate research on pesticides; to establish principles for drafting local recommendations for pesticide use; and to summarize and make available current information on pesticides. This year's report summarizes the work of 356 reports on insect control, and disease research and studies for vegetables, fruits, cereal and forage crops.

Les Pesticides au Canada : étude de la législation et de la politique fédérales

par J.F. Castrilli et T. Vigod. Ottawa : Commission de réforme du droit du Canada, 1987. 144, 131 p. (Série protection de la vie : document d'étude) *Texte en français et en anglais (Pesticides in Canada...).* ISBN 0-662-55403-2
MICROLOG 88-00443 4 fiche

Les pesticides constituent une menace sérieuse pour l'environnement et la santé humaine tant sur le plan local que sur le plan mondial. Des solutions d'orche curatif et préventif sont recherchées. Ce document présente une étude des possibilités et des difficultés que présente l'application des remèdes du common law à l'égard de l'emploi des pesticides et des dommages qui en résultent. On y aborde des questions d'ordre constitutional et on examine la valeur de la législation et de la politique actuelles, en particulier les techniques à caractère préventif.

Pesticides in Canada : an examination of federal law and policy

by J.F. Castrilli and T. Vigod. Ottawa : Law Reform Commission of Canada, 1987. 131, 144 p. (Protection of life series : study paper) *Text in English and French (Les pesticides au Canada...).*
MICROLOG 88-00443 4 fiche

Discusses environmental and human health problems presented by pesticides, and the adequacy of, and difficulties in applying, common law remedies to pesticide-related damage. Notes federal and provincial constitutional and legislative authority in this area, then analyses the origins and adequacy of current legislation and policy, with emphasis on the federal level. Examines preventive techniques, such as pesticide registration, tolerance setting for residues on food and permitted usages, in conjunction with remedial enforcement approaches of an administrative, criminal and quasi-criminal nature.

Pesticides in Ontario drinking water, 1986

Toronto : Ontario Ministry of the Environment, 1987. iv, 103 p. : ill., maps. Bibliogr. ISBN 0-7729-2915-7
MICROLOG 88-01140 2 fiche

The 1986 Pesticide Monitoring Program was conducted as a follow up to the 1985 Alachlor Study, to further examine the extent to which surface waters and shallow groundwaters are contaminated by the application of agricultural pesticides. Nine pesticide compounds: atrazine, d-ethyl atrazine, simazine, d-ethyl simazine, cyanazine, metribuzin, prometryne, alchlor and metolachlor, were analysed. Interim maximum acceptable concentrations (IMAC) for each compound have been set by Health and Welfare Canada. Forty-two groundwater sampling sites, consisting of 37 domestic wells and 5 municipal supply wells were sampled weekly for pesticides and bacteria and weekly or monthly for major ion chemistry. Strict sample site selection criteria were imposed to eliminate as much as possible the runoff contamination that was prevalent in the 1985 survey.

Petro-Canada : its role, control and operations

by P. Halpern, A. Plourde and L. Waverman. Ottawa : Economic Council of Canada, 1988. xi, 140 p. : ill. Bibliogr. *French ed. (Petro-Canada : rôle...) : 88-02811/2.* ISBN 0-660-12667-2
MICROLOG 88-02810 2 fiche

In its first decade Petro-Canada grew from a collection of moderate acquisitions of existing regional companies and downstream divisions of larger petroleum companies to become the largest Canadian-owned and controlled oil company and the largest federal Crown corporation in terms of assets and revenue generation. This study examines the emergence and development of Petro-Canada, its objectives and activities, as well as how these have changed, especially due to the commercial mandate given the Corporation with the 1984 Progressive Conservative election win, and 'bottom-line' profit considerations. The study analyzes the Corporation's impact on stock prices of securities in the energy industry, and discusses its financial performance. Also discusses the problem of a Crown corporation acting as a separate venture and as an agent of the federal Government, making overall policy recommendations.

Petroleum geology of the MC-3 member, Mission Canyon formation, Pierson Area, southwestern Manitoba

by M. Husain and S.P. Halabura. Winnipeg : Manitoba Energy and Mines, Petroleum, 1987. 74 p. : ill. Bibliogr. (Petroleum open file report ; POF 7-86)
MICROLOG 88-02573 2 fiche

The MC-3 member of the Mission Canyon formation represents a portion of one of the upper carbonate-evaporite cycles in the Mississipian stratigraphic sequence of southwest Manitoba, and is the principal producing zone within the Pierson study area. During the past 23 years, exploration efforts in this area have delineated numerous pools in Saskatchewan and North Dakota, but very few in Manitoba. This study outlines the detailed stratigraphy, lithofacies, and factors controlling oil accumulation, and evaluates the hydrocarbon potential of the MC-3 subcrop belt, as well as giving a history of past exploration in the area and describing the relationships to adjoining areas.

Petroleum product storage and handling at federal facilities in southern Manitoba

by T. Youmans. Ottawa : Environmental Protection Service, Western and Northern Region, 1988. v, 31 p. (Report ; CP(EP)WNR-88/89-1)
MICROLOG 88-05250 1 fiche

In 1987, the Manitoba District Office of Environmental Protection, Environment Canada, completed an inventory of petroleum product storage tanks at federal facilities in the Interlake area. This report details the second phase of the inventory program, carried out in 1987 and 1988, which included a survey of all federal facilities south of the 53rd parallel that were known to have petroleum storage tanks. Also included was an assessment of the compliance status of federal facilities with Manitoba Regulation 97/88R (formally 156/80), which covers the design, installation and operation of petroleum product storage tanks in the province of Manitoba, as related to environmental protection.

Petroleum rent collection around the world

by Alexander Kemp ; with postscript by Campbell Watkins. Halifax : Institute for Research on Public Policy, 1987. liii, 363 p. : ill. Bibliogr.
MICROLOG 88-02370 5 fiche

This study analyzes the mechanisms employed to extract petroleum rents in a number of significant producing countries, with the several schemes employed in Canada being given detailed attention. Both advanced industrial countries and developing ones were selected, and two OPEC members, Nigeria and Indonesia, were specifically included. The countries were chosen to encompass a wide range of fiscal devices, although countries where petroleum production has been nationalized have not been included in the study. Attention is concentrated on the relationship between private investors and governments; in countries where the industry is nationalized the focus of interest is rather different. The working of the various systems was tested against the background of fluctuating oil prices and variable cost conditions that is now characteristic of the petroleum industry. The main purpose of the study was to discover how efficiently the various schemes perform.

A pH electrode switcher for field use with slope and standardization controls

by M.H. Holoka. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1988. iv, 7 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1592) *12th technical report from the Central and Arctic region, Winnipeg.* ISSN 0706-6457
MICROLOG 88-02977 1 fiche

While conducting field research on acid precipitation, the need arose to sequentially and repeatedly measure the pH of water samples in several carboys in order to titrate them. To avoid cross contamination and minimize stabilization time, either a number of pH meters or a pH electrode switching device was required. Commercially available, battery-powered switchers were limited in number and utility. Their circuitry could only adjust the standardization potential which resulted in inaccurate readings when using different makes of electrodes. Even similar makes of electrodes of different age (efficiences) caused difficulties. In order to alleviate this problem, a portable switchbox was designed with full standardization and slope (temperature) functions for each channel. The additional abuses given to a field instrument were taken into account.

The pH tolerance of the aquatic plants of British Columbia, part 1 : literature survey of the pH limits of aquatic plants of the world

by P.D. Warrington. Victoria : Province of British Columbia, Ministry of Environment and Parks, Water Management Branch, 1988. i, 152 p. : ill. Bibliogr.
MICROLOG 88-04593 2 fiche

Some literature and known data sources were surveyed to determine the pH and alkalinity limits of aquatic plants under both natural and cultural conditions. Most of the data is from natural ecological conditions; cultural data is sparse. The literature survey is strongly biased toward north-temperate species and conditions. Only the portions of the papers pertinent to aquatic plant pH and alkalinity data was abstracted in the review. Many marginal or seasonally inundated species are included in this review in addition to obligate aquatics. Bog, swamp and fen species were generally omitted unless they also grew as emergent or submerged aquatics in open water situations. In the abstracts the taxonomy of the aquatic plants is generally given as reported in the paper. However, in the tables of species and pH or alkalinity records some personal judgements are made and data is reported under one name. An index to genera and species reviewed by reference is also included.

Phase coherence and signal-to-noise ratio considerations for sampled aperture radar systems

by J. Litva and H.C. Chan. Ottawa : Government of Canada, Dept. of Communications, Communications Research Centre, 1987. iii, 44 p. : ill. Bibliogr. (CRC report ; no. 1412)
MICROLOG 88-04396 1 fiche

Description of the application of Sampled Aperature Radar (SAMPAR) technology to the tracking of low-angle targets at sea. In particular, expressions were developed and presented describing aperture signals for a conventional (SAMPAR) configuration which uses coherent local oscillators. A continuous wave experiment designed to evaluate the CHA algorithm was described. This system employs a beacon source and self-cohering receivers. The implementation of Doppler processing for various target velocities and signal-to-noise ratios for typical target geometries and sea-state conditions, in which forward-scatter clutter, back-scatter clutter and system noise are taken into account, is also discussed.

Phytoplankton assemblages from 95 lakes in Labrador : an assessment of environmental and morphometric influences on species distributions and associations

by D.A. Scruton, J.C. Earle and H.C. Duthie. St. John's, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1987. v, 71 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1586) *CSI 21105.237.* ISSN 0706-6457
MICROLOG 88-05956 1 fiche

Physical, chemical, and morphometric data, as well as phytoplankton samples, were collected from 95 lakes from August 16 to October 20, 1982. These data were used as the basis for an evaluation of the environmental factors influencing phytoplankton species distributions and associations. Multivariate statistics were used to determine the structure of the phytoplankton communities and to identify the environmental factors responsible for the organization observed. Factors analysis of 22 selected physical, chemical, and morphometric variables simplified the data into derived environmental factors of alkalinity, dystrophy, lake size, salinity, oligotrophy, and seasonality.

Phytoplankton assemblages from 97 headwater lakes in insular Newfoundland : an assessment of environmental and morphometric influences on species distributions and associations

by D.A. Scruton, J.C. Earle and H.C. Duthie. St. John's, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1987. v, 68 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1585) *CSI 21105.235.* ISSN 0706-6457
MICROLOG 88-05954 1 fiche

Physical, chemical, and morphometric data, as well as phytoplankton samples, were collected from 109 headwater lakes from August 16 to October 18, 1981. These data were used as a basis for an evaluation of the environmental factors influencing phytoplankton species distributions and associations. A selected subset of 77 phytoplankton taxa from 97 lakes were clustered using a complete-linkage cluster analysis. The final twelve clusters represent the associations of species found occurring together in Newfoundland. Factor analysis of 23 parameters simplified the original variables into the environmental factors of dystrophy, hardness, salinity, lake size, watershed influence, and orthophosphate enrichment. The resulting orthogonally rotated (VARIMAX) were correlated with the transformed species abundance.

Phytoplankton data from a 1976 cruise in Frobisher Bay

by S.I.C. Hsiao and N. Pinkewycz. Ste-Anne-de-Bellevue, Que. : Dept. of Fisheries and Oceans, Arctic Biological Station, 1985. iv, 212 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 575) ISSN 0706-6465
MICROLOG 88-02304 3 fiche

Large areas of the Canadian Arctic have recently been opened to exploration for oil, gas and minerals, and there is consequently an urgent need for increased investigation of phytoplankton. Water samples for phytoplankton were collected during the cruise of M.V. Calanus from upper to lower Frobisher Bay from August 9-17, 1976. For comparison purposes, 291 additional samples were also collected at depths of 5, 10, 20, 30, and 50 m at each of 31 stations. Samples of 125 ml were preserved with neutral formalin and were quantitatively analyzed for species composition and abundance. The species were identified with the aid of a Leitz phase-contrast microscope and the cells were enumerated.

MICROLOG 88-02921 1 fiche

The data presented in this report are based on samples obtained through the Eastern Arctic Marine Environmental Studies Program, carried out in response to proposed oil and gas exploration in the Canadian Eastern Arctic. Phytoplankton samples were collected from 23 stations at depths of 1, 5, 20, 50, 100 and 200 m in eastern Jones Sound, eastern Lancaster Sound and western Baffin Bay during the summer and fall of 1979. These samples were quantitatively analyzed for species composition and abundance.

Phytoplankton productivity experiments in British Columbia coastal waters, 1986

by J.R. Forbes, S.L. Buckingham and A.T. Earmme. 1987. vi, 169 p. : ill. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 56) ISSN 0711-6721
MICROLOG 88-01598 2 fiche

Report of details of phytoplankton versus irradiance experiments from 2 cruises in southern British Columbia coastal waters during 1986. Studies on the first cruise, from June 9 - July 3, 1986, were concentrated on the Continental Shelf off the southwest coast of Vancouver Island and 3 time series of P(I) experiments following drogued drifters were undertaken. The second cruise, from August 18-28, 1986, involved a more extensive area, with work along the full length of the west coast of Vancouver Island in which 1 series of P(I) experiments was performed on the continental shelf and a second offshore. All time series were of approximately 48 hours duration.

Phytoplankton, temperature and salinity data from northeastern Ungava Bay

by N. Pinkewycz, F.J. Fife and S.I.C. Hsiao. Ste-Anne-de-Bellevue, Que. : Dept. of Fisheries and Oceans, Arctic Biological Station, 1987. iv, 67 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 644) ISSN 0706-6465
MICROLOG 88-02915 1 fiche

Recently Canadian offshore areas have been opened to exploration for oil, gas and minerals. It is important that there be a better understanding of primary productivity and of the trophic relationships between the phytoplankton and dependent higher forms in the surrounding waters prior to extensive resource development. Phytoplankton species are often used as indicators of environmental changes resulting from resource development activities. This study examines the species composition, abundance, and vertical distribution of phytoplankton and the influence of regional or environmental conditions.

Phytotoxicology assessment surveys conducted in the vicinity of Handy and Harmon Ltd., 290 Carlingview Drive, Toronto (Etobicoke), 1982 through 1985

by R. Emerson and R. Rinne. Toronto : Air Resources Branch, Phytotoxicology Section, 1987. 6 p. ISBN 0-7729-3196-8
MICROLOG 88-03223 1 fiche

A pre-operational soil collection survey was conducted in the area of Handy and Harmon Ltd. on May 21, 1982. Precious metal refining operations by the company commenced shortly afterwards. The sampling program consisted of nine stations with soil at sites close to the company and more remote being sampled. The soil sampling program was repeated in September 1983 and again in September 1985, with the same sites being sampled in all years. Surface soil (0-5 cm) was collected each year as well as subsoil (5-10 cm) in 1983 and 1985. The surveys were performed to determine the status of metal emissions from the company. All soil samples collected each year were analysed on a dry weight basis for cadmium, copper, lead, mercury, nickel, silver and zinc.

Phytotoxicology moss bag assessment survey in the vicinity of Nuodex Canada Ltd., 34 Industrial Street, Toronto, June through October 1986

by R. Emerson. Toronto : Ministry of the Environment, Air Resources Branch, 1987. 8 p. ISBN 0-7729-3196-8
MICROLOG 88-03224 1 fiche

The moss bag survey conducted during 1985 (June through November) in the vicinity of Nuodex Canada Ltd. was repeated during 1986 (June through October). The purpose of both surveys was to ascertain the status of emissions of mercury and of other elements (cadmium, calcium, chromium, copper, lead, molybdenum, nickel, zinc) Nuodex uses in its manufacturing process. These surveys followed the accidental discharge of phenymercuric acetate from Nuodex in August, 1984, which resulted in contamination of soil and driveway areas in the vicinity.

Phytotron manual

by A.M. Harper and D.W.A. Roberts. Ottawa : Agriculture Canada, Research Branch, 1988. ii, 56 p. : ill. Bibliogr. (Technical bulletin : 1988-4E) ISBN 0-662-15936-5
MICROLOG 88-03608 1 fiche

The phytotron is a system of controlled environment facilities designed and operated for investigating relationships between plants and their environment. In the phytotron several physical parameters of the environment including light quality and intensity, day length, air temperature, humidity, plant nutrition, and concentration of gases can be controlled. Plans and physical features of the phytotron at the Agriculture Canada Research Station, Lethbridge, Alberta, are presented, with information on its operation and management. The advantages and uses of the phytotron and its limitations are discussed, particularly the accurate control of environmental factors. Guidelines for reporting phytotron experiments are given and references and supplementary reading are listed.

Pickering NGS, Unit 1 moderator distribution header : results of pressure, force/moment and residual stress measurements

by M.T. Flaman and J.A. Herring. Toronto : Ontario Hydro, Research Division, 1987. i, 46, 1 p. : ill. (Report ; no. 87-128-K)
MICROLOG 88-00089 1 fiche

Moderator distribution headers of identical design were originally installed on Units 1 to 4 at Pickering Nuclear Generating Station. Due to the subsequent incorporation of Emergency Core Injection Systems on the units, these headers (which became a critical part of the ECI systems), were subject to a re-analysis recording their structural integrity. This report discusses and documents the experimental program and the measurement results from a removed moderator distribution header from Pickering Unit 1. Also covered are the implications of these tests regarding the structural integrity of the moderator distribution headers of Units 3 and 4 for normal and extreme operating conditions. The tests were also to bench mark computer codes which were used to predict header behaviour for the test conditions.

Pilot plant scale evaluation of beneficiation potential of Donkin-Morien coal, N.S.

by M.W. Mikhail...et al. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. vii, 132 p. : ill. (Report ; ERP/CRL 87-78(TR))
MICROLOG 88-01551 2 fiche

As part of a program for evaluation of the beneficiation potential of eastern Canadian coals, Donkin-Morien coal was selected for pilot plant scale evaluation. A study was conducted to determine the limitation and potential of reducing the sulphur content in relation of mass and thermal recoveries, with 2 flowsheet options selected to achieve maximum thermal recovery at limited sulphur removal, lower sulphur, lower sulphur in clean coal to 2% or less, and to obtain maximum sulphur removal at acceptable mass recovery. Three clean coal samples (approximately 5t each) with different ash and sulphur levels were made available for testing.

Pilot plant study on electrostatic beneficiation of potash ore

by W. Lee. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. vi, 85 p. : ill. Bibliogr. *Project no. 15S2-23440-5-9079. CANMET contract: OSQ85-00114.*
MICROLOG 88-05972 1 fiche

Electrostatic separation is a dry separation process which could be used for potash ore beneficiation, with environmental protection, energy conservation and cost as benefits. This report presents the results of pilot plant studies on the electrostatic separation of potash ores obtained from a batch operation plate separator and a continuous operation tube separator pilot plant in single and double pass processes. The effects of such parameters as reagent changing temperatures, charging time, feedstock particle size, electrode length and the effect of middling streams in a continous two-pass operation in a tube free-fall separator are discussed.

Pilot scale trials on atmospheric fluidized bed combustion of a Saskatchewan petroleum coke

by H.A. Becker, R.K. Code and J.R. Stephenson. Kingston, Ont. : Queen's Fluidized Bed Combustion Laboratory, 1987. v, 58 p. : ill. Bibliogr. (Technical report ; QFBC.TR.87.5) *CANMET contract: OST84-00512.*
MICROLOG 88-03136 1 fiche

Trials of the burning of a petroleum coke, a residue of the processing of Alberta light crude oil, were performed in an atmospheric fluidized bed combustion pilot plant. Sand, mean particle dia. 0.6 mm, was usually used as the bed material, but several trials with limestone, mean particle dia. 0.83 mm, were also performed. Other conditions of the trials were mean coke particle dia. 0.28 mm; fluidizing velocity 1.1-1.9 m/s; excess air up to 15%; cyclone recycle ratio (fraction of cyclone catch recycled), 0-1; and bed temperature 833-1005 C. The combustion efficiency as measured by carbon burnup was 65-99%.

A Pilot study to estimate total chinook mortality associated with seine fishing in Johnstone Strait during 1986

by D.A. Nagtegaal, P.J. Starr and B. Riddell. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iv, 55 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1977)
ISSN 0706-6473
MICROLOG 88-05831 1 fiche

In 1986 a pilot study was conducted in the Johnstone Strait sockeye seine fishery to assess total chinook mortality. Catch statistics presently recorded are determined from records of chinook sales and are suspected to underestimate the catch of small (3 to 5 lbs.) and adult (over 5 lbs.) chinooks, and seriously underestimate the total mortality of all chinook.

Copies of these documents are available from:
Micromedia Ltd., 165 Hôtel de Ville, Hull PQ J8X 3X2
(819) 770-9928 FAX (819) 770-9265

Data were collected for catch per seine set by species and size categories of chinook, the number of sets made by vessels per day, and the total number of vessels per day active in the fishery. Calculation of total catch involved extrapolating the estimated mean catch per set over all sets made and incorporated the Monte-Carlo bootstrap technique to determine the mean catch estimate and 95% confidence interval.

Planification d'une flotte d'avions

par F. Soumis. Montréal : Université de Montréal, Centre de recherche sur les transports, 1978. xi, 215 p. Bibliogr. (Publication ; no. 133) (Publication ; no 318)
MICROLOG 88-06394 3 fiche

La planification des opérations d'une compagnie aérienne consiste à déterminer les types d'avions, leurs nombres et l'horaire à utiliser pour desservir les différents marchés. C'est un grand problème combinatoire car des décisions touchant des lieux et des temps différents sont interreliées. Ce document propose un nouveau type de modèles qui ouvre la voie au traitement détaillé des grands réseaux. Il s'agit de modèles non linéaires qui représentent mieux la réalité et qui, de plus, diminuent grandement le temps de résolution.

Manitoba. Resource Allocation Working Group. Winnipeg : The Group, 1988. 20 p. : maps. (Technical report ; 87-2)
MICROLOG 88-04520 1 fiche

Municipal Councils or established Planning District Boards are charged with the responsibility for municipal land use planning and development. This document was prepared in response to a request from the local municipal planning authority for background material on natural resources for which the Department is responsible. The document describes the natural resources in the study area, and identifies Provincial and Departmental concerns and objectives from a land use, development planning perspective. It offers for review, policies and guidelines to remedy, mitigate or anticipate issues and land use problems. The bases for this report are the Provincial Land Use Policies dealing with natural resources and the policies of Manitoba Natural Resources. Present conditions, concerns, objectives, policies, guidelines and implementation are given for each of fishery resources, forestry resources, outdoor recreation, water resources (groundwater and surface water), wildlife resources, and Crown land.

Policies for full employment

edited by Duncan Cameron and Andrew Sharpe. Ottawa : Canadian Council on Social Development, 1988. xii, 221 p. Bibliogr. ISBN 0-88810-377-8
MICROLOG 88-01695 3 fiche (Available on fiche only)

Paper takes the position that Canadian political initiatives have in effect abandoned a 1945 political committment by Parliament to achieve full employment and suggests high levels of unemployment are the result of certain political choices. Discusses policies that would have a significant impact in reducing unemployment. Investigates the nature, cost and causes of unemployment, co-operation between the State and labour markets, full employment as an objective of economy policy, job creation through public investment, use of macro-economic policy in reducing unemployment especially through a more independent monetary policy, use of price controls, work time reduction, wage subsidies. Contains additional analyses of these options by Members of Parliament.

La Commission royale Macdonald réitère constamment des remarques d'ordre général sur l'importance de la technologie. Dans le présent document, on examine pourquoi la Commission aurait eu intérêt à analyser les incidences précises de la technologie sur l'avenir du développement économique du Canada. On montre en outre que le domaine de la recherche et de la politique gouvernementale concernant spécifiquement la technologie doit être pris en considération dans une telle analyse et que les principales recommandations de la Commission en matière de libre-échange et de suprématie des forces du marché ne sont pas conformes à l'importance générale qu'elle a accordée à la technologie.

Les Politiques concernant les transports aériens intérieurs au Canada -- Revu

par J. Christopher. Ottawa : Bibliothèque du Parlement, Service de recherche, 1986. 19 p. Bibliogr. (Bulletin d'actualité ; 82-14F) *L'éd. anglaise (Domestic airline policy...) sur la même fiche.* ISBN 0-660-91944-3
MICROLOG 88-00821 1 fiche

Le 10 mai 1984, le ministre des Transports annoncait une nouvelle politique qui libéraliserait le transport aérien au Canada. Dans ce bulletin préparé à l'intention des parlementaires à Ottawa, on trace d'abord un portrait des politiques concernant le transport aérien intérieur entre 1936 et 1981. Par la suite, on résume les actions parlementaires qui ont été prises et qui ont conduit à la politique actuelle.

Politiques d'adaptation dans le secteur manufacturier

Ottawa : Conseil économique du Canada, 1988. x, 208 p. ISBN 0-660-92316-5
MICROLOG 88-05824 3 fiche (Available on fiche only)

Ce document contient le résumé des conclusions d'un projet de recherche sur l'adaptation à l'évolution de la situation économique dans le secteur manufacturier. On définit d'abord les notions de changement et d'adaptation et on met l'accent sur l'adaptation et le marché du travail. Puis, on examine le comportement des multinationales face à ces changements économiques, pour ensuite étudier les façons de s'adapter aux changements soit par l'importation, soit par la revitalisation par les subventions sectorielles. Finalement, on analyse les politiques d'adaptation de la main-d'oeuvre.

The Polls in perspective

by J. Terry. Ottawa : Library of Parliament, Research Branch, 1987. 16 p. Bibliogr. (Backgrounder ; BP-161E) *French ed. (Les sondages mis en...) on the same fiche.* ISBN 0-660-12472-6
MICROLOG 88-00693 1 fiche

Public opinion polls sometimes show abrupt changes in support for political parties or attitudes towards policy issues. This report discusses the validity of polls and the reliability of observed trends in a series of polls. Also discusses areas where opinion polling organizations have refined their techniques to counter earlier errors of unscientific, non-random polls and recognizes sources of inaccuracy in sampling error, non-sampling error, question phrasing and the situation confronting the survey correspondent.

Les Polluants atmosphériques et leurs effets sur les sytèmes aquatiques : évaluation des besoins de recherche

par P. Stokes. Ottawa : Conseil des sciences du Canada, 1988. 53 p. : ill. Bibliogr. (Document d'étude) ISBN 0-662-94794-0
MICROLOG 88-06453 1 fiche

Ce document examine les voies d'acheminement et les effets, réels ou anticipés, des polluants atmosphériques transportés sur de grandes distances sur les eaux douces canadiennes. Il fait le point sur la recherche effectuée dans ce domaine jusqu'à présent, examine l'utilité du chaulage pour la neutralisation des eaux de lac et de rivière acidifiées et propose certaines orientations en matière de recherche et de gestion.

Pollutant exposure and response relationships : a literature review : geological and hydrogeological aspects

by K.W. Campell ; prepared for Kananaskis Centre for Environmental Research. Calgary, Alta. : Acid Deposition Research Program, 1987. xvi, 151 p. Bibliogr. (Acid Deposition Research Program; biophysical research ; ADRP-B-07-87) *Fold. maps not filmed.* ISBN 0-921625-09-X
MICROLOG 88-00577 2 fiche

This literature review of the geological and hydrogeological aspects of acidic deposition, also includes a resource inventory of Alberta, including bedrock geology, surficial geology, and hydrogeology. The literature study covers groundwater hydrology, geochemical processes, pH and acidification, changes in concentration of major ions, metals and trace elements, role of groundwater hydrology in the acidification process, sensitivity analysis, modelling, human impact, including studies in Ontario and New York State.

La Pollution atmosphérique et la planification municipale : une publication consultative

Toronto : Ministère de l'environnement, 1984. 8 p. : ill. (Planification municipale et environment) ISSN 0835-4073
MICROLOG 88-00106 1 fiche

Le but de la publication est de favoriser une réduction des effets de la pollution atmosphérique sur les zones sensibles grâce à la planification municipale. On examine les critères de qualité de l'air ambiant et les normes de pollution atmosphérique et propose des recommandations pour la préparation et examen des plans et des propositions d'aménagement, les règlements de zonage et les plans de lotissement.

The Poly Air Dam : a new plastic gasket to improve airtightness

by W.L. Powis. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1987. viii, 87 p. ISBN 0-88654-202-2
MICROLOG 88-03756 2 fiche

Air leakage contributes significantly to the heating and cooling load in houses, particularly at the bottom plate/subfloor junction, the rim joist/top of foundation wall junction, and the wall framing/window (door) jamb junctions. While the bottom plate/subfloor junction has been addressed, the remaining two areas are not yet effectively sealed. This project developed an effective, inexpensive, simple product and technique to seal these three pathways. A review of current techniques is given, with a description of the testing and evaluation of the developed system, and the patent applications, approvals and certifications obtained.

Polychlorinated biphenyls (PCBs) : fate and effects in the Canadian environment

prepared for Toxic Chemicals Steering Committee, Canadian Council of the Resource and Environment Ministers ; by W.M.J. Strachan. Ottawa : Environment Canada, Environmental Protection Service, 1988. xiv, 90 p. Bibliogr. (Report ; EPS 4/HA/2) *French ed. (Devenir et effets...) : 88-04810'2. CSI 21111.217.* ISBN 0-662-16237-4
MICROLOG 88-04809 2 fiche

Polychlorinated biphenyls (PCBs) have been an environmental problem in Canada for a number of years. In 1976, this group of chemicals was investigated extensively and subsequently regulated in 1977. This report gives an environmental assessment of the hazards posed by polychlorinated biphenyls (PCBs) and is an interpretive presentation of data on exposure and effects which were available after publication of the original "Report of the Task Force on PCBs" (1976) prepared jointly by Environment Canada and Health and Welfare Canada. A comparison of expected exposure levels and their effects is presented, as well as recommendations for control measures.

Population impacts of the Norman Wells Project on the four study communities, 1982-84

by D.A. Stewart. Ottawa : Indian and Northern Affairs Canada, Northern Affairs Program, 1985. 37 p. : ill. Bibliogr. (DIAND monitoring reports ; 2-85) *CSI 21113.217.*
MICROLOG 88-06110 1 fiche

In 1982, construction began on the Norman Wells Oilfield Expansion and Pipeline Project. Prior to the approval of this mega project by the federal government, the Federal Environmental Assessment Review Office examined the development plans. This report identifies the population characteristics of the four study communities prior to the Norman Wells Project and examines the impact of the construction phase of these characteristics.

Population projections : Alberta, 1987-2016

Edmonton : Alberta Treasury, Bureau of Statistics, 1988. ix, 83 p. : ill.
CSI 35144.202. ISSN 0319-4299
MICROLOG 88-04203 1 fiche

This thirty-year projection is one of a series produced by the Bureau every five years after the latest Census of Canada results. It examines general trends in population change and growth, summarizes demographic trends and characteristics, and describes the projection model used, as well as the projections assumption. Figures are given for projected population and demographic trends, life expectancy, fertility, births, deaths, natural increase, and interprovincial and international migration, for 1956-2016.

Population status of migratory waterbirds on the Yukon coastal plain and adjacent Mackenzie Delta

by J.S. Hawkins. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1987. vii, 65 p. : ill., maps. Bibliogr. (Technical report series ; no. 28) ISSN 0831-6481 ISBN 0-662-15617-X
MICROLOG 88-00402 1 fiche

Summary of information on populations of migratory waterbirds (loons, swans, geese, cranes, jaegers, gulls, terns, shorebirds, and seabirds) using the Yukon coastal plain and the Yukon portion of the Mackenzie Delta during spring, summer and fall. The listing does not include those birds which are not water-oriented or which occur only as uncommon or rare visitors with no record of breeding. Information was obtained from studies published since 1970 with a chronological summary of field studies dating from 1971-85, and the resulting reports and formal publications. The review is organized on a species or species group basis, with each account divided into sections on spring migration, breeding, molting, and fall migration, the final entry being a brief discussion of the adequacy of the current knowledge and the need for further research.
